Foreword

The Federal Democratic Republic of Ethiopia, Ministry of Education, is pleased to release the 2024/25 Academic Year Education Statistics Annual Abstract. This annual abstract publication covers all levels of the Ethiopian Education landscape; including Pre-Primary, Primary, Secondary, Adult and Non-Formal Education (ANFE), Special Needs Education (SNE), Colleges of Teachers Education (CTE), Refugee Education, and Higher Education.

Education and training are at the center of the Ethiopian government policies targeted at achieving middle-income economy status. The general education sector must prepare competent young citizens with core academic knowledge and hands-on skills to feed the higher learning institutions, the Technical & Vocational Education and training (TVET) sector, and the world of work.

As part of this endeavor, the Ministry of Education has a momentous responsibility to keep accurate records and monitor the development status of education and training in the country in terms of access, equity, quality, efficiency, relevance, and learning outcomes. This can only be achieved with a strong and reliable documentation and reporting system. To do this, the Ministry has strived to ensure the quality of educational data by modernizing data management through the Education Management Information System (EMIS), from collection through analysis, interpretation, and prediction, using AI and business intelligence. This digitalized EMIS was completed in 2017 E.C and will be fully implemented in 2018 E.C academic year. In addition to making information up to date, reliable, and easier to use for informed decision-making, the new system enables access to educational information anytime and anywhere.

Education performance data and statistics, gathered through continuous monitoring and evaluation, are inputs to planning, informed decision-making and policy formulation. Currently, EMIS which is available at decentralized levels, with support from the respective ICT offices, has been collecting and processing education performance data which can be used for enhanced service delivery.

This Education Statistics Annual Abstract (ESAA) provides information so that evidence-based discussion and decision-making can be undertaken for future interventions. Previous educational statistics were used to analyze trends in the educational system overtime. This abstract can also serve to measure the performance of our education and training policy.

Stakeholders in education, such as researchers, publishers, legislative bodies, and development partners are welcome to use the information contained in this education statistical annual abstract in their endeavors to improve the delivery of education and training in the country. The education statistics in this publication also form the basis for preparing education indicators to be reported to UN agencies, which enables Ethiopia to assess its achievement against the requirements of the Education Sector Development Plan and Sustainable Development Goals.

Professor Berhanu Nega
Minister of Education

1. INTRODUCTION

The Education Statistics Annual Abstract 2024/25 provides performance data and statistics measuring Ethiopia’s progress against educational priorities set out in the Education Sector Development Program VI (2020/21 – 2024/25 G.C), the ending year for the implementation of the sector development plan.

The publication reports on all levels of General Education; Pre-primary, Primary, Middle, Secondary, Adult and Non-Formal Education, Special Needs Education, Colleges of Teachers’ Education (CTE), and Refugee Education.

Objective

The main objective of the abstract is to provide annual statistical information in the Ethiopian education system to support the process of evidence-based decision making.

In line with the above main objective, the abstract also aimed to:

- Provide insight into the current status of education and training in Ethiopia;
- Indicate progress against the Education Sector Development Program VI (ESDP VI) targets; and
- Provide education planners, policy makers, administrators and other stakeholders in the education sector with data and evidence to improve the delivery of education and training in the country.

Vision and Mission

Below are the vision and mission of the FDRE Ministry of Education

Vision:

Sustainably building an education and training system that ensures quality and equitable education for all citizens and that continuously produces a competent and competitive workforce fueling the country’s economic development.

Mission:

Ensuring effective, quality and equitable education and training system through building the implementation capacity of the education sector at all levels, designing and regulating standards of efficiency, expanding standardized education throughout the country, as well as complementing and leveraging education sector development interventions with strategic communications and public awareness.

Note:

- In this edition, since teaching-learning is not fully implemented in most parts of Amhara region for the last two consecutive years, indicators are calculated without the data from Amhara. On the other hand, situations have been changed in Tigray region and this edition of the abstract includes data from Tigray.

1.1. Indicator Table

The indicator table below outlines progress against Key Performance Indicators (KPIs) set out in ESDP VI related to General Education.

58	Secondary 9-12 GER	7.2/17.2	50.4/57.6	9.0/19.5

2. PRE-PRIMARY EDUCATION

Pre-Primary education serves as the initial stage of formal education for young children, typically catering to those aged 4 to 6 years, with age 4 to be supported especially in other alternatives. It aims to prepare children for Primary education through a structured two-level program. This educational initiative is offered by a variety of providers, including Non-Governmental Organizations (NGOs), community groups, private institutions, and faith-based organizations.

The Government of Ethiopia through the Ministry of Education has embarked on the development of Pre-Primary Sub Sector largely since the launching of the National ECCE Policy Framework (2010).

However, despite relatively encouraging trends over the last ten years, holistic child development has not reached the desired level for a variety of reasons. Beside this, inequalities and disparities in access also persist in regions between rural and urban settings. For better operationalization and alignment with the global ECD strategic recommendations and the current national documents, the Ministry of Education, Health, Women and Social Affairs have together, and with consideration to the feedback of senior leadership, revised the policy framework as ECDE in 2023 to achieve quality early childhood development and education services that promote holistic development and give every child the best start in life. But still the enrolment and providing quality education service is under questions.

In addition to this, during revising the Ethiopian Education and Training Policy, the Pre-Primary got a special attention. The policy clearly set the two-year program as free and compulsory education for 5 and 6-year-old children. Even if the policy put other alternative approach for 4 year's children, Ministry of Education developed a curriculum framework, syllabus and teachers' guide by regional request and the direction of ECDE policy framework.

To strengthen early childhood education program, Ministry of Education is devoted to ensuring that all children going to Pre-Primary school have access and equal opportunity to education, regardless of their social class, ethnicity, background or physical disabilities. The sector annually tracks progress towards Pre-Primary's access and equity through major indicators; such as Enrolment, GER, NER, GPI and Regional distribution of Pre-Primary schools.

The importance of ECDE is recognized by the inclusion of a specific indicator under Sustainable Development Goal 4; in line with this, one of the focus areas/indicators under the SDG is "Early childhood development and universal Pre-Primary education" (SDG 4, Target 4.1).

"By 2030, ensure that all girls and boys have access to quality early childhood development, care and pre-primary education so that they are ready for primary education".

In order to achieve the ECDE objectives, Ministry of Education has developed a curriculum, trained teachers and provided supervisory support. As a result, Pre-Primary enrolment is increasing every year.

2.1. Gross Enrolment Ratio (GER) in Pre-Primary Education

ESDP VI Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
Pre-primary GER Female	40	73	58.1
Pre-primary GER Male	41	74	61.4
Pre-Primary GPI (index)	0.95	1.00	0.95

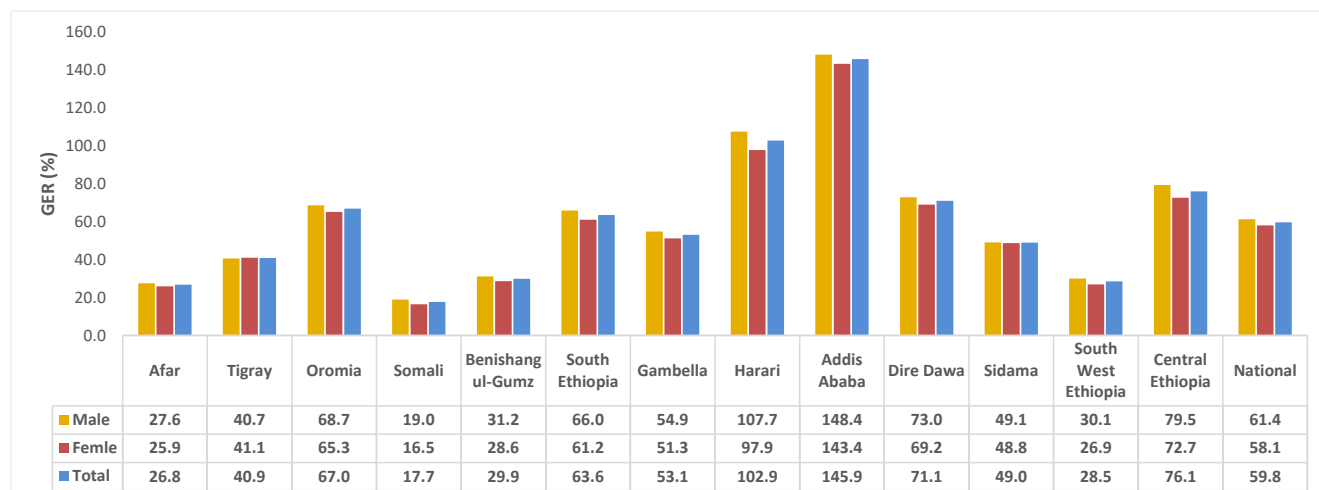

Nationally, 59.8% of children are enrolled in Pre-Primary education from the expected school age population, which shows a two percentage points increment from last year.

Table 2.1 and Chart 2.1 show the gross enrolment, corresponding GER and GPI of Pre-Primary students in each region. The Gender Parity Index (GPI) is 0.95, which is less by 0.01 from the previous year.

Table 2.1 Gross Enrolment, GER and GPI by Region and Sex, 2024/25

	Gross Enrollment			School Age Population (4-6)			GER (%)			GPI
	Male	Femle	Total	Male	Femle	Total	Male	Femle	Total	
Afar	19,804	17,757	37,561	71,762	68,466	140,228	27.6	25.9	26.8	0.94

South West Ethiopia	53,202	47,200	100,402	176,777	175,496	352,273	30.1	26.9	28.5	0.89
Central Ethiopia	191,470	177,895	369,365	240,784	244,578	485,362	79.5	72.7	76.1	0.91
National	2,059,926	1,908,087	3,968,013	3,357,392	3,281,842	6,639,233	61.4	58.1	59.8	0.95

Regionally, Harari and Addis Ababa showed significant increment scoring beyond the natural 100%.

Chart 2.1 GER by Region and Sex, 2023/24

2.1.1. Pre-Primary Enrollment in Pastoral Areas

In Pastoral area, the livelihood of communities is based on pastoralist way of life, characterized by moving from one place to another and have a strong reliance on livestock, presents unique challenges that must be addressed to ensure the provision of quality education for these communities.

In line with this, the Ethiopian Government gives due attention for the pastoralist and semi pastoralist communities. Accordingly, the constitution of Federal Democratic Republic of Ethiopia in article 89 sub article 4 stipulates that *'Government shall provide special assistance to Nations, Nationalities, and Peoples least advantaged in economic and social development.'*

Ministry of Education has been developed Pastoralist Education Strategy and provides special support for Emerging Regions (Afar, Somali, Benishangul-Gumuz and Gambella) and also for pastoral woredas in Oromia, South Ethiopia and South West Ethiopia regions.

The table below shows the enrollment shares of pastoral woredas of the three regions (Oromia, South Ethiopia and South West Ethiopia) against the total regional enrollment.

Table 2.2 Gross Enrolment Share of Pastoral Areas by Region and Sex, 2024/25

Region	Regional Enrollment			Pastoralist Enrollment			Pastoralist Share (%)		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Oromia	1,136,783	1,047,790	2,184,573	69,047	58,028	127,075	6.1	5.5	5.8
South Ethiopia	192,384	177,981	370,365	5,812	5,142	10,954	3.0	2.9	3.0
South West Ethiopia	53,202	47,200	100,402	1,765	1,574	3,339	3.3	3.3	3.3
Total	1,382,369	1,272,971	2,655,340	76,624	64,744	141,368	5.5	5.1	5.3

2.2. Net Enrolment Rate (NER) in Pre-Primary Education

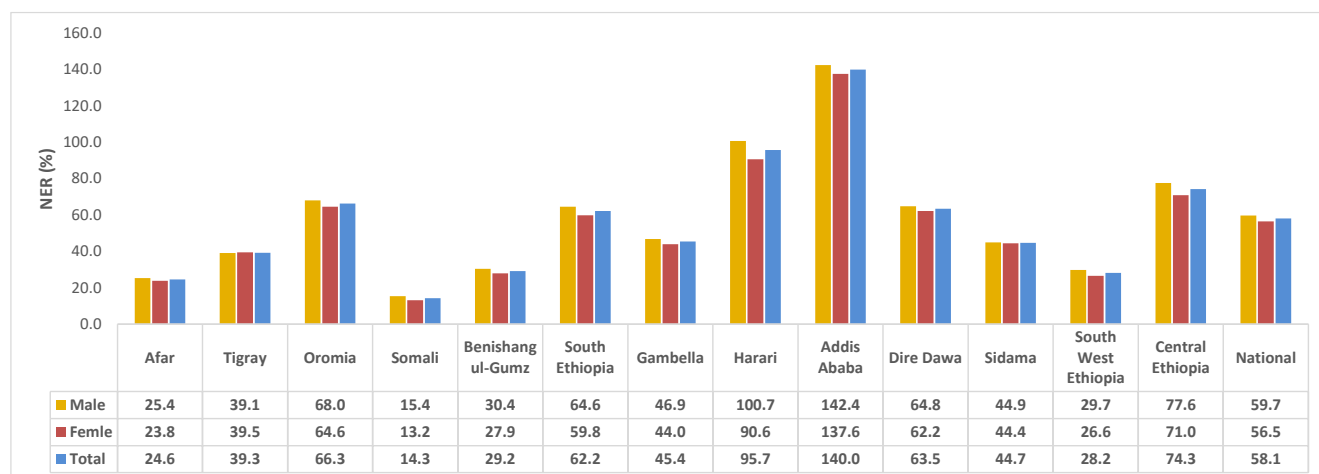

Children enrolled in Pre-Primary education in this year are in the appropriate school age for the level compared to last year, showing a tremendous change jumping from 45.2 to 58.1

Tables 2.3 and Chart 2.2 below present data on age-specific enrollment of students with the official school-age population and the corresponding Net Enrollment Rate (NER). The national NER reached at 58.1%, with a significant increment from last year.

Table 2.3 Net Enrolment and NER by Region and Sex, 2024/25

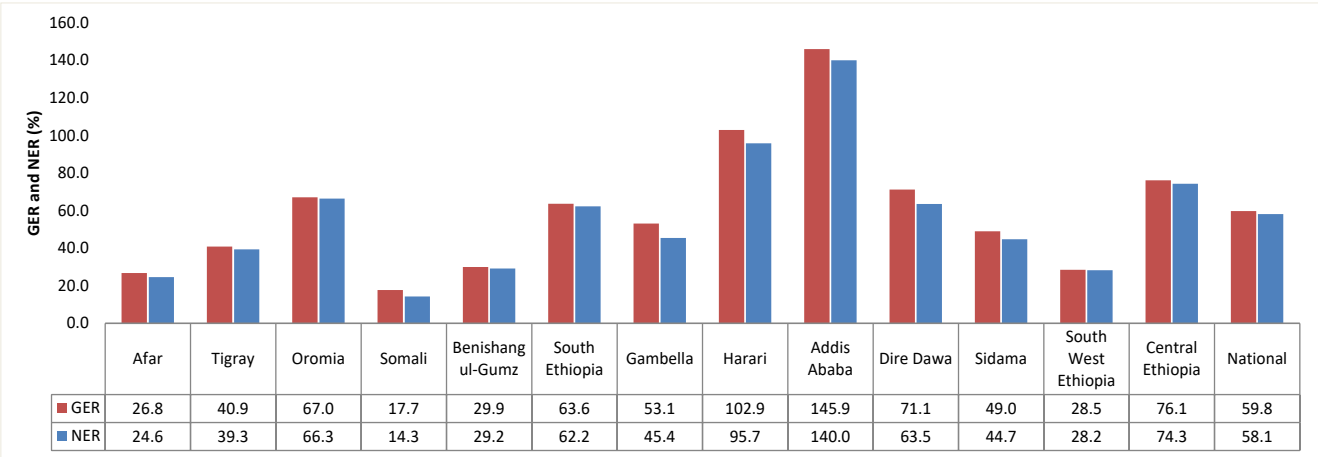

Region	Net Enrollment (Ages 4-6)			School Age Population (4-6)			NER (%)		
	Male	Femle	Total	Male	Femle	Total	Male	Femle	Total
Afar	18,209	16,286	34,495	71,762	68,466	140,228	25.4	23.8	24.6
Tigray	81,849	80,115	161,964	209,399	202,734	412,133	39.1	39.5	39.3
Oromia	1,124,773	1,036,828	2,161,601	1,653,684	1,605,394	3,259,078	68.0	64.6	66.3
Somali	43,391	36,211	79,602	282,163	274,801	556,964	15.4	13.2	14.3
Benishangul-Gumz	14,631	12,983	27,614	48,150	46,565	94,715	30.4	27.9	29.2
South Ethiopia	188,304	174,135	362,439	291,609	290,999	582,608	64.6	59.8	62.2
Gambella	8,368	7,751	16,119	17,852	17,632	35,484	46.9	44.0	45.4
Harari	8,863	7,731	16,594	8,800	8,533	17,333	100.7	90.6	95.7
Addis Ababa	163,988	156,742	320,730	115,164	113,920	229,084	142.4	137.6	140.0
Dire Dawa	10,568	9,959	20,527	16,314	16,019	32,333	64.8	62.2	63.5
Sidama	101,053	96,277	197,330	224,934	216,705	441,639	44.9	44.4	44.7
South West Ethiopia	52,576	46,720	99,296	176,777	175,496	352,273	29.7	26.6	28.2
Central Ethiopia	186,859	173,560	360,419	240,784	244,578	485,362	77.6	71.0	74.3
National	2,003,432	1,855,298	3,858,730	3,357,392	3,281,842	6,639,233	59.7	56.5	58.1

Chart 2.2 NER by Region and Sex, 2024/25

The difference between GER and NER in Pre-Primary at national level is becoming closer. Gambella, Harari and Addis Ababa show a wide variation between GER and NER than others.

Chart 2.4 Comparison of GER and NER by Region, 2024/25

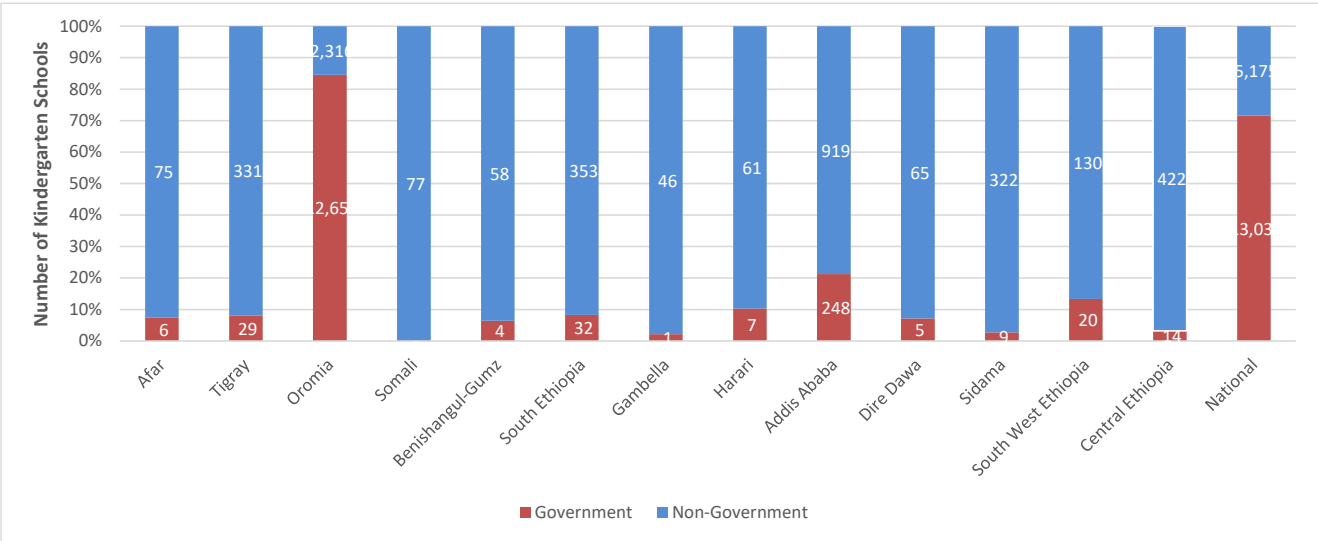

2.3. Number of Schools

The total number of Kindergarten schools for this year is 18,209, with 72% of the schools owned by Government. Pre-Primary schools have also shown a significant increment from last year, which was 14,909.

It should be noted that 82% of the total KG schools are in Oromia, and it is the only region in which Government owned schools are higher in number than that of Non-Government owned.

Chart 2.2 Number of Kindergarten Schools by Region and Ownership, 2024/25

3. PRIMARY AND MIDDLE LEVEL EDUCATION

The current Education system of Ethiopia consists of 6 grades in Primary level (Grades 1-6) and 2 grades in Middle level education (Grades 7-8).

According to the Education and Training Policy revised in 2015 E.C, the official entrance age for Grade 1 is 7.

Primary Education is basic for citizens to participate in all round socio economic and political activities of the country thereby contributing to the holistic development and thus takes the largest share of government spending on education in Ethiopia. The Ministry of Education annually collects data on the status of General Education, from which Primary and Middle Level Education is the major part, as a whole. This part thus gives a detailed analytical view of the status of Primary and Middle Education in Ethiopia based on key indicators of access/coverage, equity, quality, and internal efficiency.

Primary education is critical to a nation's development, providing the highest public returns to investment for the state, and is the keystone for later education and economic growth. Access to primary education has seen considerable improvements through the construction of new schools which have reduced the distance children need to travel to attend school (ESDP VI, 2021).

The national Alternative Basic Education (ABE) strategy developed in 2006 also aimed to establish new ABE centers, and to transform existing centers into regular schools. Alternative education provision responds to differing needs and contexts, improving the enrolment and participation of students in pastoralist and semi pastoralist areas. Hence, indicator analysis for primary education includes their corresponding ABE levels.

In this section the results of the basic educational performance indicators of the academic year, 2024/25 (2017 E.C.) has been measured and compared against the target set by ESDP VI. The indicators measure the extent to which children have access to Primary and Middle levels of education, and the extent to which education provision is efficiently delivered, with what quality, and by what level of equitable access.

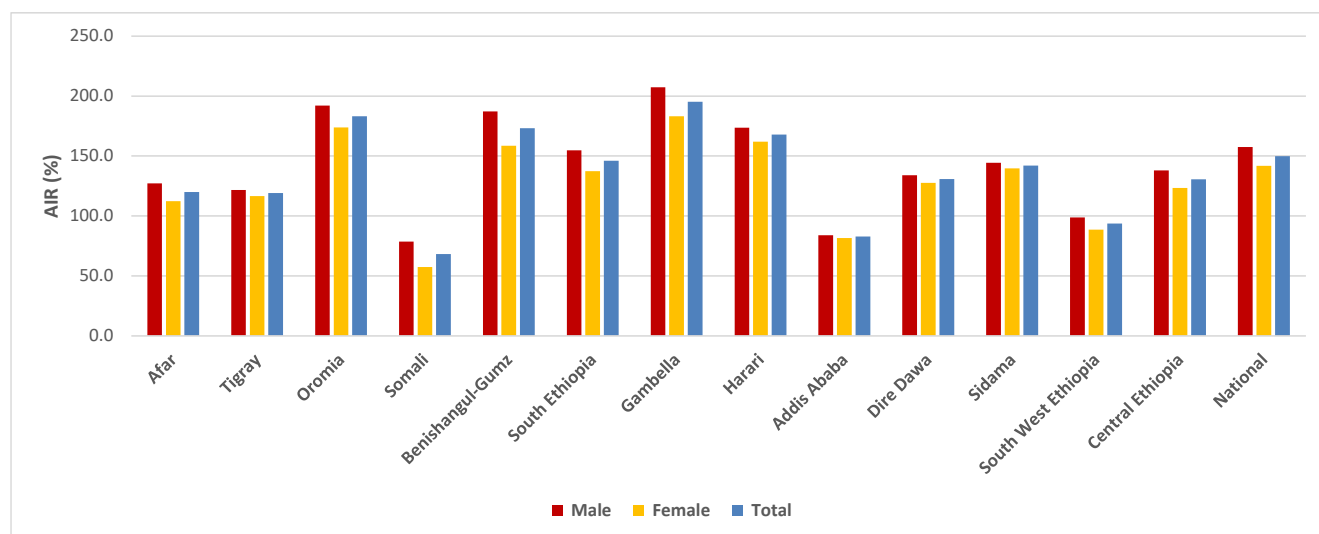

3.1 Apparent Intake Ratio

The data trend shows new entrants for Grade 1 is still beyond 100% nationally.

Table 3.1 shows that national AIR is 149.8%. This might indicate that students are not enrolling with their correct school admission age.

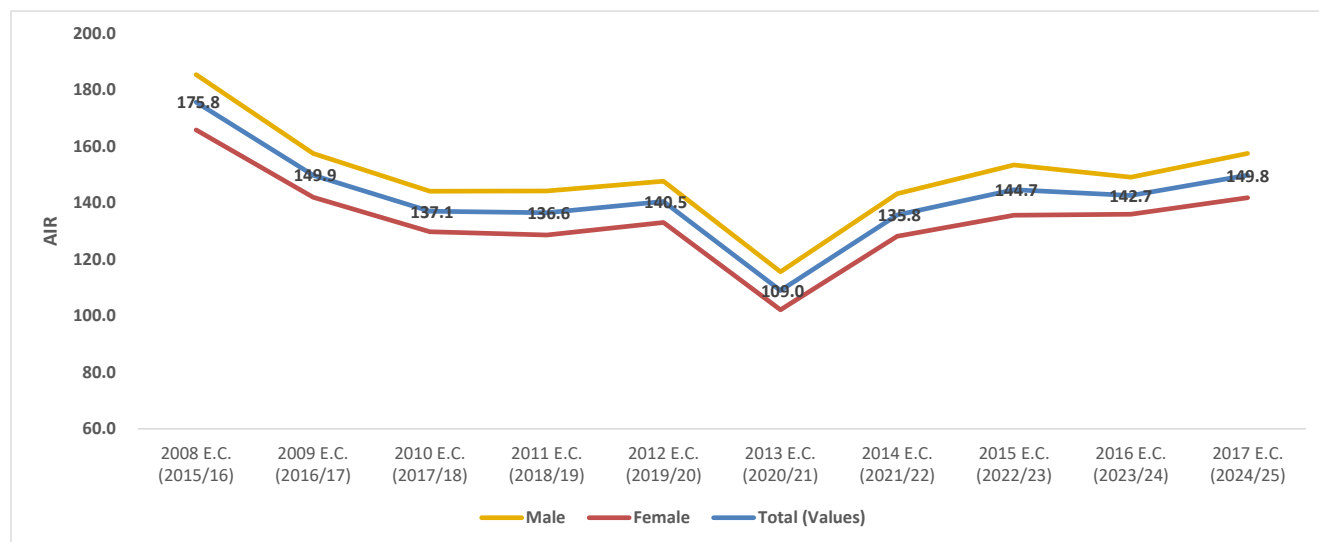

Table 3.1 Apparent Intake Ratio (AIR) by Region and Sex, 2024/25

Region	School Age Population (Age 7)			New Entrants to Grade 1 (All Age)			AIR%			GPI
	Male	Female	Total	Male	Female	Total	Male	Female	Total

National	1,104,279	1,081,729	2,186,009	1,740,191	1,535,244	3,275,435	157.6	141.9	149.8	0.90

Chart 3.1 AIR by Region and Sex, 2024/25

Since 2003/04, Grade 1 enrollment rates are above 100%, with notable fluctuations over time.

Chart 3.2 show the trend in AIR over the last 10 years. AIR has consistently been above 100% since 2003/04 (see the previous years' editions) which implies that more children have been enrolling into grade 1 than the national population of age 7 for the last 20+ years.

Chart 3.2 AIR trend, 2015/16-2024/25

3.2 Net Intake Rate

ESDP VI Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
Grade 1 NIR Female	88	95	94.9
Grade 1 NIR Male	97	99	103.4

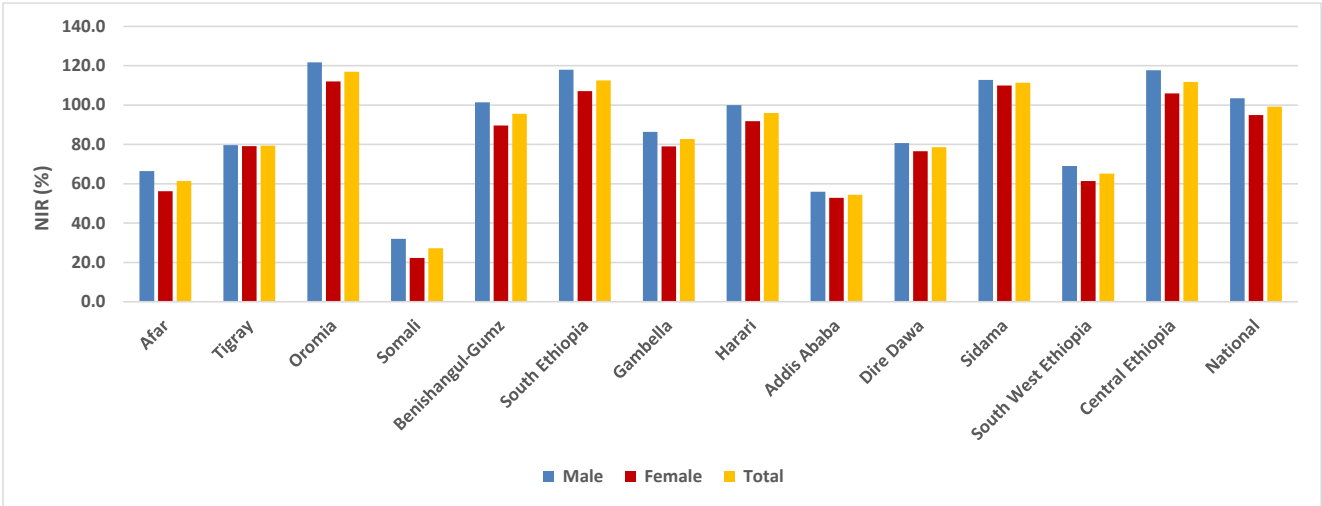

The national target of NIR for Grade 1 has been met in both sexes.

NIR decreased by 0.8 percentage points from last year.

Table 3.2 Net Intake Rate (NIR) by Region and Sex, 2024/25

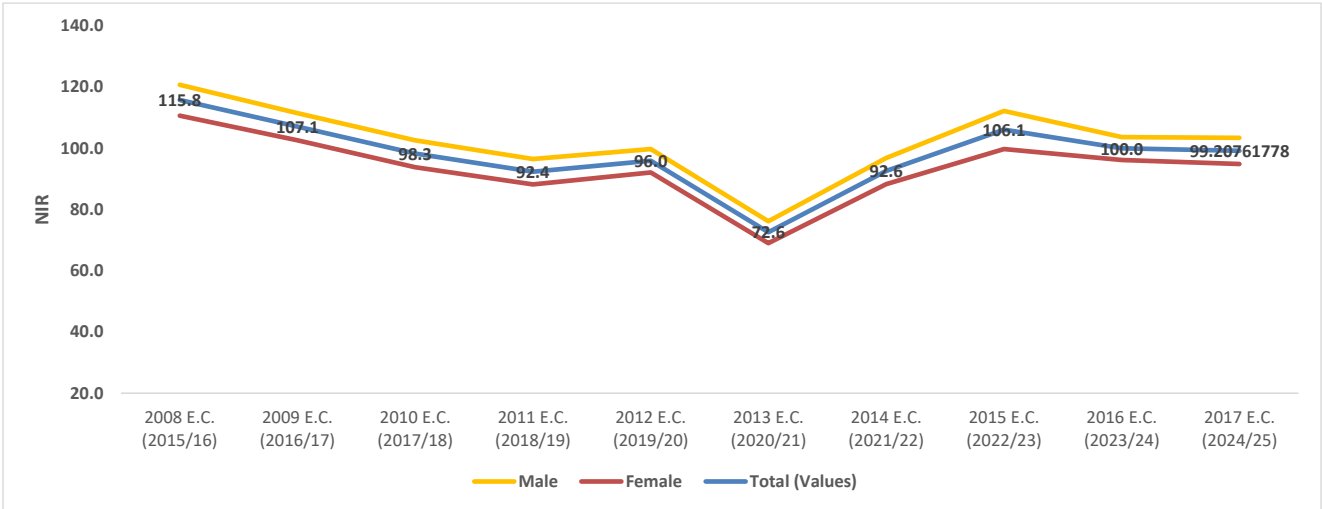

Region	School Age Population (Age 7)			New Entrants to Grade 1 (Age 7)			NIR%		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Afar	24,136	22,953	47,090	16,045	12,894	28,939	66.5	56.2	61.5
Tigray	70,454	68,298	138,752	56,090	54,066	110,156	79.6	79.2	79.4

Addis Ababa	38,055	38,086	76,141	21,285	20,112	41,397	55.9	52.8	54.4
Dire Dawa	5,318	5,189	10,507	4,290	3,975	8,265	80.7	76.6	78.7
Sidama	78,298	75,545	153,843	88,321	83,079	171,400	112.8	110.0	111.4
South West Ethiopia	55,045	54,726	109,771	38,002	33,565	71,567	69.0	61.3	65.2
Central Ethiopia	77,787	79,129	156,916	91,594	83,865	175,459	117.8	106.0	111.8
National	1,104,279	1,081,729	2,186,009	1,142,124	1,026,563	2,168,687	103.4	94.9	99.2

Chart 3.3 NIR by Region and Sex, 2024/25

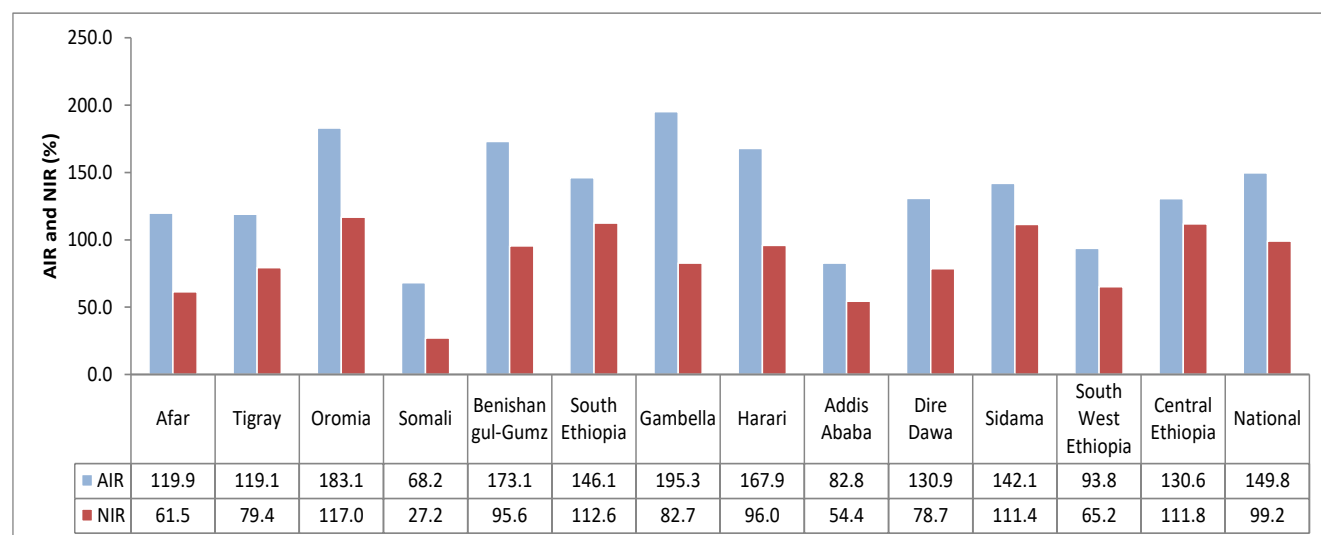

In general, the persistent gender gap is a high concern if equity targets are to be reached, though the total result shows good relative to the school age population.

Chart 3.4 NIR Trend, 2014/15-2024/25

When we compare AIR and NIR across regions, it shows that regions are affected by children outside of the Primary school admission age enrolling in Grade 1. Chart 3.5 below shows this comparison.

Chart 3.5 Regional comparisons between AIR and NIR, 2024/25

3.3 Gross Enrolment Ratio in Primary and Middle Level Education

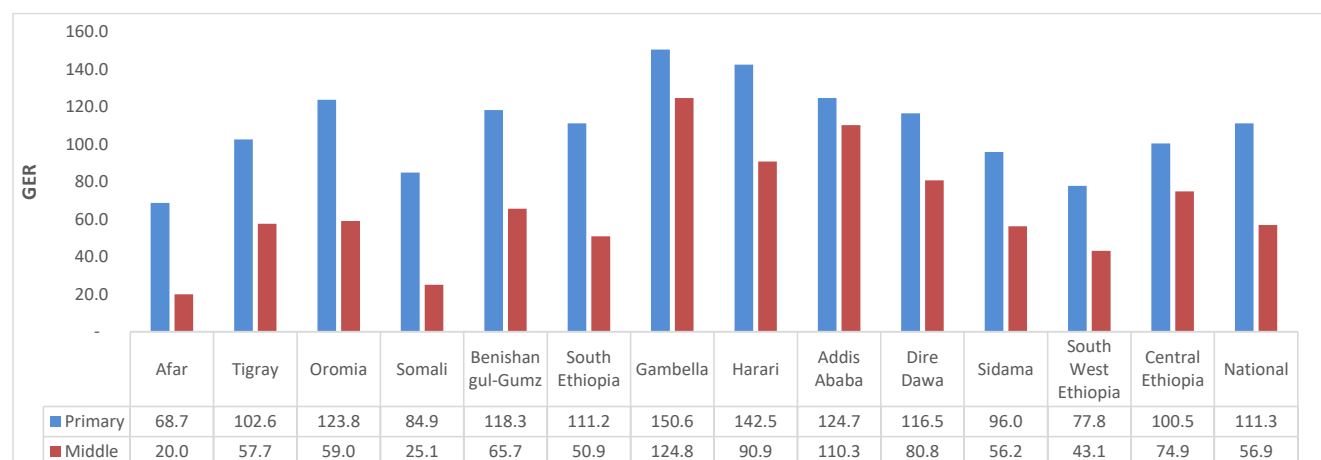

ESDP V Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
Primary Grades 1–6, including ABE, GER Female	109	104	105.9
Primary Grades 1–6, including ABE, GER Male	121	109	116.5
Middle Grades 7–8, GER Female	106	102	55.8
Middle Grades 7–8, GER Male	118	108	58.1

The result in Table 3.3 below shows that many students are unable to transit from Primary to Middle level education, either due to repeating grades or dropping out of the education system.

The Gross Enrollment Ratio shows considerable variation across regions.

Table 3.3 Comparisons of GER for Primary and Middle Level Education by Region and Sex, 2024/25

Region	GER					
	Primary			Middle		
	Male	Female	Total	Male	Female	Total
Afar	74.1	63.0	68.7	22.0	17.9	20.0

Oromia	129.7	117.7	123.8	60.8	57.2	59.0
Somali	94.8	74.7	84.9	28.3	21.9	25.1
Benishangul-Gumuz	129.2	107.0	118.3	69.3	61.9	65.7
South Ethiopia	115.8	106.5	111.2	51.7	50.2	50.9
Gambella	159.5	141.5	150.6	131.7	117.7	124.8
Harari	151.2	133.6	142.5	98.1	83.5	90.9
Addis Ababa	125.8	123.6	124.7	109.1	111.4	110.3
Dire Dawa	121.7	111.2	116.5	83.4	78.1	80.8
Sidama	95.7	96.3	96.0	52.9	59.7	56.2
South West Ethiopia	84.7	70.9	77.8	45.5	40.8	43.1
Central Ethiopia	105.3	95.9	100.5	76.0	73.7	74.9
National	116.5	105.9	111.3	58.1	55.8	56.9

Chart 3.6 Comparisons of GER for Primary and Middle Level Education by Region, 2024/25

Enrolment of Children outside of the official school age continues to persist throughout Primary and Middle level education (Grades 1-8) in most regions. However, the national figure of the total GER value is below 100 for Grades 1-8.

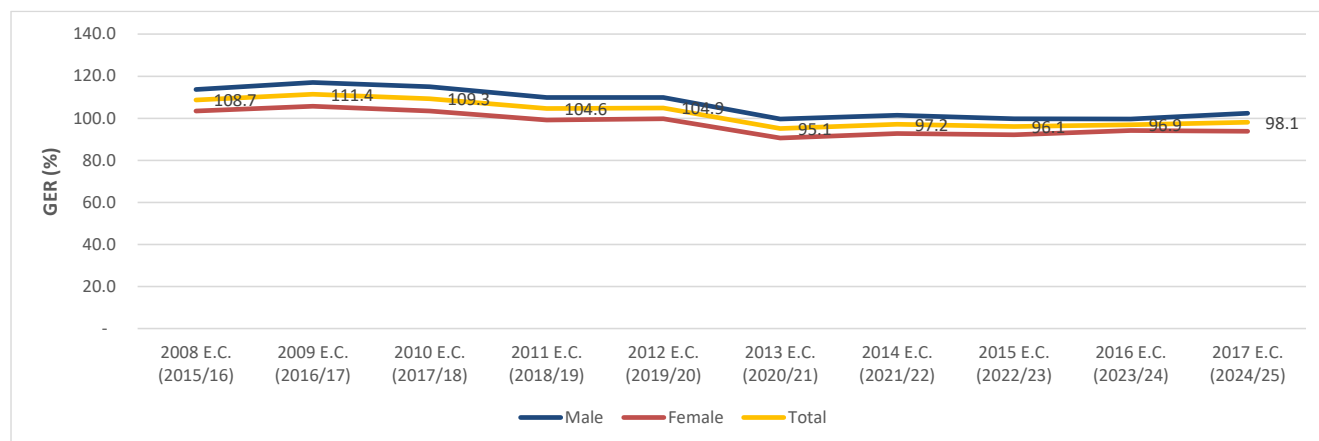

The GER for Grades 1-8 shows a slight increment from last year.

Table 3.4 Gross Enrolment and GER by Region and Sex for Grades 1-8, 2024/25

Region	School Age Population (7-14)			Gross Enrolment (G1-8)			GER (%)		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Afar	187,741	177,833	365,575	115,081	92,293	207,374	61.3	51.9	56.7
Tigray	532,421	516,962	1,049,383	484,989	477,921	962,910	91.1	92.4	91.8
Oromia	4,182,892	4,084,389	8,267,281	4,733,074	4,213,844	8,946,918	113.2	103.2	108.2

South Ethiopia	742,850	747,893	1,490,743	733,230	683,385	1,416,615	98.7	91.4	95.0
Gambella	45,662	44,771	90,433	69,752	60,768	130,520	152.8	135.7	144.3
Harari	22,880	22,197	45,077	31,598	26,904	58,502	138.1	121.2	129.8
Addis Ababa	280,243	286,481	566,724	341,960	346,019	687,979	122.0	120.8	121.4
Dire Dawa	40,784	39,988	80,772	45,879	41,278	87,157	112.5	103.2	107.9
Sidama	562,332	546,367	1,108,699	482,536	479,775	962,311	85.8	87.8	86.8
South West Ethiopia	399,982	400,499	800,481	301,383	254,854	556,237	75.3	63.6	69.5
Central Ethiopia	588,276	602,663	1,190,939	578,929	546,015	1,124,944	98.4	90.6	94.5
National	8,414,433	8,280,359	16,694,791	8,617,211	7,767,180	16,384,391	102.4	93.8	98.1

The trend shows that GER value for Grades 1-8 was over 100% from the year 2014/15-2019/20, but over the past four years, the result has been declining to a realistic value while the gender gap is still wider.

Chart 3.7 below shows the trend in GER for Primary and Middle level education for the last ten years.

Chart 3.7 GER Trend for Grades 1-8, 2015/16 – 2024/25

3.3.1 Enrollment in Pastoral Areas

In addition to the four regions (Afar, Somali, Benishangul-Gumz, Gambella), there are pastoral areas in Oromia, South Ethiopia and South West Ethiopia regions.

There are 63 pastoral woredas in these regions. Out of these pastoral woredas, 45 of them are in Oromia, 7 in South Ethiopia and 11 in South West Ethiopia. The table below shows the enrollment shares of pastoral woredas of the three regions against the total regional enrollment.

Table 3.5 Gross Enrolment Share in Pastoral Areas for Grades 1-8 by Region and Sex, 2024/25

Region	Regional Enrollment			Pastoralist Enrollment			Pastoralist Share (%)		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Oromia	4,733,074	4,213,844	8,946,918	438,412	346,916	785,328	9.3	8.2	8.8
South Ethiopia	733,230	683,385	1,416,615	29,483	25,130	54,613	4.0	3.7	3.9
South West Ethiopia	301,383	254,854	556,237	41,975	27,969	69,944	13.9	11.0	12.6
Total	5,767,687	5,152,083	10,919,770	509,870	400,015	909,885	8.8	7.8	8.3

Note: Enrollment in the above table includes ABE

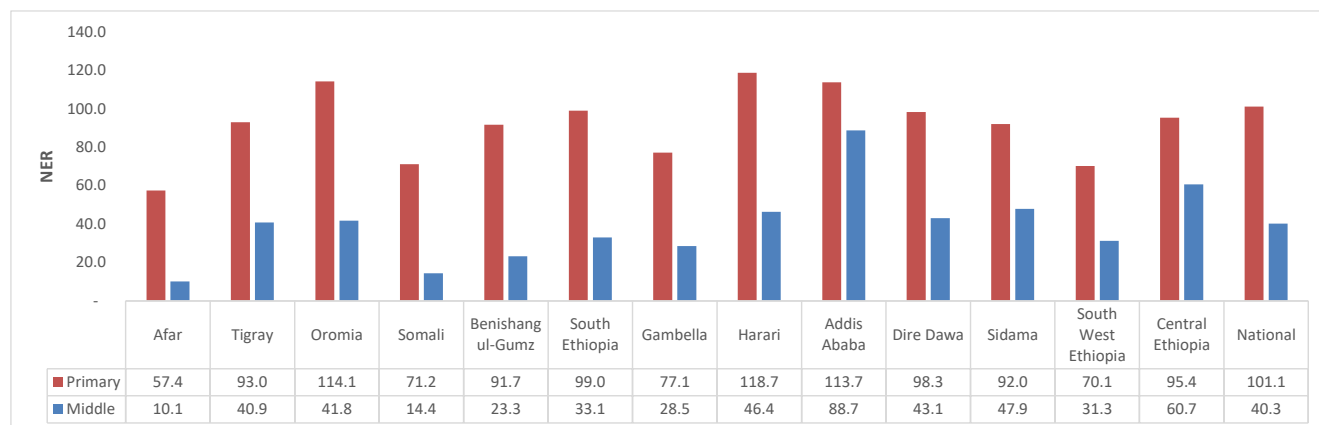

3.4 Net Enrolment Rate in Primary and Middle Level Education

ESDP V Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
Primary Grades 1–6, including ABE, NER Female	91	98	96.4
Primary Grades 1–6, including ABE, NER Male	105	102	105.7
Middle School Grades 7–8, NER Female	93	97	39.9
Middle School Grades 7–8, NER Male	102	100	40.7

Similar to the GER, the difference in NER between the two levels, Primary and Middle, shows that the proportion of 13-14 years' old who are enrolled in the appropriate grade is too low nationally.

Table 3.6 Comparison of NER for Primary and Middle Level Education by Region and Sex, 2024/25

Region	NER					
	Primary			Middle		
	Male	Female	Total	Male	Female	Total
Afar	61.6	53.1	57.4	11.0	9.2	10.1
Tigray	92.4	93.5	93.0	38.4	43.4	40.9
Oromia	119.4	108.7	114.1	42.8	40.8	41.8
Somali	79.6	62.6	71.2	16.2	12.5	14.4
Benishangul-Gumuz	98.6	84.6	91.7	22.7	24.0	23.3
South Ethiopia	103.1	95.0	99.0	33.4	32.7	33.1
Gambella	81.6	72.5	77.1	29.1	28.0	28.5
Harari	124.2	113.0	118.7	46.3	46.5	46.4
Addis Ababa	115.4	112.0	113.7	87.2	90.1	88.7
Dire Dawa	102.0	94.5	98.3	43.6	42.6	43.1
Sidama	91.9	92.1	92.0	45.2	50.6	47.9
South West Ethiopia	75.9	64.4	70.1	32.5	30.1	31.3
Central Ethiopia	99.9	90.9	95.4	61.6	59.8	60.7
National	105.7	96.4	101.1	40.7	39.9	40.3

Chart 3.8 Comparison of NER for Primary and Middle Level Education by Region, 2024/25

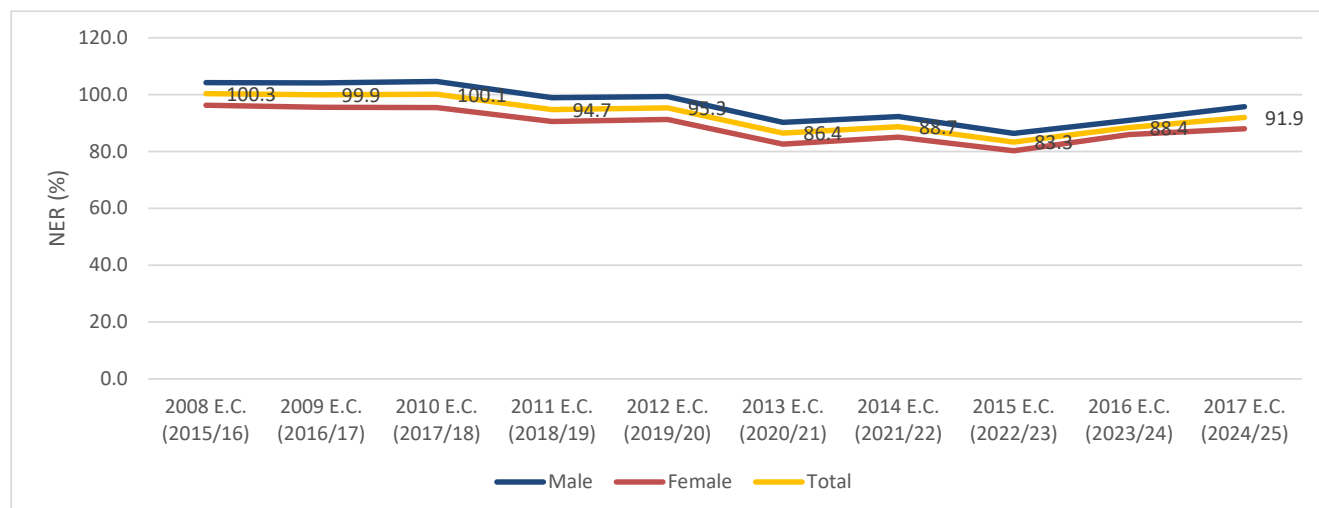

On the other hand, the national NER for Primary and Middle level (Grades 1-8) is in a good track, with 91.9%.

Oromia, Harari and Addis Ababa are in an unacceptable range performing NER value beyond 100%.

Table 3.7 Net Enrollment and NER by Region and Sex for Grades 1-8, 2024/25

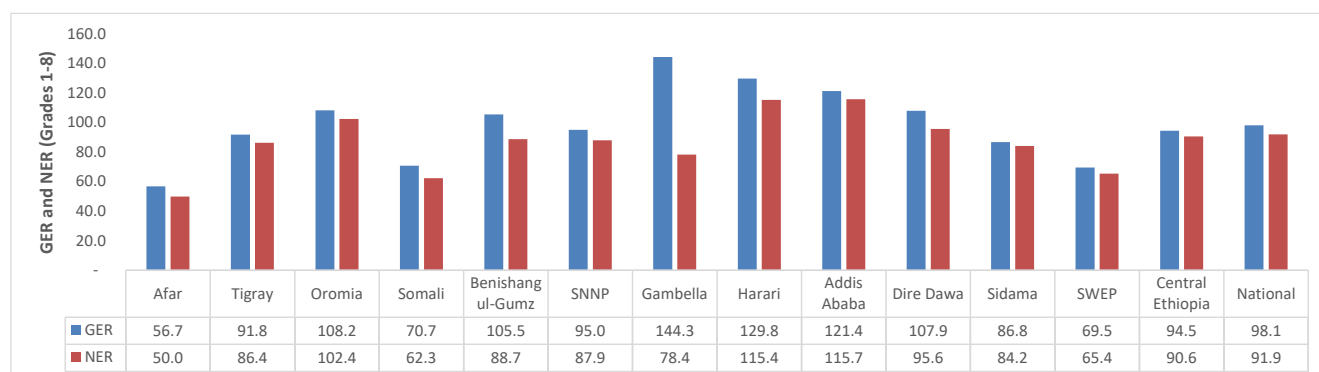

Region	School Age Population (7-14)			Net Enrolment (G1-8)			NER %		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Afar	187,741	177,833	365,575	100,684	81,942	182,626	53.6	46.1	50.0
Tigray	532,421	516,962	1,049,383	454,402	451,811	906,213	85.3	87.4	86.4
Oromia	4,182,892	4,084,389	8,267,281	4,475,224	3,993,605	8,468,829	107.0	97.8	102.4
Somali	705,409	691,217	1,396,626	491,215	379,086	870,301	69.6	54.8	62.3

South Ethiopia	742,850	747,893	1,490,743	677,862	632,744	1,310,606	91.3	84.6	87.9
Gambella	45,662	44,771	90,433	37,846	33,029	70,875	82.9	73.8	78.4
Harari	22,880	22,197	45,077	27,748	24,255	52,003	121.3	109.3	115.4
Addis Ababa	280,243	286,481	566,724	326,641	329,252	655,893	116.6	114.9	115.7
Dire Dawa	40,784	39,988	80,772	40,498	36,724	77,222	99.3	91.8	95.6
Sidama	562,332	546,367	1,108,699	468,765	464,506	933,271	83.4	85.0	84.2
South West Ethiopia	399,982	400,499	800,481	282,930	240,865	523,795	70.7	60.1	65.4
Central Ethiopia	588,276	602,663	1,190,939	555,089	523,426	1,078,515	94.4	86.9	90.6
National	8,414,433	8,280,359	16,694,791	8,055,986	7,288,886	15,344,872	95.7	88.0	91.9

The long-term trend in NER shows a steady increase until 2015/16, then after the figures decline with values below 100% in each year, with the exception of a couple of years.

Chart 3.9 NER Trend for Grades 1-8, 2015/16 – 2024/25

Comparison between GER and NER further highlights the issue of children enrolling in Primary and Middle schools (Grades 1-8) at the age above and below the official age range.

The comparison of GER and NER in Chart 3.10 nationally shows a difference of 6.2 percentage points.

Chart 3.10 Comparisons between GER and NER for Grades 1-8 by Region, 2024/25

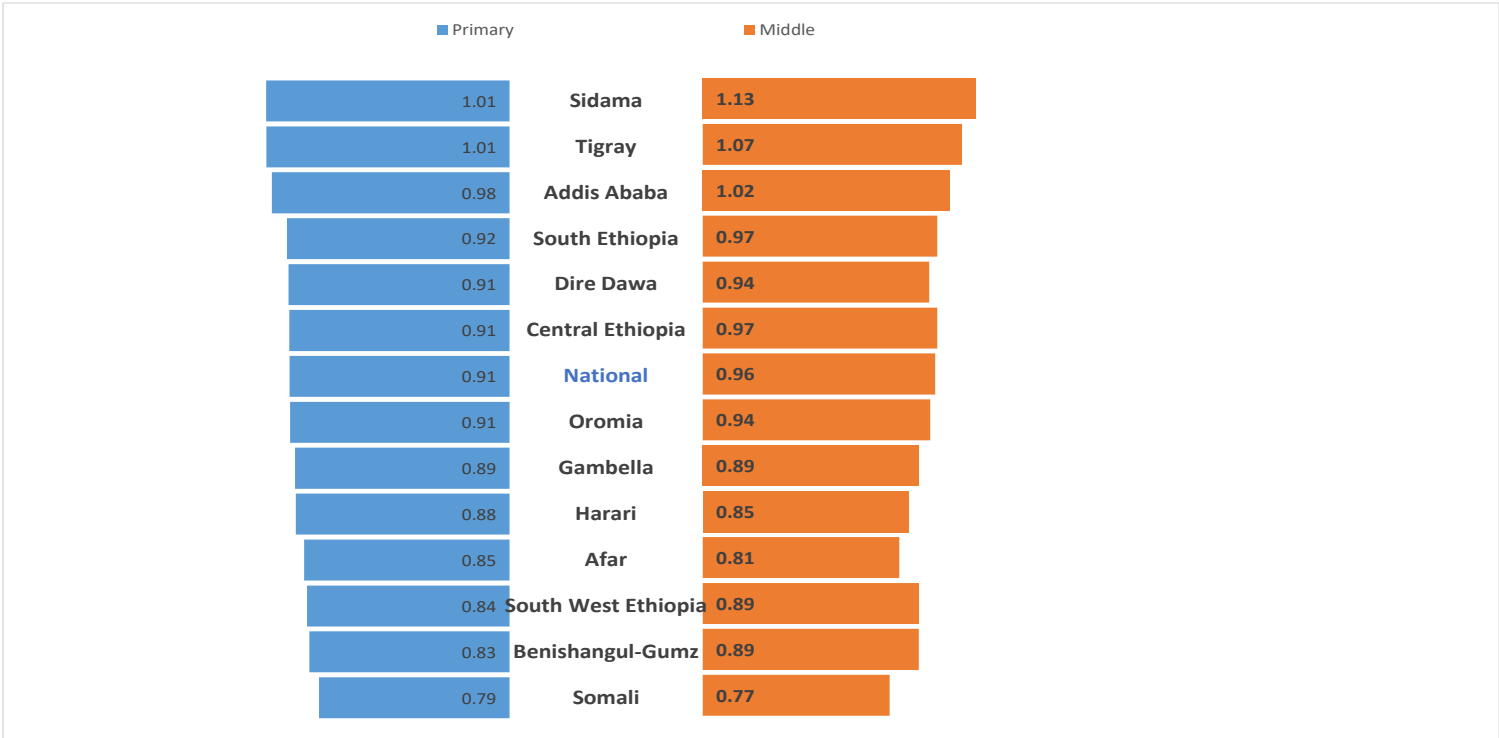

3.5 Gender Parity Index

ESDP V Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
GPI in Primary (index)	0.91	0.96	0.91
GPI in Middle (index)	0.97	1.00	0.96

Gender Parity Index (GPI) is an important indicator for a balanced programs to boost enrolment and participation of girls in education. In a situation of seamless equity in enrolment, the Gender Parity Index (GPI) is 1, whereas with highest disparity, it is closer to 0.

Chart 3.11 presents the regional and national comparison of GPI between the two levels.

Chart 3.11 Gender Parity Index by Region, 2024/25

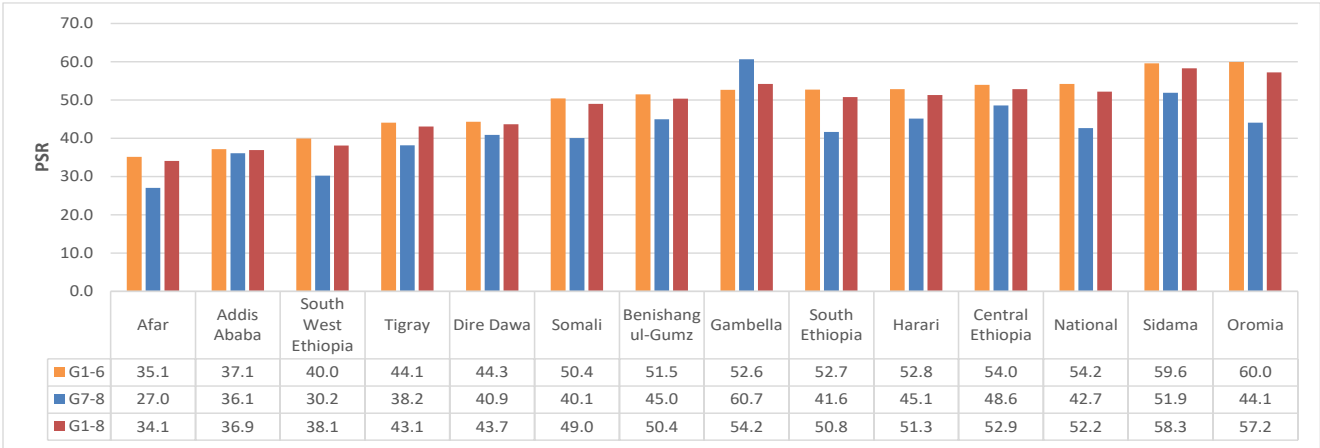

3.6 Pupil Section Ratio (PSR) in Primary and Middle Level Education

In Ethiopia there may be more than one section in one grade; Each section can be considered as a classroom for a given grade; however, the same classroom may be used for two or more different sections in shifting systems. Hence, the number of sections in the school can be used as a proxy indicator to calculate the pupil classroom ratio.

PSR is higher in Primary compared to Middle school at national level, with 54.2 and 42.7 respectively.

As illustrated in Chart 3.12, most of the regions are above the national pupil to section ratio standard of 50 in primary level. These findings underscore the critical need for targeted interventions to increase classroom construction in regions falling short of the national standard.

Chart 3.12 Pupil Section Ratios (PSR) by Region and Level, 2024/25

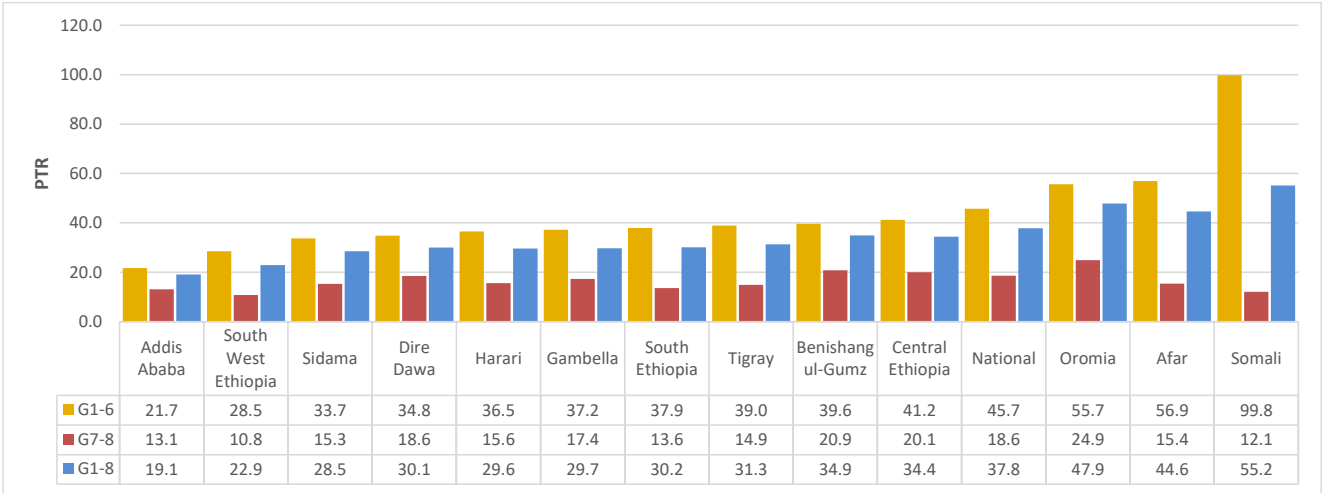

3.7 Pupil Teacher Ratio in Primary and Middle Level Education

Pupil-Teacher Ratio (PTR) is commonly used to measure efficiency and quality in the education system.

This indicator is useful for setting minimum standards and ensuring a certain level of equality throughout the country. In Ethiopia, the standard set for PTR is 50 at Primary and Middle level and 40 at Secondary level.

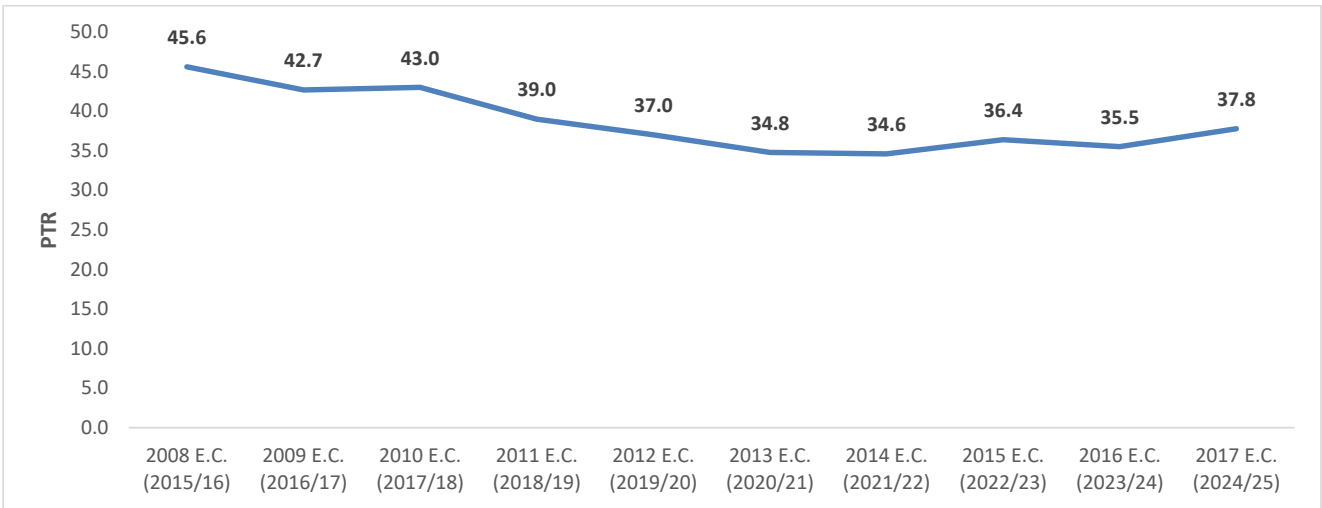

All regions achieved a PTR of below 50 at Primary and Middle level (Grades 1-8), with the exception of Somali.

Chart 3.13 Pupil Teacher Ratio (PTR) by Region and Level, 2024/25

PTR trends over time for Grades 1-8 have been improved and lowered from 45.6 in 2015/16 E.C. to 37.8 this year at national level.

Chart 3.14 PTR Trend for Grades 1-8, 2015/16-2024/25

3.8 Repetition and Dropout Rates

ESDP VI Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
Grade 1 dropout rate Female	25	15	22.0
Grade 1 dropout rate Male	25	15	22.8
Grade 1-6 dropout rate Female	18	12	18.6
Grade 1-6 dropout rate Male	17	11	19.7
Grade 7-8 dropout rate Female	12	7	26.4
Grade 7-8 dropout rate Male	12	7	27.1
Grade 1-6 repetition rate Female	6	1	3.6
Grade 1-6 repetition rate Male	6	1	3.6
Grade 7-8 repetition rate Female	5	1	8.2
Grade 7-8 repetition rate Male	5	1	7.3

Data concerning repeaters and dropout refer to one year previous to the year in which the data is collected, i.e., in 2024/25 we collect information about students who repeated the grade they attended in 2023/24, and therefore they are “repeaters of 2023/24”. This explains why data concerning repetition and dropout rate are available one year back from the publication year.

3.8.1 Repetition Rate

In this year, the ESDP VI target on repetition has been missed in both sexes for both levels.

The repetition rate nationally for Grades 1-8 is 4.3%, with a 0.1 percentage points decrease from last year. The rate is better in this year for Middle level, with a national average of 7.8%, while the value is 3.6% in Primary level.

3.8.2 Dropout Rate

It should be known that, students may not often completely dropout from schooling, but rather they may join education several years later, or seek out alternative education.

This year, the dropout rate for Grades 1-8 nationally is 20.5. The chart below shows the rate by region.

Chart 3.15 Dropout Rates for Grades 1-8 by Region, 2023/24

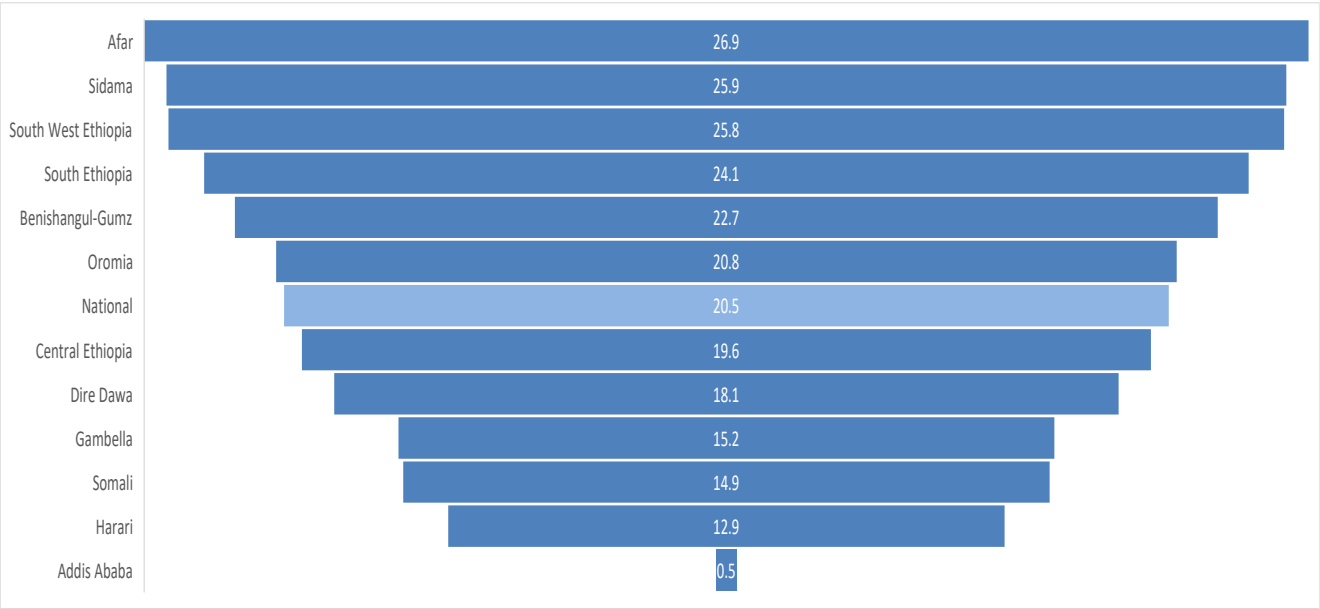

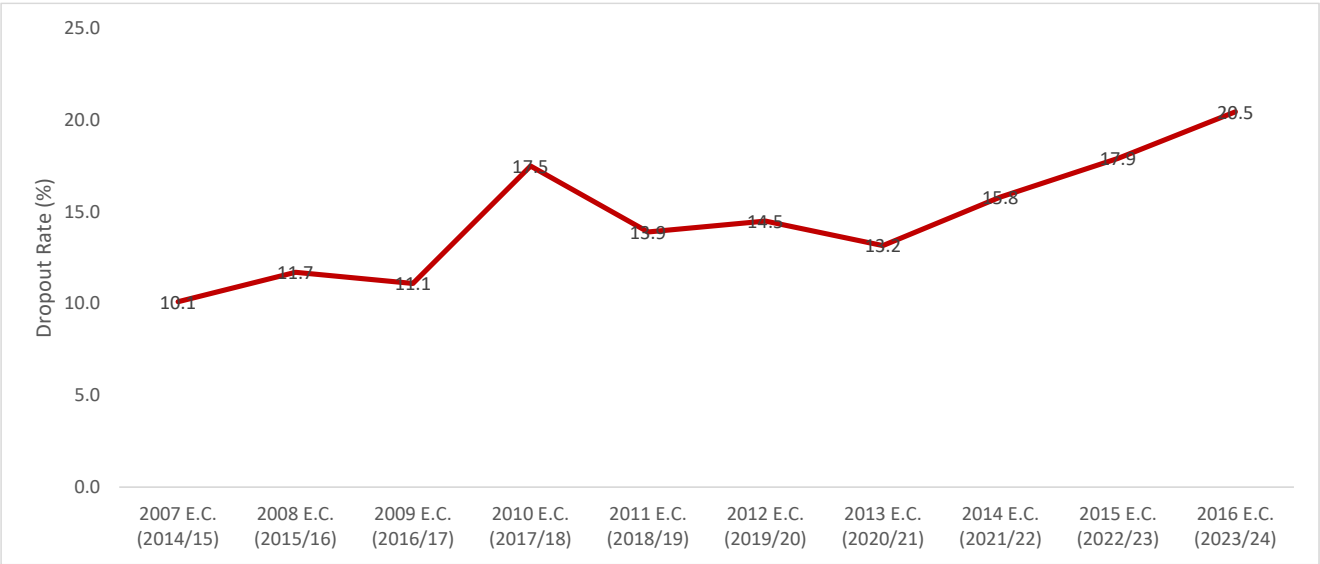

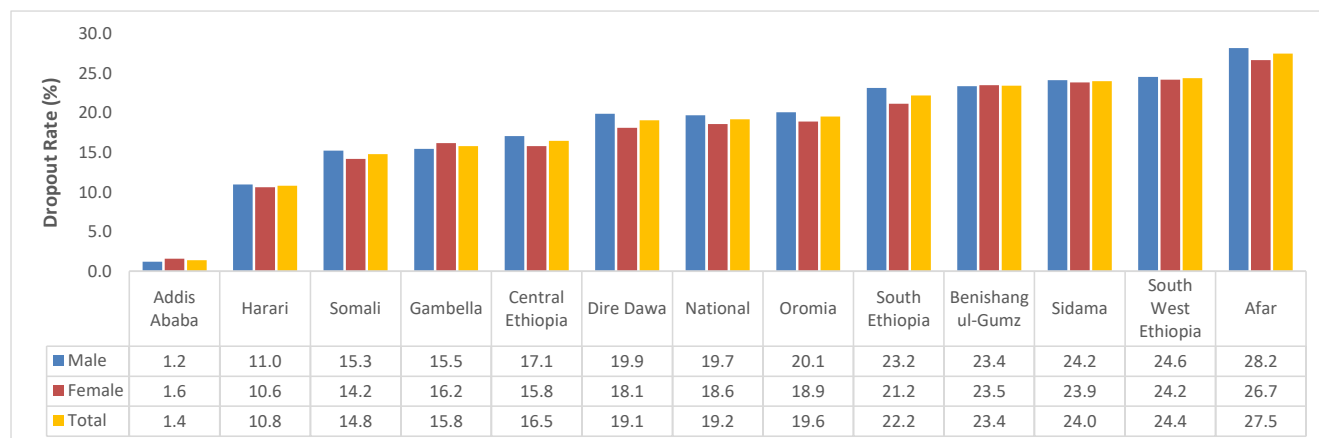

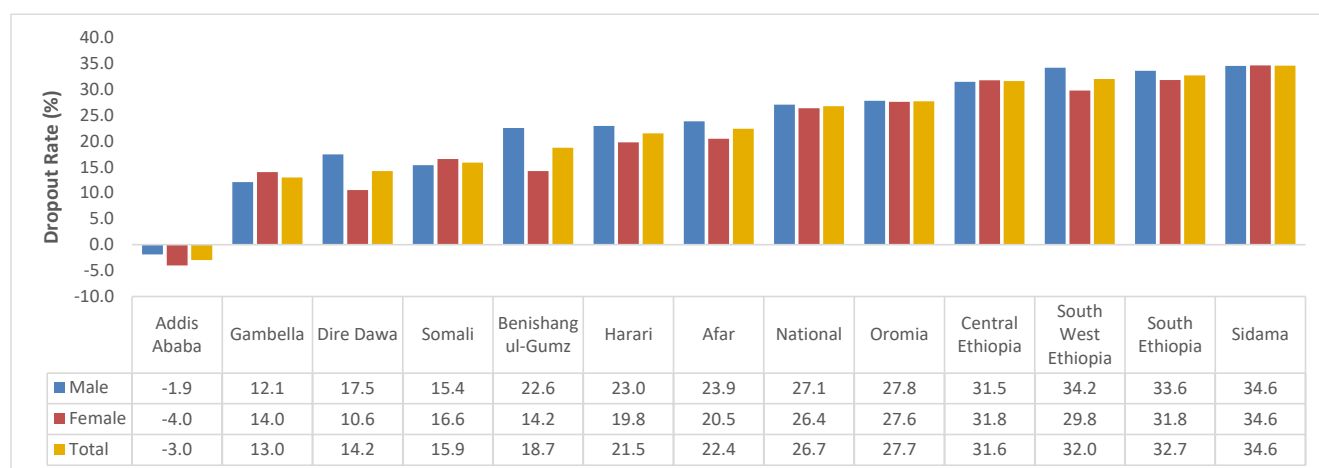

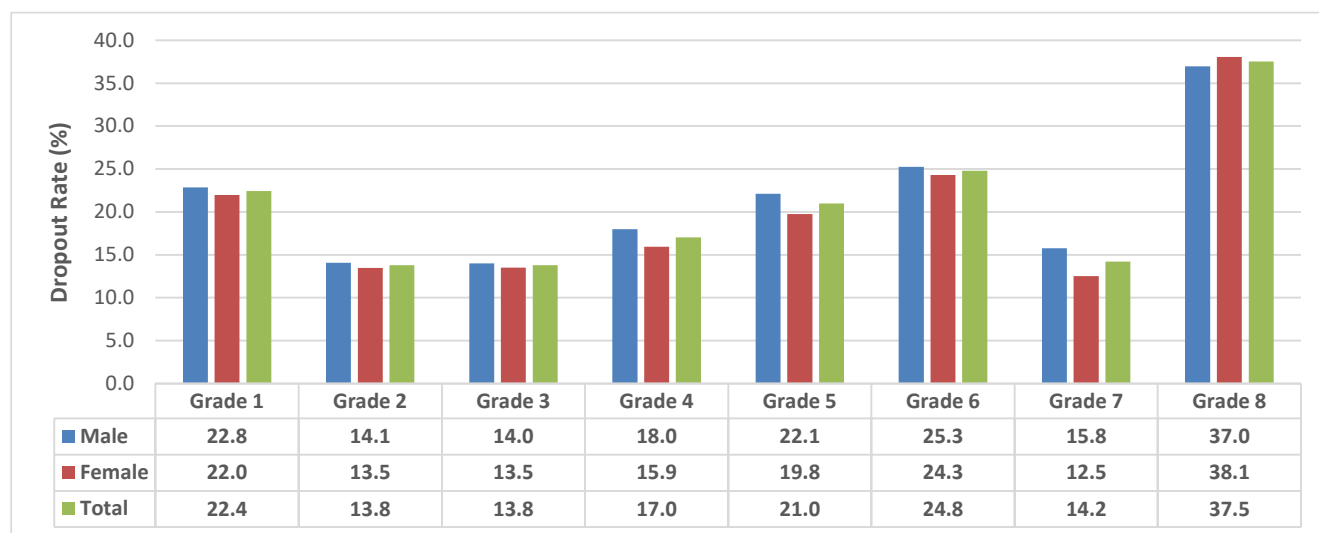

Chart 3.16 Trends in Dropout Rates for Grades 1-8 Nationally, 2014/15 – 2023/24

At national level, dropout rate is 19.2% in Primary and 26.7% in Middle levels. The overall dropout rate for Primary and Middle (Grades 1-8) is 20.5%. Below are the dropout rates by region for Primary and Middle levels separately.

Chart 3.17 Dropout Rates for Primary Level by Region and Sex, 2023/24**Chart 3.18 Dropout Rates for Middle Level by Region and Sex, 2023/24**

Furthermore, Dropout by grade level nationally is given below; the highest rate shows at grade 8, similar to that of last year.

Chart 3.19 Dropout Rate by Grade and Sex Nationally, 2023/24

3.9 Survival Rate to Grade 7

ESDP VI Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
Survival rate to Grade 7 Female	31	50	27.7
Survival rate to Grade 7 Male	29	50	25.2

The reliability of this indicator depends on the consistency of data on enrolment and repeaters/re-admitted in terms of coverage overtime and across grades.

A “Reconstructed Cohort Method” is applied to calculate this rate by assuming a group of pupils, typically 1,000, who are enrolled together at Grade 1 and proceed to the 7th grade, sometimes with repetition/readmission up to two times, and sometimes without.

The survival rates for Grade 7 in this year is 26.3%, and this value is significantly decreased from last year.

The table below shows the national student flow rate result generated based on enrollment and repeaters’ data of two consecutive years; 2023/24 and 2024/25.

Table 3.8 National Student Flow Rates by Grade and Sex, 2023/24

	Grade 1	Grade 2	Grade 3	Grade 4	Grade 5	Grade 6	Grade 7	Grade 8
Male								
Promotion Rate	0.73	0.82	0.82	0.78	0.74	0.67	0.80	0.52
Repetition Rate	0.04	0.04	0.04	0.04	0.04	0.07	0.04	0.11
Dropout Rate	0.23	0.14	0.14	0.18	0.22	0.25	0.16	0.37
Female								
Promotion Rate	0.74	0.83	0.83	0.80	0.76	0.68	0.83	0.50
Repetition Rate	0.04	0.04	0.03	0.04	0.04	0.08	0.04	0.12
Dropout Rate	0.22	0.13	0.14	0.16	0.20	0.24	0.13	0.38
Total								
Promotion Rate	0.74	0.82	0.83	0.79	0.75	0.68	0.82	0.51
Repetition Rate	0.04	0.04	0.03	0.04	0.04	0.08	0.04	0.11
Dropout Rate	0.22	0.14	0.14	0.17	0.21	0.25	0.14	0.38

Chart 3.20 shows the reconstructed cohort analysis generated based on the student flow rate shown in the above table.

According to the cohort, 84 pupils, who started schooling eight years before, graduate without repeating any one grade during their stay in school.

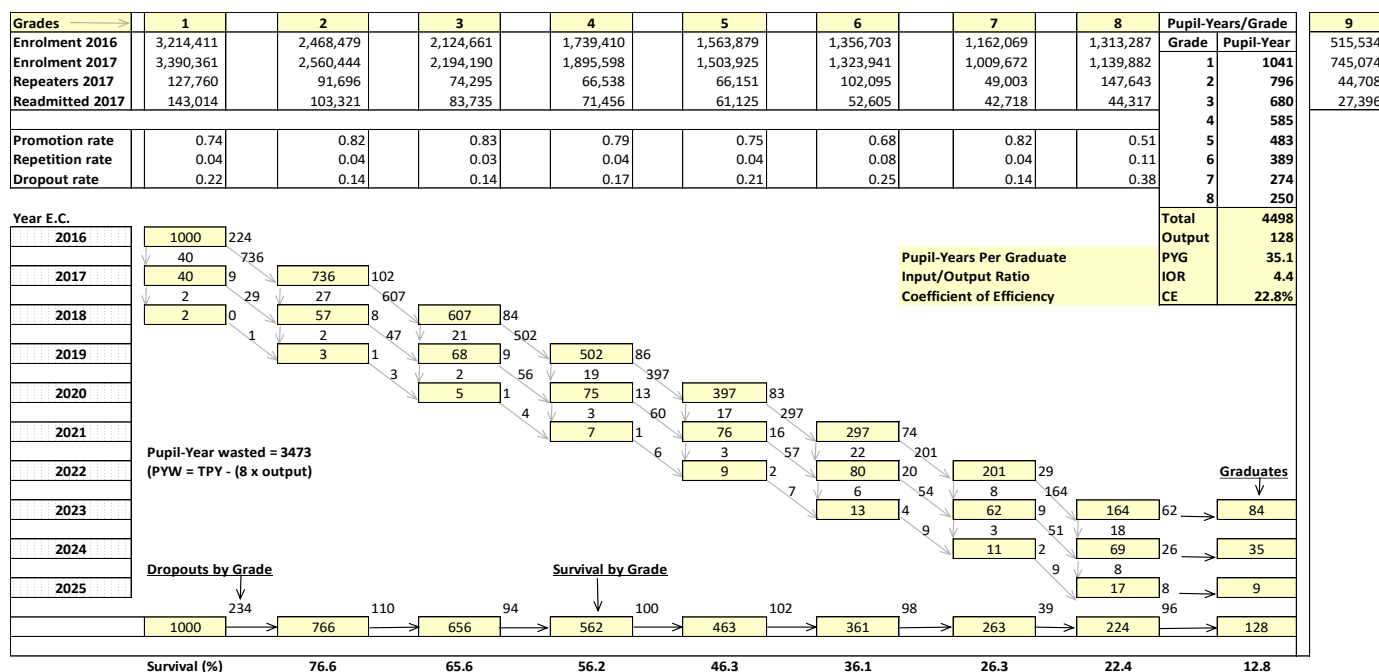

Chart 3.20 Reconstructed Cohort Analysis for Total (Male + Female), 2023/24

Chart 3.20 is the result from the reconstructed cohort analysis which shows the number of pupils who eventually graduate from the final grade of Primary and Middle school, i.e., Grade 8, and promoted to the next higher grade; i.e., Grade 9. The focus for this particular cohort, however, is those promoted to Middle level, i.e., survival to grade 7. Hence, from a 1,000 cohort of pupils, 263 of them (26.3%) are able to survive to Grade 7.

According to the cohort, 84 pupils who started schooling eight years before graduate without repeating any one grade during their stay in school, whereas another 35 pupils graduated after repeating once, and 9 pupils graduated after repeating twice during their stay at Primary and Middle school. The total number of graduates for the cohort is 128; In other words, about 12.8% of pupils who started schooling eight years ago were eventually able to complete the Primary and Middle level education and eligible to continue the next level.

The table below shows survival rates by grade disaggregated by gender nationally.

Table 3.9 Survival Rates by Grade and Sex, 2023/24

Sex	Grades							Graduates (%)
	2	3	4	5	6	7	8	
Male	76.2	65.0	55.6	45.2	34.7	25.2	21.0	12.2
Female	77.1	66.3	57.0	47.5	37.7	27.7	24.0	13.5
Total	76.6	65.6	56.2	46.3	36.1	26.3	22.4	12.8

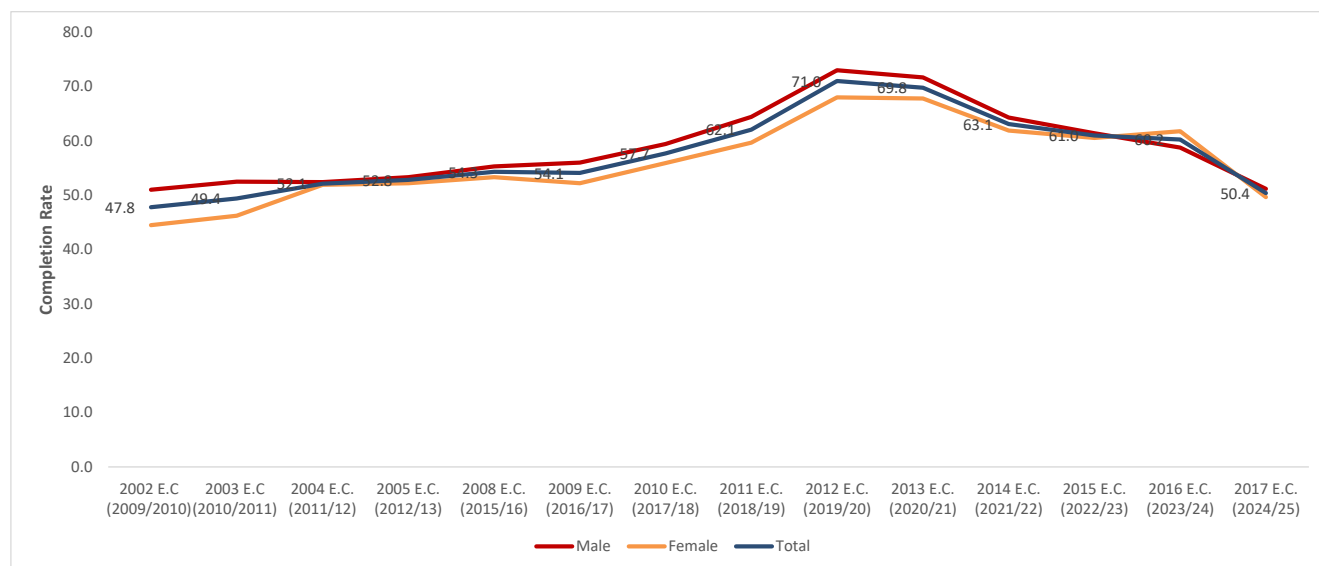

3.10 Completion Rates

ESDP VI Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
Completion rate to Grade 6 Female	79	90	57.6
Completion rate to Grade 6 Male	86	93	61.4
Completion rate to Grade 8 Female	60	75	49.6
Completion rate to Grade 8 Male	64	77	51.2

Completion rate is highly dependent on the accuracy of the single age population for both points of measurement (for grade 6, age 12, and for grade 8, age 14) and the accurate measurement of repeaters in each grade.

Completion rates are higher in Grade 6 than in Grade 8, similar to last year.

Chart 3.21 Trends in Grade 8 Completion Rates, 2015/16-2024/25

Since Grade 6 completion rate is one of the new indicators in the current ESDP VI, it could not be possible to show its long-term trend, however the rate has been given in Table 3.10 below region wise.

Table 3.10 Grade 6 Completion Rate by Region and Sex, 2024/25

Region	Population (Age 12)			New Entrants to Grade 6			Completion Rate (Grade 6)		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Afar	23,333	22,087	45,420	6,623	5,417	12,040	28.4	24.5	26.5
Oromia	513,825	502,522	1,016,347	336,871	305,552	642,423	65.6	60.8	63.2
Somali	86,131	84,527	170,658	32,028	25,396	57,424	37.2	30.0	33.6
Benishangul-Gumz	15,131	14,697	29,828	10,214	8,561	18,775	67.5	58.2	62.9
South Ethiopia	104,367	105,388	209,755	62,747	61,812	124,559	60.1	58.7	59.4
Gambella	5,636	5,530	11,166	5,368	4,766	10,134	95.2	86.2	90.8
Harari	2,841	2,766	5,607	2,827	2,339	5,166	99.5	84.6	92.1
Addis Ababa	33,615	34,657	68,272	35,755	37,538	73,293	106.4	108.3	107.4
Dire Dawa	4,986	4,919	9,905	3,852	3,387	7,239	77.3	68.9	73.1
Sidama	66,070	64,410	130,480	34,377	36,584	70,961	52.0	56.8	54.4
South West Ethiopia	46,448	46,660	93,108	23,169	20,407	43,576	49.9	43.7	46.8
Central Ethiopia	85,517	87,898	173,415	52,863	50,788	103,651	61.8	57.8	59.8
National	987,900	976,061	1,963,961	606,694	562,547	1,169,241	61.4	57.6	59.5

3.11 Number of Schools and Clusters

The total number of Primary and Middle level schools (schools with Grades 1-8 or less) for this year are 30,522, without Amhara region. 89.2% of the schools are government owned.

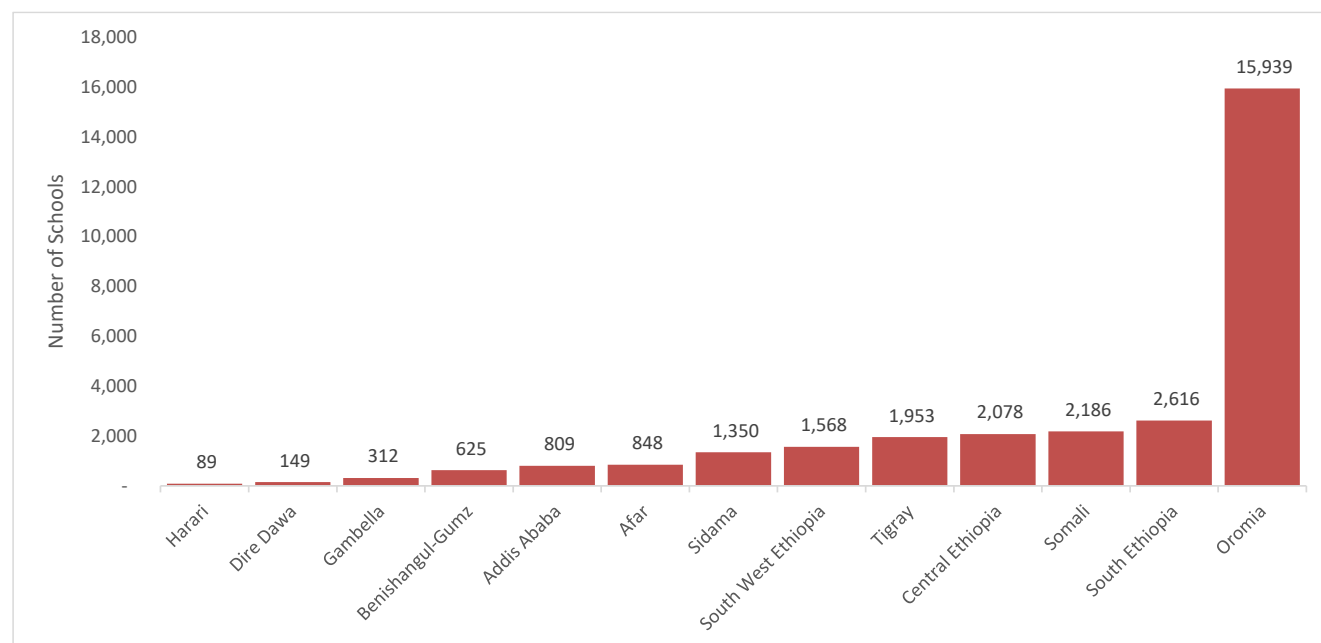

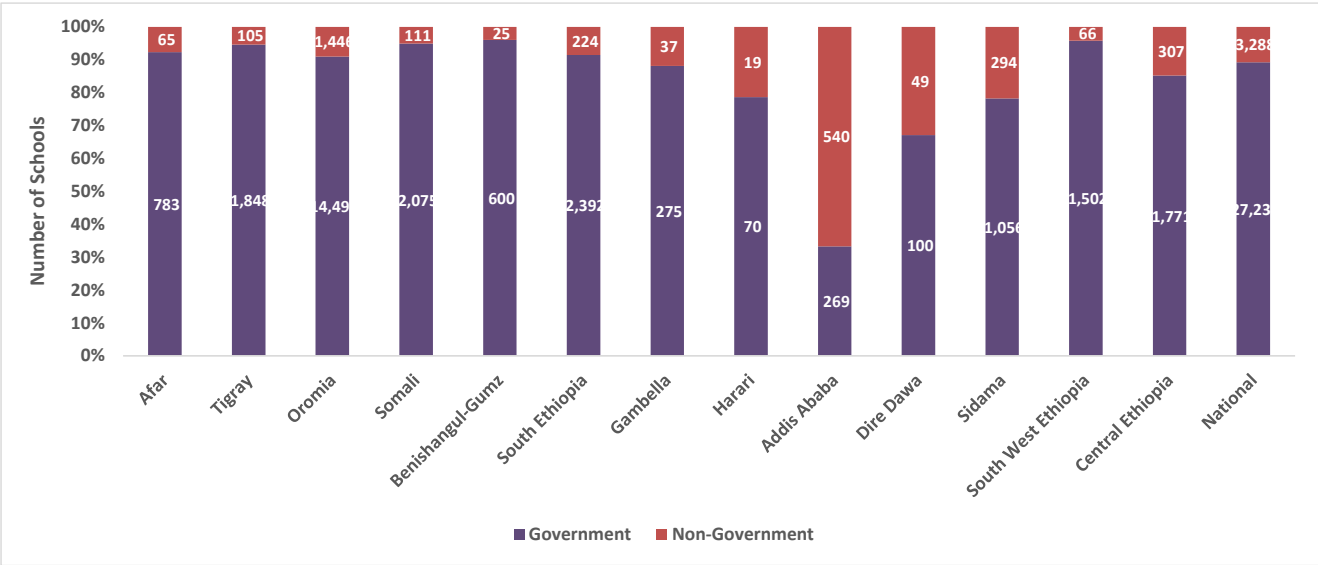

Chart 3.22 Number of Primary and Middle Schools (Grades 1-8) by Region, 2024/25

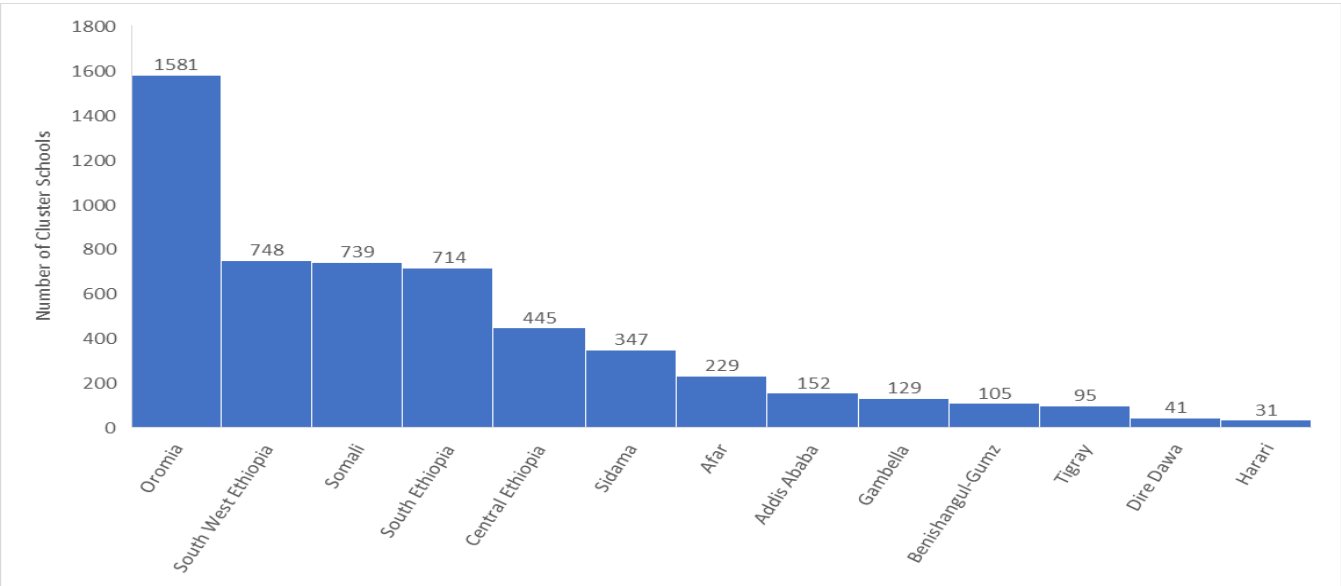

Chart 3.23 Number of Primary and Middle Schools by Region and Ownership, 2024/25

Schools are usually grouped into clusters of 5 or more in woredas for better coordination and sharing of resources.

Cluster schools play an important role by allowing neighboring schools to share facilities. In 2024/25, there are 5,356 cluster schools in the country.

Chart 3.24 Number of Cluster Schools by Region, 2024/25¹

¹ The value for Tigray is of 2012 E.C.

3.12 Textbooks

According to the Federal Democratic Republic of Ethiopia Ministry of Education General Education Laws, Proclamation No. 1368/2025, the responsibility for developing, printing, and distributing student textbooks and teacher guides for pre-primary, primary, and middle school levels has been assigned to the Regional Education Bureaus (REBs). Following the full-scale implementation of the new curriculum in 2015 E.C., REBs started the production and distribution of these instructional materials. While the Ministry of Education maintains an oversight role to guarantee that the materials align with national policy directives, curriculum frameworks, and Minimum Learning Competency (MLC) standards. As indicated in the above table, significant variations exist in the availability of textbooks across grade levels and subject areas, highlighting the need for ministerial support and intervention to address persistent shortages and ensure equitable access. The table below shows the student text book distribution in Primary schools::

Table 3.11 Student Textbook distribution in Primary schools by Region and Subject, 2024/25

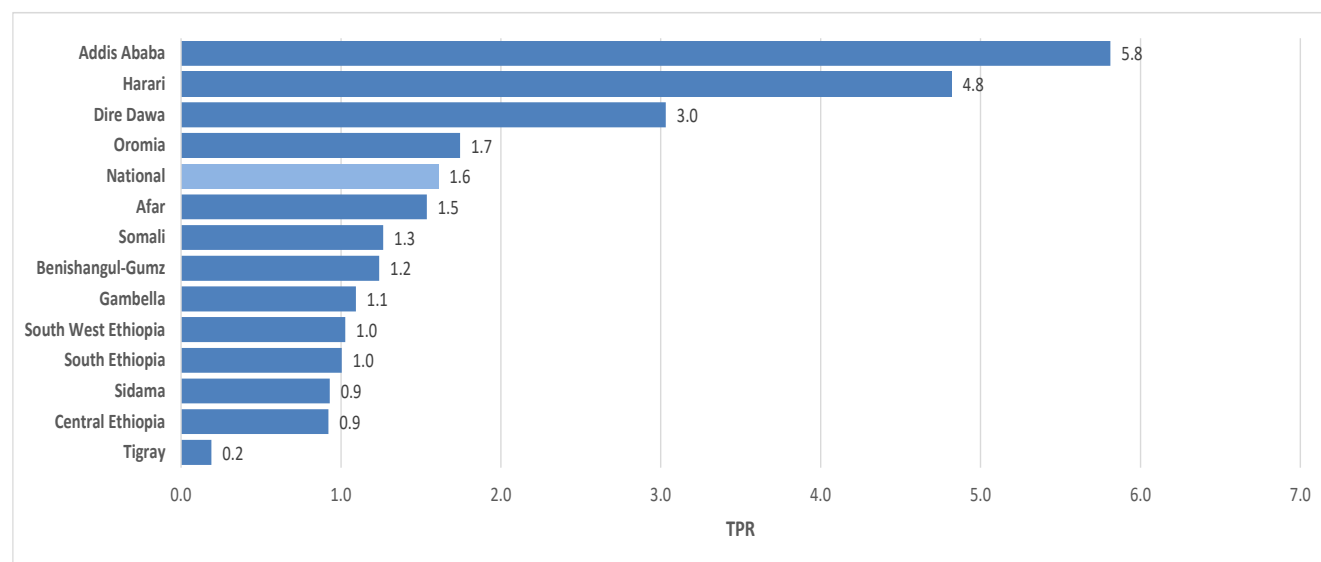

Region	Performance and Visual Arts	Integrated Science	Civic and Ethical Education	English	Environmental science	Esthetics	Federal Language	Local language 1	Local language 2	Mathematics	Physical education	Social Studies	Others	Total

Central Ethiopia	45,851	28,590	4,589	52,430	146,724	80,289	64,611	121,517	4,684	149,893	50,865	2,228	3,799	756,070
National	1,659,035	732,885	49,551	2,418,677	3,126,101	1,679,028	651,614	3,567,329	708,432	3,402,354	1,806,018	80,748	530,871	20,412,643

Similar to the primary level, the above table indicates, there is a notable disparity that has also been observed across grade levels and subject areas in middle schools. These inconsistencies reflect gaps in both the quantity and timely distribution of textbooks, which may undermine the objectives of the new curriculum and hinder equitable access to quality learning. Addressing these challenges requires close monitoring, systematic follow-up, and targeted support. In this regard, the Ministry of Education, in collaboration with the Regional Education Bureaus (REBs), is expected to play a proactive role in identifying shortages, standardizing distribution mechanisms, and ensuring that all students receive the required textbooks in line with national curriculum standards and Minimum Learning Competency (MLC) benchmarks. Such coordinated interventions are critical to achieving equity, quality, and efficiency in the implementation of the revised curriculum. As indicated in the table below, 5,303,911 student textbooks are distributed for Middle level schools nationally.

Table 3.12 Student Textbook distribution in Middle schools by Region and Subject, 2024/25

Region	Arts	Civic and Ethical Education	English	Esthetics	Federal Language	Local language 1	Local language 2	Mathematics	Physical education	Social science	Others	Total

South West Ethiopia	4,046	5,760	15,005	479	8,337	8,481	249	11,708	5,862	10,763	11,379	82,069
Central Ethiopia	17,351	25,820	27,746	2,002	25,084	44,867	1,613	29,864	20,798	28,217	56,308	279,670
National	531,304	260,448	694,444	34,345	224,389	758,153	447,885	701,790	575,840	542,463	532,850	5,303,911

Nationally, students have access to around two textbooks each in Grades 1-8. Only four regions have better access than the national average.

Chart 3.25 Textbook to Pupil Ratios for Primary and Middle Schools by Region, 2024/25

To make the ratio more meaningful, it will be good to see TPR of common subjects taken by all students, such as English and Mathematics. Below are the Textbook to Pupil Ratios for English and Mathematics in Primary and Middle schools.

Table 3.13 Textbook to Pupil Ratios for Primary and Middle Schools by Region, 2024/25

Region	Primary		Middle	
	English	Mathematics	English	Mathematics
Afar	0.3	0.3	0.4	0.3
Tigray	0.0	0.0	0.0	0.0
Oromia	0.2	0.3	0.4	0.4
Somali	0.1	0.2	0.2	0.2
Benishangul-Gumz	0.5	0.1	0.6	0.3
South Ethiopia	0.1	0.1	0.2	0.2
Gambella	0.2	0.3	0.2	0.2
Harari	0.8	0.8	0.9	0.9
Addis Ababa	0.7	0.7	0.8	0.7
Dire Dawa	0.5	0.5	0.6	0.6
Sidama	0.1	0.2	0.1	0.2
South West Ethiopia	0.1	0.2	0.2	0.1
Central Ethiopia	0.1	0.2	0.1	0.1
National	0.2	0.2	0.3	0.3

The ratio reveals that the national TPR is 0.2 for Primary in both subjects (which is to mean that 1 book for 5 students) and 0.3 for Middle school students, which means 3 books for 10 students.

3.13 School Facilities

3.13.1 Electricity and Multimedia

Nationally, only 31.8% (9,712 out of 30,524) of primary and middle schools have access to electricity. However, this access varies significantly across different regions. Among the schools with electricity, hydropower is the dominant source, used by approximately 86.7% (8,417 schools), followed by solar power, with 9.2%.

In terms of communication tools, radios broadcasting services are available in 69.3% of the respondent schools.

Table 3.14 Electricity and Access to Radio for Primary and Middle Schools by Region, 2024/25

Region	Availability of Electricity		Source of Electricity (If "Yes")						Radio Broadcast	
	Number of Respondent Schools	Schools with Electricity	Biogas	Generator	Hydroelectric	Solar	Other	Not Answered	Availability (Number of Schools)	Functional Radios (Number)

National	30,524	9,712	7	121	8,417	889	69	209	21,167	9,357

3.13.2 Library, Laboratory and Pedagogical Centers

Other school facility indicators include access to libraries, laboratories, and pedagogical centers. Nationally, 39.8% of schools have functional libraries. In contrast, only 10.3% of the schools reported to have functional laboratory, indicating limited access to practical science learning environments. Meanwhile, 50% of schools have functional pedagogical center, which supports teaching and learning activities.

The table below provides a detailed regional breakdown of these facilities.

Table 3.15 Library, Laboratory and Pedagogical Center by Region, 2024/25

Region	Availability of Library			Laboratory		Pedagogical Center	
	Number of Respondent Schools	Availability (Number of schools)	Schools with Functional Library	Availability (Number of Schools)	Functional Laboratory (Number of Schools)	Availability (Number of Schools)	Functional Peda Center (Number of Schools)
Afar	849	80	45	52	17	73	47
Tigray	1,953	505	295	203	68	453	287

Central Ethiopia	2,078	1,251	1,029	612	457	1,150	906
National	30,524	13,667	12,157	4,630	3,155	14,310	12,507

3.13.3 WASH Facilities

Based on the data collected from 27,645 schools nationwide, access to functional drinking water remains a critical concern. Only 35.5% of schools reported having access to a functional water supply system.

From the schools with access to drinking water, Pipeline water is the most common source, serving 28.9% of the respondent schools. This is followed by protected wells or springs, which provide water to a smaller yet significant portion. Contained rainwater systems also contribute to the supply, particularly in regions where piped infrastructure is limited.

Despite these efforts, a substantial number of schools, 764, reported to have other sources of water not in the list.

Table 3.16 Water Access in Primary and Middle Schools by Region, 2024/25

Region	Availability of Water			Water Supply Type							Accessible to-	
	Number of Respondent Schools	Schools With Water Supply	Schools With Water Supply Functional	Contained rain water	Pipeline water	Protected well/spring	Unprotected well/spring	Surface water	Tanker truck/cart	Undefined	Children with Special Needs (Number of Schools)	Young Children (Number of Schools)
Afar	289	139	96	5	109	4		4	7	10	79	88

On the other hand, out of the total number of Primary and Middle level schools responding to the toilet items of the questionnaire, majority of them (98.6%) confirmed the presence of functional toilets, indicating substantial progress in basic sanitation infrastructure. However, when examining the quality of these facilities, only 42.6% of the functional toilets were classified as “Improved”, suggesting that while access is widespread, enhancements in hygiene standards and structural quality remain a critical area for development.

Similarly, 68.2% of schools reported having functional teachers’ toilets, highlighting a moderate level of attention to staff sanitation needs.

Table 3.17 Toilet Facilities in Primary and Middle Schools by Region, 2024/25

Region	Student Toilet					Toilet Types		Improved Toilet Types					Handwash		Teachers' Toilet	
	Number of Resppondent Schools	Schools with Functional Toilets	Schools with Separate Boys and Girls Toilet	Accessible to Young Children	Accessible to Children with Special Needs	Improved	Traditional	Cemented Toilets	Composite Toilets	Not cemented Toilets	Pour flush Toilets	Other	Fuunctionality (Number of Schools)	With Water and Soap (Number of Schools)	Schools with Functional Teachers Toilets	Schools with Separate Male and Female Toilet

3.13.4 School Feeding

School Feeding Program (SFP) has been officially launched in Ethiopia in 1994 with an initial pilot project covering 40 schools in Tigray, Amhara, Afar and Oromia regions. It was implemented as an important safety net for expanding children's access to education and to ensure equity of Primary and Middle school children (Grades 1 to 8) in food insecure districts. Currently, Ethiopia is implementing a large-scale national school feeding program targeting all regions of the country. The program targets the government's Pre-Primary and Primary schools

School feeding program is one of the growing national priorities in the country. As a result, Ethiopia has heavily invested in home-grown school feeding as a social safety nets, education, nutrition and health and local agriculture strategic intervention. These investments have contributed to significant progress in economic and social development, reductions in poverty and malnutrition, increased school enrolments and attendance of school children.

In the year 2024-25, Ethiopia has invested about 17 billion ETB (127 USD\$) on national school feeding program. Over 90% of the national school feeding investment comes from the government and community while the remaining is financed by development partners and private sectors. Development partners support in the national school feeding program is substantial. Partners like WFP is active in operation and technical assistance in the Ethiopian school feeding program over the years. In 2024/2025, WFP has provided nutritious and diversified school meals (through HGSF and In-kind model) to 402,459 school children in 1,180 schools located in Afar, Oromia, Southern Ethiopia, Amhara and Tigray regions.

In a nutshell, a total of 8 million pre-primary, primary and middle level students have been reached by the national school meal program in the year 2024-25. All regions and city administrations in the country are currently implementing school feeding program, although there are regional disparities in terms of coverage and budget dedication.

Table 3.18 School Feeding Beneficiaries by Region, 2024/25²

Region	Number of Beneficiary Schools	Number of Beneficiary Children			Budget Contribution (ETB)			
		Male	Female	Total	Government	Community	Development Partners	Total

3.14 School Inspection at Primary and Middle Level

The National General Education Inspection Framework (MoE, 2013) mandates school inspectors at regional, Zonal, and Woreda levels to conduct inspections of Primary, Middle and Secondary schools. The inspections aim to evaluate a school's performance and are conducted at least once every three years. Level 1 schools have the lowest scores and require significant improvement; Level 2 schools are under progress while Level 3 and Level 4 schools meet most of the standards. In the fourth-round (2017 E.C.), 5,308 Primary and Middle schools were inspected nationally and the result is shown in the table below.

The 2017 inspection of Primary and Middle schools shows a mixed but polarized picture; 16.0% of schools are below the standard, 66.4% are under progress, 17.7% have met the standard, and one school (0.02%) achieved Level 4 excellence.

Table 3.18 Fourth round (2017 E.C.) Primary and Middle School Inspection scores across Regions by Level³

Region	Number of Schools Inspected	Level-1		Level-2		Level-3		Level-4		Level-3 and Above	
		No.	(%)	No.	(%)	No.	(%)	No.	(%)	No.	(%)

³ The data in this table is provided by the General Education Inspection Desk of MoE

4. SECONDARY LEVEL EDUCATION

Secondary education in Ethiopia covers from Grade 9 to 12. The official secondary school age is from 15 to 18 years old.

Grades 9 and 10 are the level in which General Courses will be given to all students. Starting from Grade 11, students are able to choose either Natural or Social Science Stream for their future learning.

Students take a national exam (Ethiopian General Secondary Education Examination Certificate) at Grade 12, which certifies completion of secondary general education, and students who qualify for university level of education will be selected.

Secondary school enrolment has expanded rapidly in the past 20+ years; and enrollment has increased with an average annual growth rate of 7.5% in the last five years.

This level of education is quite pivotal in ensuring the continuity and sustainability of all government efforts and hence the government continues to implement different strategies to address the numerous challenges associated with provision of quality and inclusive education, since the level is the entry point to higher education and for future career.

This section presents various indicators of secondary level education with respect to the ESDP VI targets.

4.1 Gross Enrolment Ratio (GER) in Secondary Level Education

ESDP VI Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
Grades 9–12, GER Female	30	55	29.6
Grades 9–12, GER Male	34	57	31.1

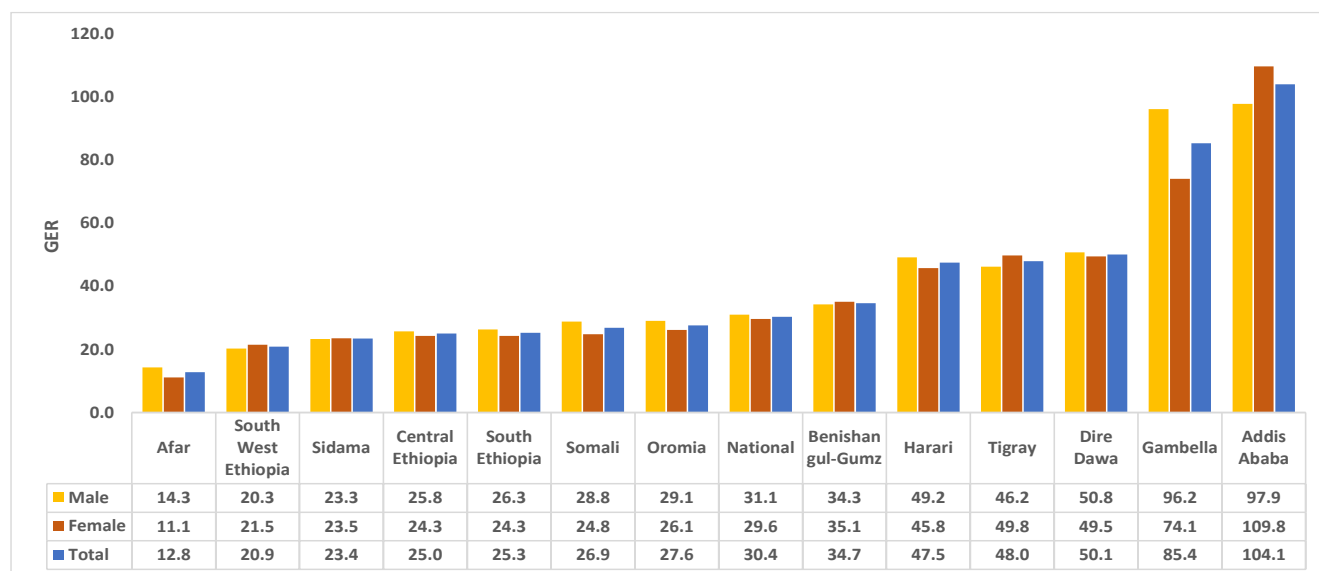

Transition from primary to secondary education is low nationally as the GER for Secondary is shown to be much lower than Primary and Middle.

The national GER of secondary level education indicates that transition from Middle schools to Secondary education is too low. GER has significantly decreased from last year.

Table 4.1 Gross Enrollment and GER by Region and Sex, 2024/25

Region	School Age Population (15-18)			Gross Enrolment (G9-12)			GER (%)		
	Male	Female	Total	Male	Female	Total	Male	Female	Total

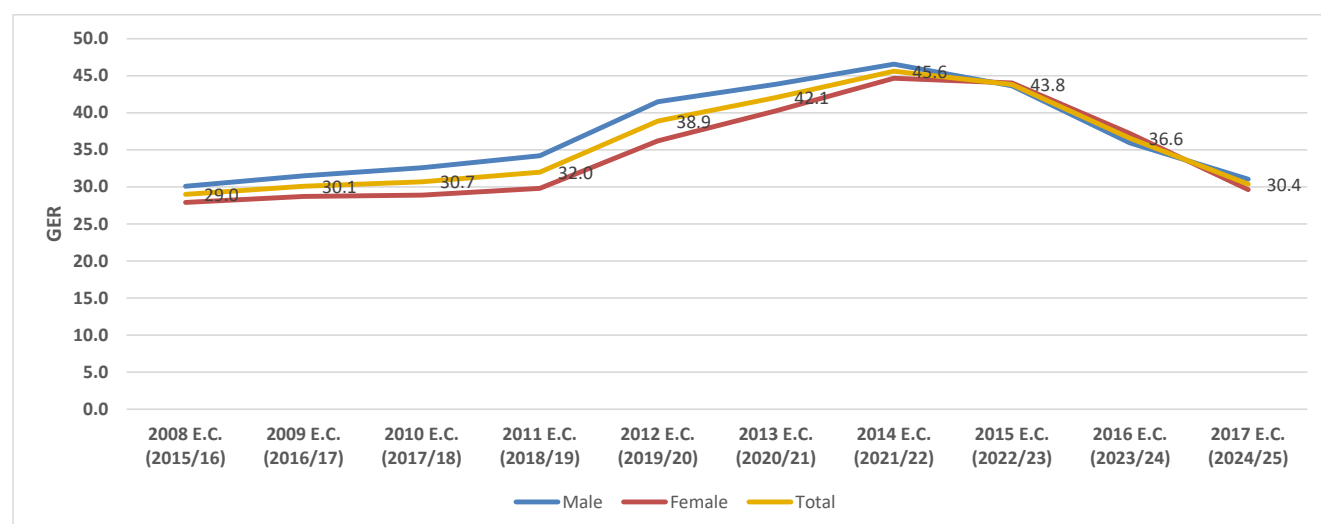

Chart 4.1 GER by Region and Sex, 2024/25

GER trend in Grades 9-12 indicates a steady increase over the past eight years, except the last three years.

Chart 4.2 below shows the trend in GER for Secondary education for the last ten years.

Chart 4.2 Trends in GER, 2015/16-2024/25

4.1.1. Enrollment in Pastoral Areas

Similar to Pre-Primary, Primary and Middle level education, enrollment of Secondary level education in pastoral areas has been collected and presented in the table below.

Table 4.2 Enrolment Share in Pastoral Areas by Region and Sex, 2024/25

Region	Regional Enrollment			Pastoralist Enrollment			Pastoralist Share (%)		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Oromia	552,817	487,392	1,040,209	34,707	24,297	59,004	6.3	5.0	5.7
South Ethiopia	93,710	88,929	182,639	3,172	3,133	6,305	3.4	3.5	3.5
South West Ethiopia	38,485	41,752	80,237	3,029	2,074	5,103	7.9	5.0	6.4
Total	685,012	618,073	1,303,085	40,908	29,504	70,412	6.0	4.8	5.4

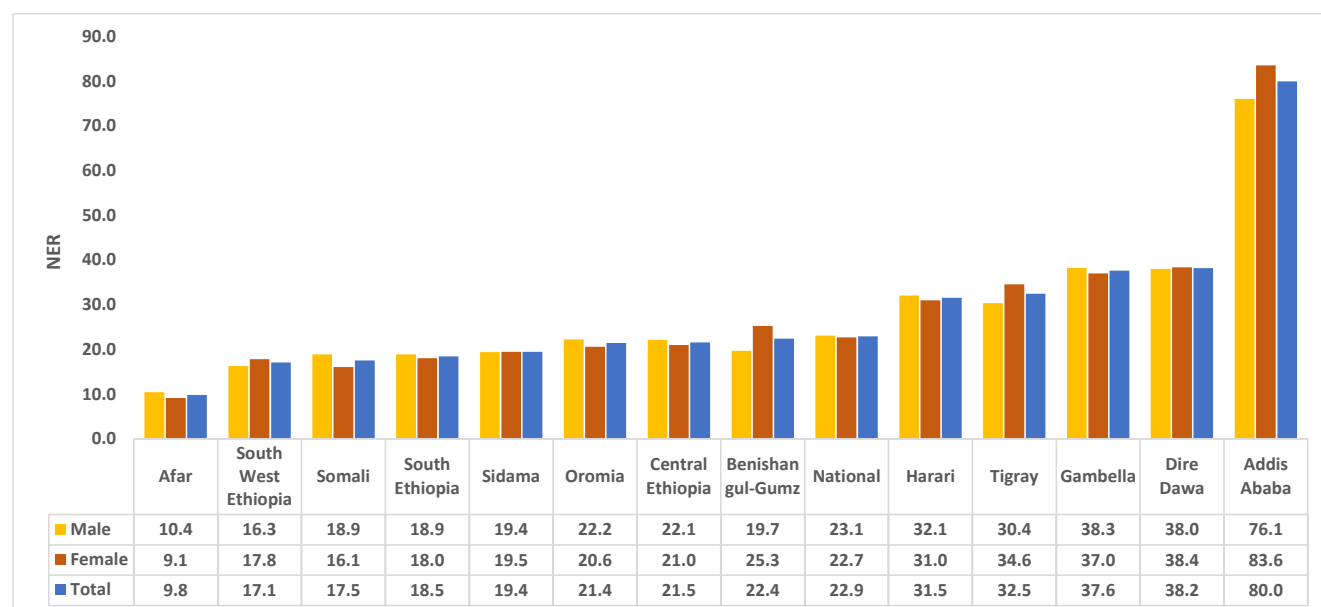

4.2 Net Enrolment Rate (NER) in Secondary Level Education

ESDP VI Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
Grades 9–12, NER Female	25	53	22.7
Grades 9–12, NER Male	26	53	23.1

The nationally NER for Grades 9-12 decreases from last year.

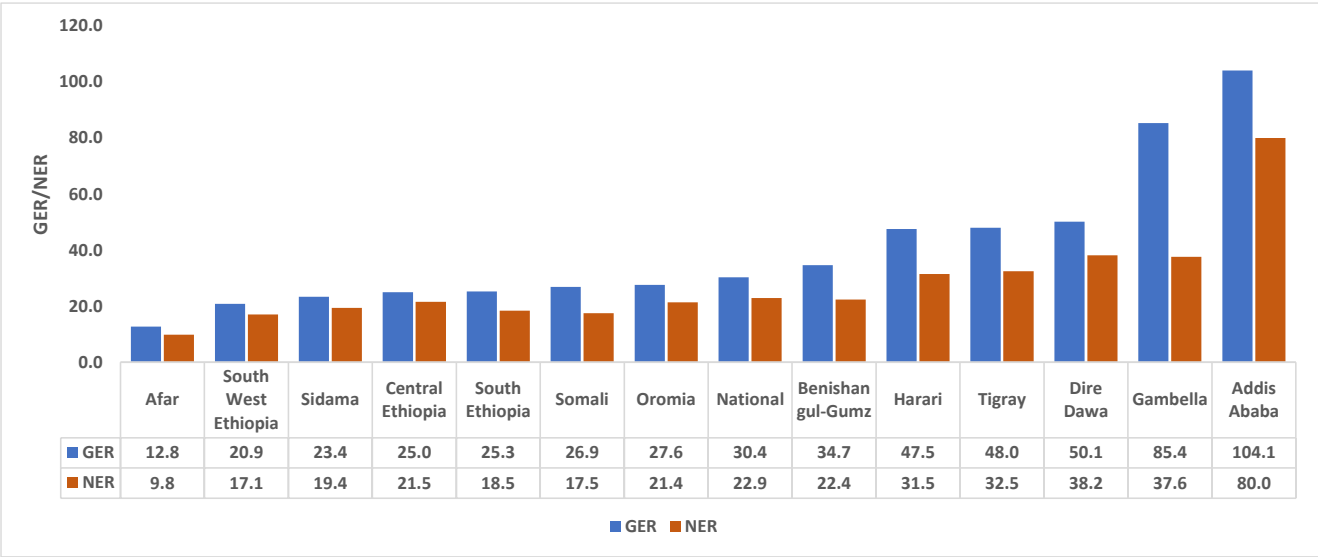

Table 4.3 Net Enrollment and NER by Region and Sex, 2024/25

Region	School Age Population (15-18)			Net Enrolment (G9-12)			NER %		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Afar	87,540	80,349	167,889	9,141	7,324	16,465	10.4	9.1	9.8
Tigray	248,137	241,322	489,459	75,393	83,482	158,875	30.4	34.6	32.5

Sidama	257,090	255,315	512,404	49,891	49,722	99,613	19.4	19.5	19.4
South West Ethiopia	190,004	194,438	384,442	30,879	34,686	65,565	16.3	17.8	17.1
Central Ethiopia	291,914	305,649	597,563	64,651	64,100	128,751	22.1	21.0	21.5
National	3,838,150	3,808,964	7,647,114	887,144	864,735	1,751,879	23.1	22.7	22.9

Chart 4.3 NER by Region and Sex, 2024/25

Nationally, the gap between GER and NER is higher in Secondary than Primary and Middle level, indicating that students enrolled in Secondary level are more likely to be overaged than in Primary and Middle level.

Chart 4.4 Comparisons between GER and NER by Region, 2024/25

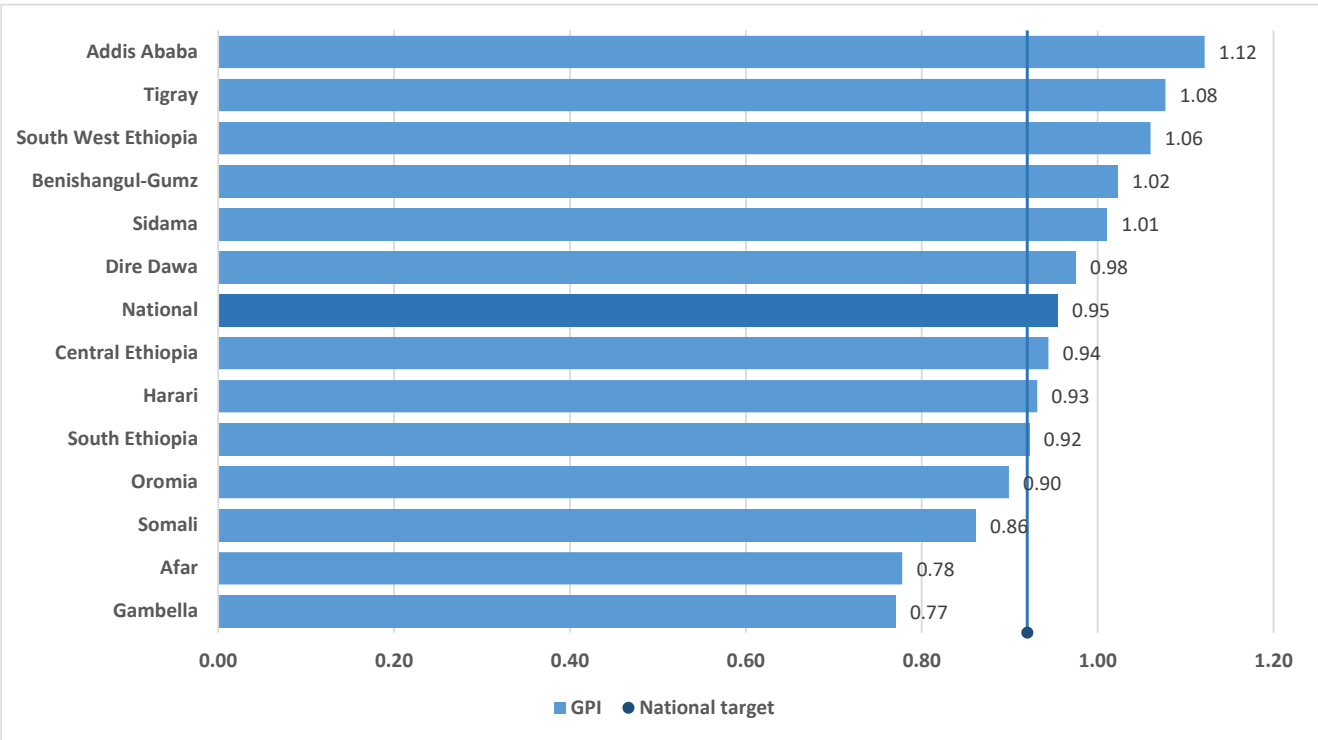

4.3 Gender Parity Index

ESDP VI Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
GPI in Grades 9-12 (index)	0.87	0.92	0.95

The ESDP VI target of GPI for secondary education has been successfully met.

Chart 4.5 GPI by Region, 2024/25

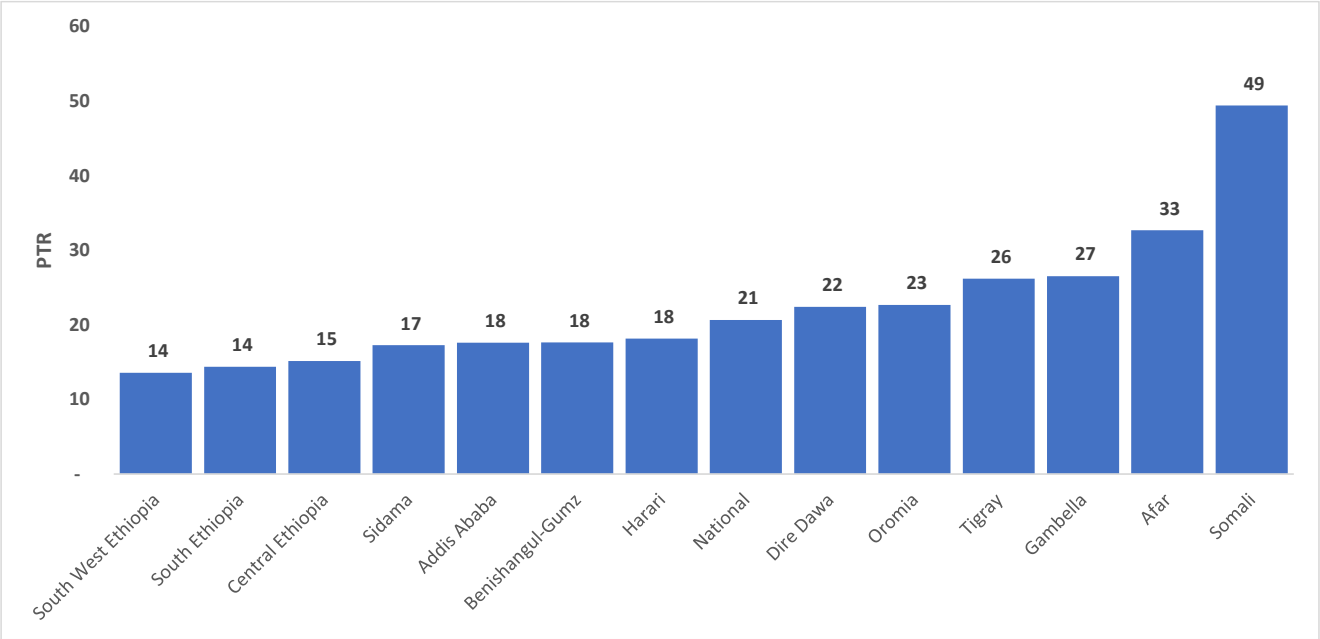

As seen from the chart above, six regions have a GPI value beyond the national average. Equity is perfectly maintained when the GPI value approaches 1.

4.4 Pupil Teacher Ratio in Secondary Level Education

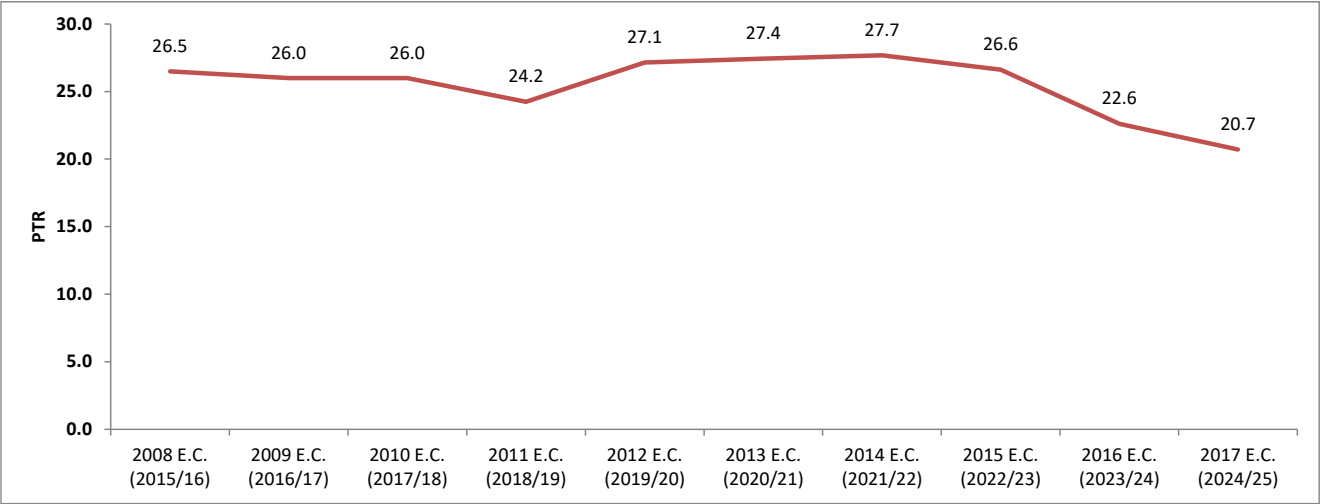

The national PTR of secondary schools is 21 in this year. In general, the result shows that all regions are in a good PTR, and it is by far better than last year.

Chart 4.6 PTR by Region, 2024/25

The national trend in PTR shows that it has been improving since 2021/122. The improvement is highest in this year. The chart below shows the PTR trend in the last 10 years.

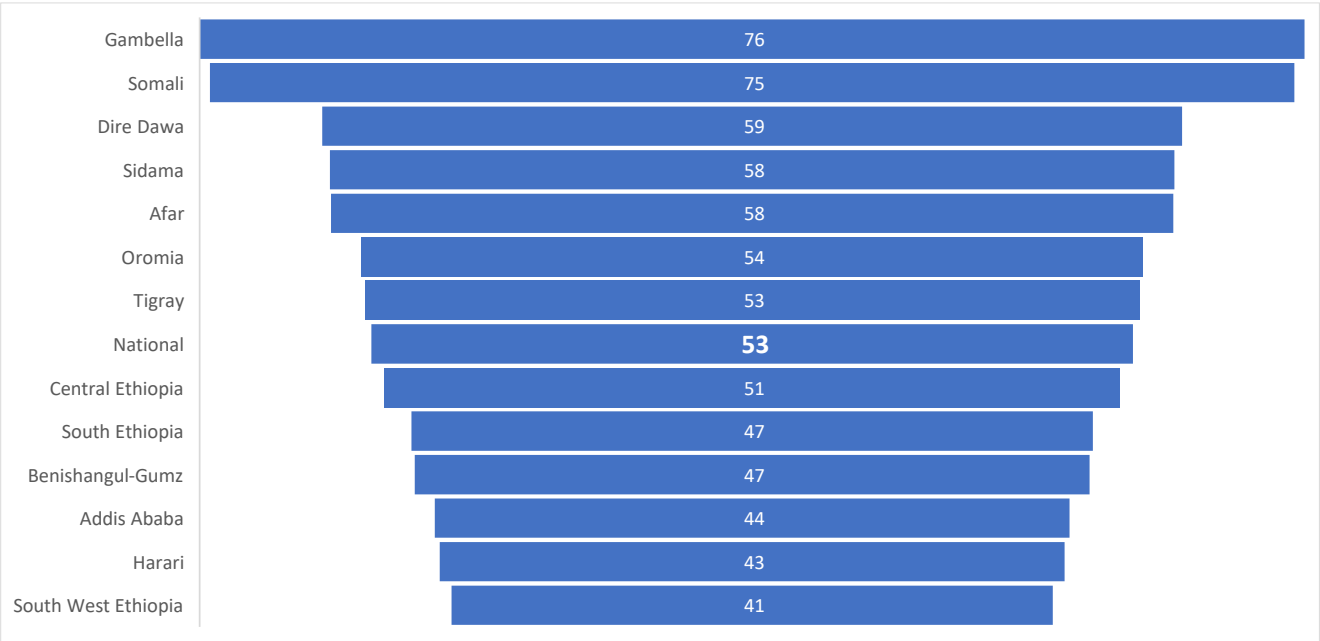

Chart 4.7 National PTR Trend, 2015/16 – 2024/25

4.5 Pupil Section Ratio in Secondary Level Education

The national Pupil-Section Ratio for secondary schools this year is 53, which is significantly better than last year. According to the data presented in Chart 4.8, six regions are above the national average (better in PTR).

Chart 4.8 Pupil Section Ratios by Region, 2024/25

4.6 Number of Schools

The total number of secondary schools in this year is 3,358, without Amhara region. With respect to ownership, Government schools, similar to Primary and Middle, took the highest share with 87.7%. In Addis Ababa, similar to the Primary and Middle level schools, Non-Government schools are higher in number than Government owned.

Chart 4.9 Numbers of Secondary Schools by Region, 2024/25

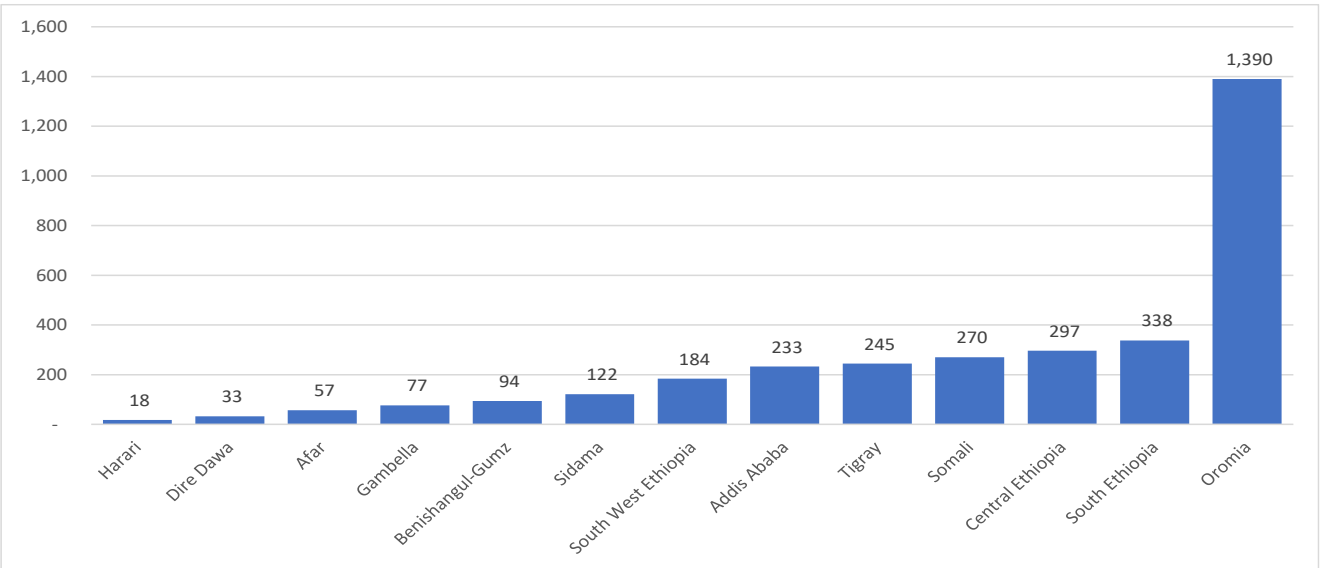

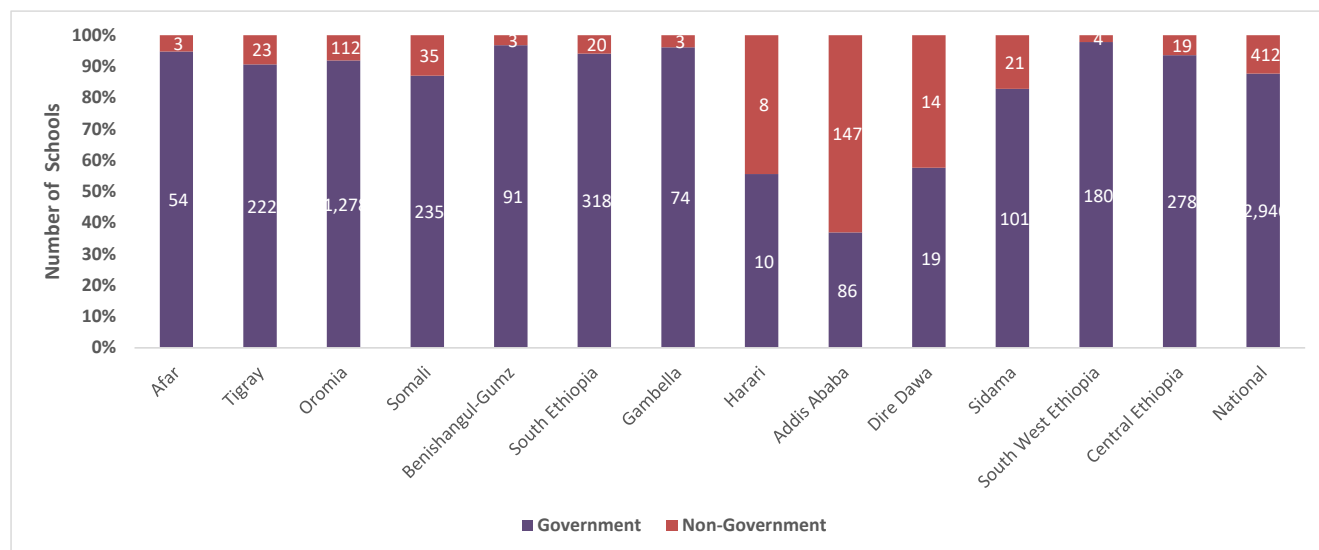

Chart 4.10 Numbers of Secondary Schools by Region and Ownership, 2024/25

4.7 Textbooks

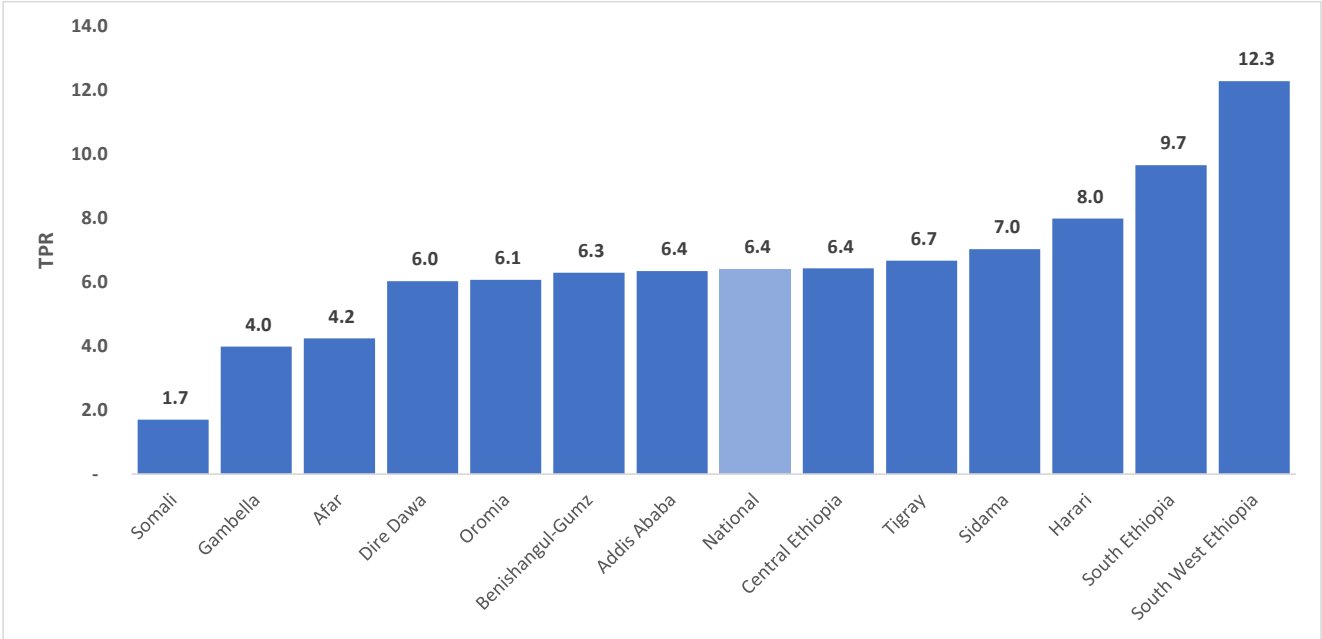

The General Education Proclamation No. 1368/2025 mandates the Ministry of Education (MoE) to develop, print, and distribute secondary school student textbooks and teacher guides. In accordance with this mandate, the MoE produced and distributed more than 43.5 million textbooks across two phases in 2016 E.C. and 2017 E.C. (MoE & CEO, 2017 Annual Report). These included teacher guides, Performing and Visual Arts (PVA) materials, federal language textbooks, and mother-tongue language books. However, as presented in Table 4.4, the available data appear to reflect only the textbooks printed and distributed during the first phase, as reported by schools. At the secondary level, the expected textbook allocation varies by grade and stream: students in Grades 9 and 10 are each required to have at least 11 textbooks, while those in Grades 11 and 12 are expected to receive six or seven textbooks, depending on whether they are enrolled in the social science or natural science stream, respectively.

Table 4.4 Student Textbook distribution by Region and Subject, 2024/25

Regions	English	Mathematics	Physics	Chemistry	Biology	Agriculture	IT/ICT	Economics	Geography	History	HPE	Citizenship	Total

National	1,694,482	1,682,378	1,383,160	1,321,339	1,308,014	296,595	1,517,932	1,297,152	1,339,537	1,274,186	831,106	942,889	14,888,770

Though there are variations in the Textbook to Pupil ratio among grade levels, subjects, and regions, nationally the ratio in 2024/2025 (2017 E.C.) is 6.4, which is better than last year. This indicates that, on average, secondary school students have access to nearly 6 textbooks out of 12.

Chart 4.11 Textbook to Pupil Ratio (TPR) by Region, 2024/25

It should be noted that, TPR is a simple ratio between all students and all textbooks, however all students might not register for all subjects because students will be categorized in different streams (Natural and Social for example).

To make the ratio more meaningful, it will be good to see TPR of common subjects taken by all students, such as English and Mathematics. It can be seen from the table below that both subjects are not in a one-to-one ratio in most regions at all grade levels. The table below shows TPR for English and Mathematics books in secondary schools. The ratio shows both subjects are at lower access by students at national level in Grade 9, while these subjects are in a 1:1 ratio nationally for Grade 10.

Table 4.5 TPR for English and Mathematics by Region and Grade, 2024/25

Regions	English				Mathematics			
	Grade 9	Grade 10	Grade 11	Grade 12	Grade 9	Grade 10	Grade 11	Grade 12
Afar	0.4	0.4	0.5	0.5	0.4	0.4	0.5	0.5
Tigray	0.7	1.1	0.6	0.5	0.7	0.9	0.7	0.5
Oromia	0.5	1.1	0.7	0.6	0.5	1.0	0.7	0.6
Somali	0.2	0.1	0.2	0.3	0.2	0.1	0.2	0.3
Benishangul-Gumuz	0.5	0.6	0.7	0.8	0.7	0.6	0.7	0.8
South Ethiopia	0.9	2.3	0.9	1.1	0.8	2.6	1.0	1.1
Gambella	0.5	0.4	0.4	0.4	0.5	0.4	0.4	0.5
Harari	0.9	0.7	0.9	1.0	0.9	0.9	0.9	1.0
Addis Ababa	0.7	0.7	0.6	0.8	0.7	0.8	0.7	0.8
Dire Dawa	0.5	0.9	0.7	0.8	0.5	1.1	0.8	0.8
Sidama	0.6	1.1	0.6	1.1	0.6	1.1	0.7	1.1
South West Ethiopia	1.0	3.0	0.9	1.2	1.1	2.5	0.8	1.2
Central Ethiopia	0.4	2.2	0.7	0.6	0.4	1.4	0.6	0.7
National	0.6	1.0	0.7	0.7	0.6	1.0	0.7	0.7

As with other subjects, the distribution of the two core subjects—English and Mathematics—remains uneven across regions, as illustrated in Table 4.5. This unevenness is particularly evident in the textbook-to-pupil ratio (TPR), which highlights significant disparities across grade levels and regions. Among the regions, South West Ethiopia recorded the highest TPR, followed by South Ethiopia, while Grade 10 students achieved a relatively stronger TPR compared to students in Grades 9, 11, and 12 in the distribution of English and Mathematics textbooks. The relatively low TPR observed in several other regions may be attributed to reporting inconsistencies similar to those identified in the overall secondary school textbook distribution presented in Table 4.4. Specifically, the omission of the second-phase distribution in 2017 E.C. appears to have resulted in an underestimation of the national TPR, reducing the national average from 1 in Grade 10 English and Mathematics to 0.6–0.7 in Grades 9, 11, and 12.

4.8 School Facilities

4.8.1 Electricity and Multimedia

In the current academic year, 74% of secondary schools nationwide reported having access to electricity, with hydropower as the predominant energy source. This foundational access is a critical enabler for digital learning and modern teaching methods.

Encouragingly, 71.3% of secondary schools have computers available for multimedia instruction and internet use, reflecting a growing commitment to integrating technology into classrooms. The upward trajectory in computer availability, evident from historical data, showing a rise from just 775 schools in 1995 to 2,393 in 2017 E.C. underscores a long-term investment in digital education.

Despite these gains, internet access remains limited, with only 18.1% of secondary schools nationally connected. Addis Ababa, Dire Dawa and Harari leads the way with relatively higher number of schools connected to the internet.

Table 4.6 School Facility Indicators on Electricity and Multimedia Teaching, 2024/25

Region	Availability of Electricity		Source of Electricity (If "Yes")						VSAT		Computer			Internet/ICT	
	Number of Responder Schools	Schools with Electricity	Biogas	Generator	Hydroelectric	Solar	Other	Not Answered	Number of Responder Schools	Schools With Functional VSAT	Availability (Number of Schools)	Computers used for Teaching (Number)	Computers used for Admin (Number)	Availability of ICT Lab (Number of Schools)	Number of Computers accessing the Internet

4.8.2 Library, Laboratory and Pedagogical Center

Table 4.7 presents a snapshot of the current status of key educational facilities; libraries, laboratories, and pedagogical centers across secondary schools in the country.

Libraries: 68.9% of secondary schools reported having functional libraries, indicating a relatively strong foundation for student access to reading and reference materials.

Laboratories: In contrast, the availability of functional science laboratories remains critically low. National figures reveal that: Biology labs are functional in only 22.9% of schools, Chemistry labs in 23.4%, and Physics labs in just 21.5%. These numbers highlight a significant gap in hands-on science education, which is vital for fostering inquiry-based learning and practical skills.

Pedagogical Centers: Around 51% of secondary schools have functional pedagogical centers, which serve as hubs for teacher development and instructional support. While this is a moderate figure, it suggests room for strategic interventions to enhance teaching quality nationwide.

The data underscores the need for targeted infrastructure improvements to ensure that all students and educators have access to the essential tools for effective teaching and learning.

Table 4.7 Library, Laboratory and Pedagogical Center by Region, 2024/25

Region	Availability of Library			Laboratory by Stream (Measured in Number of Schools)												Pedagogycal Center	
	Number of Respondent Schools	Availability (Number of schools)	Schools with Functional Library	Biology				Chemistry				Physics				Availability (Number of Schools)	Functional Peda Center (Number of Schools)

4.8.3 WASH Facilities

Among the schools that responded to the national questionnaire, 59.5% reported having a functional water supply, reflecting a modest level of access to this essential resource. Encouragingly, the majority of these schools (57%) rely on pipeline water, indicating a structured and potentially more reliable source of clean water. The next most common source is protected wells or springs, apart from those responding “Undefined”, which serve as vital alternatives in regions where piped infrastructure is limited.

The data highlights both progress and persistent gaps in ensuring universal access to safe water in educational institutions; an area that remains foundational to student health, hygiene, and overall learning conditions.

Table 4.8 Water Access in Secondary Schools, 2024/25

Region	Availability of Water			Water Supply Type							Accessible to-

According to the data, 98% of secondary schools nationwide reported having functional toilets for students, reflecting a commendable level of basic sanitation coverage. Encouragingly, the majority of these facilities are classified as “improved toilets,” indicating progress not just in access but also in hygiene standards and infrastructure quality.

In terms of staff facilities, 78.7% of schools have functional toilets for teachers. Among these, a notable 86.9% provide separate toilets for male and female staff, underscoring a growing recognition of gender-sensitive infrastructure in educational environments.

While these figures suggest meaningful strides in school sanitation, regional disparities and the presence of “Other” and “Traditional” toilet types in some areas point to the need for continued investment and monitoring to ensure equitable and safe access for all.

Table 4.9 Toilet Facilities in Secondary Schools, 2023/24

Region	Student Toilet				Toilet Types		Improved Toilet Types					Handwash		Teachers' Toilet	
	Number of Ressonndent Schools	Schools with Functional Toilets	Schools with Separate Boys and Girls Toilet	Accessible to Children with Special Needs	Improved	Traditional	Cemented Toilets	Composite Toilets	Not cemented Toilets	Pour flush Toilets	Other	Fuunctionality (Number of Schools)	With Water and Soap (Number of Schools)	Schools with Functional Teachers Toilets	Schools with Separate Male and Female Toilet

4.9 Grade 12 Examination

In this edition of ESAA, the 2017 E.C. (2024/25) Ethiopian Higher Education Entrance Certificate Examination (EHEECE) exam statistics includes data from Tigray region.

The total number of examinees registered in this year are 608,228, from which 585,933 of them sat for the exam and 50,776 scored 50% and above nationally.

Table 4.10 Grade 12 Exam Statistics by Stream, 2024/25

Similar to last year, the pass rate of students in the natural science stream is by far better than that of the social science. On the other hand, male students achieved better than female in both streams, and the total pass rate of students nationally is 8.7%. However the Exam statistics has been given in Table 4.11 above region wise.

4.10 School Inspection at Secondary Level

The 2017 inspection of 645 secondary schools reveals that 11.8% are below the standard, 54.7% are under progress, and 33.3% meet the standard. Addis Ababa (66.1% at Level-3, none below standard), Sidama (73.2% at Level-3, none below standard) and Central Ethiopia (32.4% at Level-3 and none below standard) stand out as the strongest performers of all the regions.

Table 4.12 Fourth round (2017 E.C.) Secondary School Inspection scores across Regions by Level⁴

5. ADULT AND NON-FORMAL EDUCATION

Adult and Non-Formal Education (ANFE) has paramount important in playing an indispensable role in educational as well as economic development of a nation. Cognizant to this, the Ethiopian government has given strong emphasis in the area of Adult and Non-Formal Education.

Adult and Non-Formal Education strives to enrich adults' capabilities and enhance their knowledge, improve technical and professional qualifications or turn themselves in a new direction and bring about changes in their attitudes and behaviors in the personal development and participation in balanced and independent social, economic and cultural development.

In several countries of the world, including Ethiopia, Adult and Non-formal Education programs have been given for adults who are over 15 years of age.

The ANFE programs empower communities to utilize their own resources in a better planned way. It also initiates adult learners to use new technologies and contributes for their livelihoods.

Through Adult and Non-Formal Education, the learners are able to augment their experiences and develop skills and abilities. Apart from development of knowledge and skills, individuals are able to generate awareness in terms of their rights and duties, which are required to turn into effectual citizens of a country.

Provision of Adult and Non-Formal Education (ANFE) programs improves the participation of communities in the national development and poverty reduction struggle and makes adult learners more productive and self-reliant.

5.1 The Current Status of Adult and Non-Formal Education in Ethiopia

Adult and Non-Formal Education has gone several structural changes from its inception with different naming and erratic emphasis till recent times. Starting from 2015 E.C, it is organized as Adult and Non-Formal Education Chief Executive Office (CEO) with two Desks, Adult Basic Education and Non-Formal and Lifelong Education, under the CEO. It should also be noted that, in addition to adult basic education program, currently there are various programs incorporated under the Adult and Non-Formal Education, including Distance Education (Grades 7-12), Evening School (Grades 1-12), Accelerated Education Program and Skill Training Program.

The Ethiopian government has been exerting maximum effort to ensure equitable access of the ANFE programs to youth and adult learners. This is because the Government of Ethiopia starting from the inception of Adult and Non-Formal Education, has worked for the expansion and quality of the program. Prior to this, the government knew that without a significant increase in the adult literacy rate, Ethiopia would not be able to achieve middle-level income status within a foreseeable time period. Therefore, the Basic adult Literacy program was designed and delivered to the illiterate adults aged 15-60 years old. Increasing adult literacy rates will support the development goals of the country.

It is clear that, adult basic education, by equipping recipients with essential literacy and numeracy skills, yields high rates on investment, thereby enhancing labor productivity.

Adult Basic Literacy is a one-year program designed for illiterate adults aged 15-60.

Based on the CSS 2016/17 abstract, there were around 21,047,152 (Male 7,289,109 and Female 13,758,043) illiterate adults (aged 15 to 60) in the country. Out of these illiterate adults, a total of 13,015,641 adults completed/graduated from IFAL/ABE program for the last eight years, from 2016/17 to 2024/25. In the coming ESDP (VII) plan, around 8,031,511 illiterate adults need to join the program.

5.2 Enrolment in Adult Basic Education Programs and Education Light/Torch

In 2024/25 there are 1,392,635 adults participate in the Adult Basic Education Program, of which the female share is 46.4%. Regionally, Oromia has the highest number of total enrollments with 60.8% of the national share, followed by Central and South Ethiopia regions.

The enrollment also includes those registered in Education Light / Torch program. Adults registered for education light / Torch accounts 31.7% of the total enrollment.

Table 5.1 Enrolment in Adult Basic Education by Region and Sex, 2024/25

5.3 Enrolment Trend in Adult Basic Education

The trend shows that the enrollment was at the pick in 2015/16, since then it drastically decreased until 2020/21. In this year, the enrollment of adult basic education goes around 1.4 million from all regions except Amhara and Tigray regions.

The enrolment of Education Light / Torch also around 645,996 collected from all regions except Amhara and Tigray regions. Of all the total enrollments, Oromia regions enrolled 60.7 % in Adult Basic Education and 60.9 % in Education light as compared to other regions.

In six regions (Afar, Oromia, Harari, Dire Dawa, South West, and Central Ethiopia), male enrollment is higher than female enrollment for adult basic education and education lite of the year. However, in six regions—Somali, Benshangul-gumuz, South Ethiopia, Gambella, Addis Ababa, and Sidama—female enrollment is higher than male enrollment.

Chart 5.1 National Adult Basic Education Enrolment Trend, 2015/16-2024/25

5.4 Enrollment of Adult Basic Education for Students with SENs

A total of 26,004 adults with Special Educational Needs are enrolled in 2024/25 nationally in Adult Basic Education program, from which 46.6% are females; Regionally, Central Ethiopia has the highest number of enrolled adults with SENs, scoring 39.5% of the national figure.

Table 5.2 Enrollment of Adults with SENs by Region and Sex, 2024/25

5.5 Graduates in ANFE Programs

ESDP VI Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
Number of female graduates in youth and adults' life-skills education	1,997,123	5,147,478	32,890

After completing a one-year adult basic education program and pass the Education Light evaluation test, adults who have met the course evaluation criteria will graduate from the Adult Basic Education program.

In 2024/25, 63,831 adults graduated from the program, this figure is significantly decreased. The actual value for the year is too far from the ESDP VI target, due to incomplete graduated adult's data or data cannot be collected in 7 regions (Tigray, Oromia, Somali, South Ethiopia, Harari, Sidama and South West Ethiopia)

Out of 6 regions collected graduated data, 84.3% of them are from Central Ethiopia region, and the female share is 51.5 % nationally.

5.6 “Education Light/Torch” Assessment System

On the basis of the research made in Ethiopia, there are many people who have been mistakenly categorized as illiterates. However, though these citizens did not join the conventional schools, through their personal efforts or the support of others, could read religious books, keep records of events using different signs, engage in business and calculate their expenditures and incomes; and do more other daily activities related with and could be covered under the basic education programs. These citizens, as indicated above, conventionally are labeled as illiterates. But, in reality they are literates; meaning they can read, write and count numbers. This wrong categorization of citizens as illiterates has created wrong pictures and given distorted messages about the ratio of adult basic literacy in the country.

The "Education Light/torch" grading method was established in order to address this irony of literacy in the nation. The approach is designed to evaluate children and people who are literate and mathematically literate, or who have acquired these skills through various chances. These citizens will receive recognition following their evaluation based on their performance.

According to Table 5.4 below, out of the 645,996 kids and adults who have registered or been enrolled in the Education Light assessment (Torch) system nationwide, 55.3 % have taken an evaluation test. 84.3 % of the total examined passed the test.

Table 5.4 Youth and Adults Assessed in “Education Light/Torch” by Region and Sex, 2024/25

5.7 Adult Basic Education Centers

In 2024/25, there are 13,380 adult learning centers reported nationally. Among the centers, the majority of them are found in regular school compounds, with 42.8 % of the total number of centers, followed by religious institutes.

Table 5.5 ANFE Learning Centers by Region and Type, 2024/25

5.8 Facilitators

Teachers in the Adult Basic Education program, also termed as Facilitators, are of many types. It ranges from ‘ANFE Expert’ to “Volunteer” facilitators, including experts from agriculture and health.

There were 19,976 facilitators nationwide in 2024/2025, with 29% of them being females. In terms of qualification, the largest percentage of facilitators (30%) are "Diploma" holders, who are followed by "Grade 12" holders.

5.9 Enrolment in Accelerated Education Program (AEP)

Accelerated Education Program is primarily designed for those who can't get primary education by the conventional schools due to various reasons; mainly of poverty, man-made and natural factors, etc. This program is organized for those over-aged out of school students with 9 to 14 years old. The program is a Non-Formal education opportunity that enables over-aged out of school students (OOSS) to complete more than one grade level in one year with condensed curriculum and later join the conventional schools. To keep the quality of the program, comprehensive and continuous evaluation criteria are in place. At the end of the program, careful evaluation and promotion systems is established.

The Accelerated Education Program enrolled 68,163 out-of-school students with 9 to 14 years old. in 2024–2025. The Sidama region had the greatest percentage of over-aged out-of-school students (26.8%) out of all regions, followed by the Tigray region.

Table 5.3 Enrolment in AEP by Region and Sex, 2024/25

5.10 Enrolment in Evening (Night) Education Program (AEP)

In 2024/25, there are 119,935 enrollments in Primary and Middle and Secondary evening education reported nationally. Out of all the regions, Addis Ababa City Administration enrolled 45.7% of the total data, followed by Oromia. As compared to male enrollments, female participants are highest, at 62.7%, in the total enrollment under Primary and Middle and Secondary enrollment in the evening education programs.

6. SPECIAL NEEDS EDUCATION

The educational environment must be adjusted to meet the needs of all learners (UNESCO, 2005). That means, Inclusive Education is based on an assumption that all children can learn together with others if they are given the right learning environment and support.

Special Needs Education is a type of education which provides appropriate modifications in curricula, educational resources, medium of communication or the learning environment in order to cater for individual differences in learning. This may include everything from special schools, through special classes, to inclusive education.

Special Needs Education provides additional support for short or long periods, for those who encounter problems in learning (students with difficulties, disabilities, giftedness, etc.) for a variety of reasons sometimes during their educational career.

Inclusive Education is an approach whereby students with special educational needs regardless of age, form of disability, gender, religion or culture are provided with appropriate education within regular schools.

An inclusive school for all must put flexibility and variation at the center, structurally as well as in terms of content, with the goal of offering every individual a relevant education and optimal opportunities for development (UNESCO, 2005).

Inclusive education requires identifying barriers that hinder learning and reducing or removing these barriers in schools, vocational training centers, higher education, teacher education, and education management. It involves a particular emphasis on those groups of learners who may be at risk of marginalization, exclusion or underachievement (UNESCO 2005).

Inclusive education is also about practical changes of the school and its system including the attitude of the school community, modifications in content, instructional and assessment methods. Physical adaptation and support system in schools have been established to cater children with special educational needs (Special Needs/Inclusive Education Strategy, MoE, 2022).

The identification and assessment of students in school is important to get reliable data on students with special educational needs. The availability of precise data is useful for planning of the education of these students.

Access to education is a human right recognized in the Universal Declaration of Human Right and UN Conventions on the Rights of Persons with Disabilities (CRPD) and Sustainable Development goals (SDG) that Ethiopia ratified.

The Ethiopian Constitution accepts the international declarations and conventions, and states education as a human right. In line with the international declarations, conventions and statements, it establishes the universal right to education, emphasizes the need to allocate resources and provide assistance to disadvantaged groups. Special Needs/Inclusive Education Strategy of the MoE also clearly states the rights of students with special educational needs to get access at all education levels. To increase enrolment and benefit of students with disabilities, targets are set in ESDP VI.

This section provides insight on the enrollment/access of students with different types of disabilities at Pre-Primary, Primary and Middle, and Secondary levels.

6.1 Enrolment of Students with SENs in Pre-Primary Level

ESDP VI Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
Gross Enrolment rate of Students with SENs, Pre-Primary Female	1.2	10.6	4.0
Gross Enrolment rate of Students with SENs, Pre-Primary Male	1.5	10.7	5.1

Pre-primary education plays a vital role in the overall development of children with SENs. It lays a strong academic foundation, which is crucial for future success. Children with SENs who attend these programs often perform better academically compared to those who do not. In addition, early education helps in developing better behavioral patterns, reducing tendencies like aggression and improving focus and attention.

Enrolling these children in inclusive classroom settings is more important and helpful as it allows children with SENs to interact with their peers, fostering understanding and acceptance among all students. This social integration helps improve social skills and build meaningful friendships.

The population figures in the calculation of Gross and Net Enrollment Ratios have been based on the same assumption used in ESDP VI that 15% of the population live with disabilities based on a World Health Organization estimate.

Table 6.1 GER of Students with SENs by Region and Sex, 2024/25

Region	Population with SENs (Ages 4-6)			Students with SENs			GER (%)			GPI
	Male	Female	Total	Male	Female	Total	Male	Female	Total

Sidama	33,740	32,506	66,246	7	5	12	0.0	0.0	0.0	0.7
South West Ethiopia	26,517	26,324	52,841	1,571	1,420	2,991	5.9	5.4	5.7	0.9
Central Ethiopia	36,118	36,687	72,804	6,173	5,683	11,856	17.1	15.5	16.3	0.9
National	503,609	492,276	995,885	25,538	19,776	45,314	5.1	4.0	4.6	0.8

GER in Pre-Primary, though shown improvement from last year, missed the ESDP VI target of the year in both sexes.

The Gross Enrolment Ratio nationally this year is 4.6%, which shows an increment by almost one percentage point compared with last year. The national figure shows that thousands of children with SENs are not yet attending Pre-Primary education, or not intently recorded. Harari, Addis Ababa and Central Ethiopia scored even beyond the ESDP target.

With respect to type of disability, “Learning Difficulty” is the highest figure with 25% of the total, followed by “Visual Impairment” 13.9%” and “Communication Difficulty” 13.9%”. The table below shows the detailed enrollment figure by types of disability.

Table 6.2 Enrollment of Students with SENs by Region, Sex and Type, 2024/25

6.2 Enrolment of Students with SENs in Primary and Middle Level

ESDP VI Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
Gross Enrolment rate of students with SENs, Grades 1-8 Female	9.7	25.0	10.9
Gross Enrolment rate of students with SENs, Grades 1-8 Male	12.3	25.0	13.4

According to the data collected and shown in the table below, the total number of students with special educational needs who are attending Primary and Middle schools (Grades 1-8) in 24/25 are 304,618, with a total GER of 12.2%. Benishangul-Gumuz, Harari, Addis Ababa, South west Ethiopia and Central Ethiopia scored beyond the ESDP target in both sexees.

Table 6.3 GER of Students with SENs by Region and Sex, 2024/25

Note that, enrollment in Primary and Middle levels include students with SENs in ABE

At Primary and Middle level, “Learning Difficulty” is the highest figure with 23.5% of the total, followed by “Visual Impairment”, 18.1% and “Behavioral and Social Problems”, 13.5%. The table below shows enrollment figure by disability types.

Table 6.4 Enrollment of Students with SENs by Region, Sex and Type, 2024/25

6.3 Enrolment of Students with SENs in Secondary Level

ESDP VI Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
Enrolment rate of students with SENs, Grades 9-12 Female	2.4	11.2	3.7
Enrolment rate of students with SENs, Grades 9-12 Male	3.2	11.6	4.2

A total of 45,056 students with special educational needs are currently attending secondary level of education. Addis Ababa and South West Ethiopia regions show better performance in recording students with SENs for the level.

Table 6.5 GER of Students with SENs by Region and Sex, 2024/25

Region	Population with SENs (Ages 15-18)			Students with SENs			GER (%)		
	Male	Female	Total	Male	Female	Total	Male	Female	Total

National	575,722	571,345	1,147,067	24,178	20,878	45,056	4.2	3.7	3.9

According to ESDP VI, the calculated GER for both sex in this year is far from the target. However, the region wise comparison shows Addis Ababa and Tigray scored beyond the target in both sexes.

With respect to type of disability, “Behavioral and Social Problems” is the highest figure with 24.2% of the total, followed by “Visual Impairment”, 21.8% and “Learning Difficulty”, 18.5%. The table below shows enrollment figure by disability type.

Table 6.6 Enrollment of Students with SENs by Region, Sex and Type, 2024/25

Region	Visual Impairment				Hearing Impairment				Physical Disability				Intellectual Difficulty				Learning Difficulty				Behavioral and Social Problems				Communication Difficulty				Multiple Disability				Autism				Total

In general, under-reporting of children with SENs is partaking a large impact on the calculated figures of GER in all levels of general education, though the figure has been improved from year to year.

6.4 Teachers with Disability

Teachers with disabilities contribute to a collaborative and dynamic teaching community. Their unique insights and strategies can inspire their colleagues to adopt more inclusive practices and improve their own teaching methods so that enriching the learning experience for all students.

Employing teachers with disabilities helps challenge societal stereotypes and misconceptions about people with disabilities. By showcasing the capabilities and contributions of these teachers, the school communities will benefit more.

The research findings of Cambridge University also suggests that teachers with disabilities can be highly empathetic and skilled at differentiating their teaching and learning methods to suit all students. By definition, they also help to make schools more inclusive and promote positive attitudes towards people with disabilities.

When we think about inclusive classroom or integrated classroom in mainstream school, it is commonly believed that role models are essential for strong and positive identity construction. Towards this end, children with disabilities deserve to see successful teachers with disabilities in classrooms and schools. This section provides insight on data collected and organized based on three types of disabilities (Blind, Deaf and Physical disability) in the country. Hence the availability of consolidated data is used for the preparation of sustainable planning, assistive technologies, monitoring, evaluating and reporting system as well as helps to design programs, projects and make decisions.

Table 6.7 Teachers with Disabilities in Primary and Middle Level by Region, Sex and Type, 2024/25

Region	Blind		Deaf		Physical Disability		Total		
	Male	Female	Male	Female	Male	Female	Male	Female	Total

National	393	73	39	16	703	127	1,135	216	1,351

From the total number of Secondary level teachers with disabilities, 61.4% of them are with “Physical Disability”, followed by “Blind” with 34.5% as shown in the table above. On the other hand, among the total number of secondary level teachers reported with disabilities, 16% of them are females.

7. TEACHERS IN GENERAL EDUCATION

ESDP VI aims to transform teaching into a profession of choice and to ensure that teachers are of a high quality that is appropriately qualified. Accordingly, this section of the Abstract focuses on the issue of teachers in detail.

The analysis of teachers in this edition is backed to the previous qualification levels. So, the minimum qualification requirement is Certificate for Pre-Primary, Diploma for Primary, and First Degree for Middle and Secondary levels.

The analysis of the teaching workforce has been carried out covering the ownership of schools (Government and Non-Government), teachers' distribution based on qualification, qualified school leaders, as well as the extent of attrition.

7.1 Distribution of Teachers

Nationally, there are 611,070 teaching force across all levels; Kindergarten, O-Class, Primary, Middle and Secondary schools in Ethiopia. Out of this, 40% are females. The number of female teachers in the pre-primary schools are 83.5%.

Table 7.1 Number of Teachers across all levels by Region and Sex, 2024/25

7.2 Government and Non-Government Distribution of Teachers

As expected, the majority of teachers work in Government schools, accounting for 85.5%. Table 7.2 and Chart 7.1 below present the quantitative distribution of teachers across Government and Non-Government schools.

Table 7.2 Distribution of Teachers across all levels by Ownership, Sex and Region, 2024/25

7.2.3 Government and Non-Government Teachers' Distribution in Middle Schools

Similar to Primary level schools, the share of Government schools is by far higher than Non-Government. It should be noted that, as the Primary and Middle schools are in the same compound in most schools, teachers may teach in both Primary and Middle levels but are counted based on the number of periods they are teaching the more periods they have in primary counted as primary school teacher.

Table 7.5 Distributions of Middle School Teachers by Region, Sex and Ownership, 2024/25

Region	Government			Non-Government			Total

7.2.4 Government and Non-Government Teachers' Distribution in Secondary Schools

There are 112,274 Secondary school teachers nationally. In Addis Ababa the proportion of teachers in Non-Government is the highest of all regions, covering half of the total Non-Government teaching workforce, followed by Oromia. The majority of teachers in this level (80%), are male. The gender share is similar across regions.

Table 7.6 Distributions of Secondary School Teachers by Region, Sex and Ownership, 2024/25

7.3 Qualification Level of Teachers

ESDP VI Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
Pre-primary (KG) teachers holding Certificate and above Female	-	-	75.0
Pre-primary (KG) teachers holding Certificate and above Male	-	-	11.3
Primary and Middle teachers appropriately qualified Female	-	-	32.8
Primary and Middle teachers appropriately qualified Male	-	-	44.9
Secondary teachers appropriately qualified Female	-	-	16.3
Secondary teachers appropriately qualified Male	-	-	74.5

The qualification level of teachers is an important aspect of improving the quality of education in a country. In this edition the minimum qualification level for Kindergarten teachers is Certificate, while Primary level teachers require a Diploma. At Middle and Secondary school level the minimum qualification required from teachers is First Degree.

7.3.1 The Qualification of Pre-Primary (KG) School Teachers

Nationally, most of the teachers in Pre-Primary are qualified for the level, with 86.4% of them have Certificate and above.

The data below indicates that female teachers at pre-primary level surpasses male teachers

Table 7.7 Qualified Pre-Primary (KG) School Teachers by Region and Sex, 2024/25

Region	Number of Qualified Teachers			Qualified (%)		
	Male	Female	Total	Male	Female	Total
Afar	5	111	116	3.3	72.5	75.8

7.3.2 The Qualification of Primary School Teachers

Nationally, most of Primary school teachers are appropriately qualified, 93.8%.

The data indicates that the number of male teachers at primary schools are greater than female teachers.

Table 7.8 Qualified Primary School Teachers by Region and Sex, 2024/25

National	189,547	138,658	328,205	44.9	32.8	77.7

7.3.4 The Qualification of Secondary School Teachers

Out of the total number of teachers teaching in Secondary schools, teachers who fulfill the qualification for the level, First Degree and above, are 90.8%.

Note that, in all levels, the ESDP VI target and baseline could not be compared against the actual result because the qualification levels have been revised and modified after the values set by ESDP VI.

Table 7.11 Qualified Secondary School Teachers by Region and Sex, 2024/25

Region	Number of Qualified Teachers			Qualified (%)		
	Male	Female	Total	Male	Female	Total

7.4 Attrition of Teachers

Attrition can be used as one important piece of evidence about the number of teachers that have left the education system each year and their reasons for doing so, and it will be an input to understand the extent to

which it affects the teaching workforce. The attrition rate is calculated by dividing the number of teachers leaving the system/profession by the total number of teachers for that year.

7.4.1 Attrition of Teachers in Primary and Middle Schools

The national attrition rate for Primary and Middle school teachers in 2024/25 is 2.4%. Attrition rate is higher in male teachers than female. The highest attrition rate appeared exceptionally in Gambella, 7.3%

Table 7.12 Attrition of Teachers in Primary and Middle Schools by Region and Sex, 2024/25

Region	All Primary and Middle								
	Total Attrition			Teachers			Attrition Rate (%)

7.4.2 Attrition of Teachers in Secondary Schools

The attrition rate in secondary schools is summarized in Table 7.14 below. It has been found that the national attrition rate is 2.9%, with a significant increment from last year. The highest attrition rate is registered as 6.6% in Afar.

Table 7.14 Attrition of Teachers in Secondary Schools by Region and Sex, 2024/25

Region	Total Attrition			All Secondary Teachers			Attrition Rate (%)		
	Male	Female	Total	Male	Female	Total	Male	Female	Total

7.5 School Leaders and Supervisors

Along with aiming to quality education through appropriately qualified teachers, schools (at all levels) should also be managed by properly qualified and trained leaders. Closing the gender gap in educational leadership is also essential. With their representation already increasing in the executive branch of government, the number of female school leaders is expected to increase in education.

7.5.1 School Leaders and Supervisors in Primary and Middle Schools

In 2024/25, the total number of school leaders (supervisors, principals and vice principals) in Primary and Middle level are 45,980, from which only 17.2% of them are females, this shows an increase from last year which was 11.2%.

Table 7.16 School Leaders in Primary and Middle Schools by Region and Sex, 2024/25

Region	Principals		Vice Principals		CRC Supervisors		Total

7.5.2 School Leaders and Supervisors in Secondary Schools

The data on secondary school leadership shows that there are 6,714 principals, vice-principals and supervisors nationwide. Of this total, the female share is less than 7.2% showing a decrease from last year which was 8%, indicating a significant gender gap in leadership positions that is getting worse.

Table 7.17 School Leaders in Secondary Schools by Region and Sex, 2024/25

7.6 Qualified School Leaders and Supervisors

ESDP VI Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
Primary and Middle School Leaders appropriately qualified Female	11.2	19	10.1
Primary and Middle School Leaders appropriately qualified Male	55.2	81	56.9
Secondary School Leaders appropriately qualified Female	6.8	11	4.1
Secondary School Leaders appropriately qualified Male	56.0	89	54.3
Percentage of qualified Primary and Middle School Supervisors Female	5.0	27.2	8.0
Percentage of qualified Primary and Middle School Supervisors Male	72.8	72.8	75.7
Percentage of qualified Secondary School Supervisors (Total)	90	100	60.8

The qualification level of school leaders and supervisors is also an important aspect of improving the quality of education and leadership in a country. The minimum qualification required for school leaders and supervisors is First degree for Primary and Middle schools and Second degree for Secondary schools. The tables below show the level of qualified school leaders in Primary, Middle and Secondary education. The number of qualified school leaders in Somali is lower at 44.7% as seen referencing national average and other regions.

Table 7.18 Qualified School Leaders and Supervisors in Primary and Middle Schools by Region and Sex, 2024/25

Dire Dawa	12	2	11	2	3	-	30.3	5.3	35.5	30.0	-	30.0
Sidama	77	1	91	7	39	2	48.7	2.3	51.0	73.6	3.8	77.4
South West Ethiopia	86	1	44	3	51	2	41.1	1.3	42.4	89.5	3.5	93.0
Central Ethiopia	195	17	179	10	18	-	65.4	4.7	70.1	90.0	-	90.0
National	1,782	72	1,582	180	294	21	54.3	4.1	58.4	56.8	4.1	60.8

From the figures above, it has been seen that there is a huge gap in female leaders and supervisors. On the other hand, regions still lag to fulfill their need on qualified school leaders.

8. COLLEGES OF TEACHERS' EDUCATION

Colleges of teachers' education (CTEs) are basically aimed at equipping prospective teachers with the necessary knowledge, attitude, behaviours and skills they require to perform their tasks effectively in the classroom/school and to the wider community at large.

Currently there are 38 colleges of teachers' education throughout the country and 1 education university. CTEs provide two years' education and training in teaching and award a diploma through different programs.

To assess the capacities and quality of services at CTEs, the Ministry of Education collects educational data on an annual basis. With this, the 2024/25 CTEs data has been organized and collected on students, academic and administrative staff from all colleges of teachers' education in the country.

The response rate for this year is much better than the previous year's collection, with a return of completed data from all CTEs.

8.1 Enrolment in CTEs

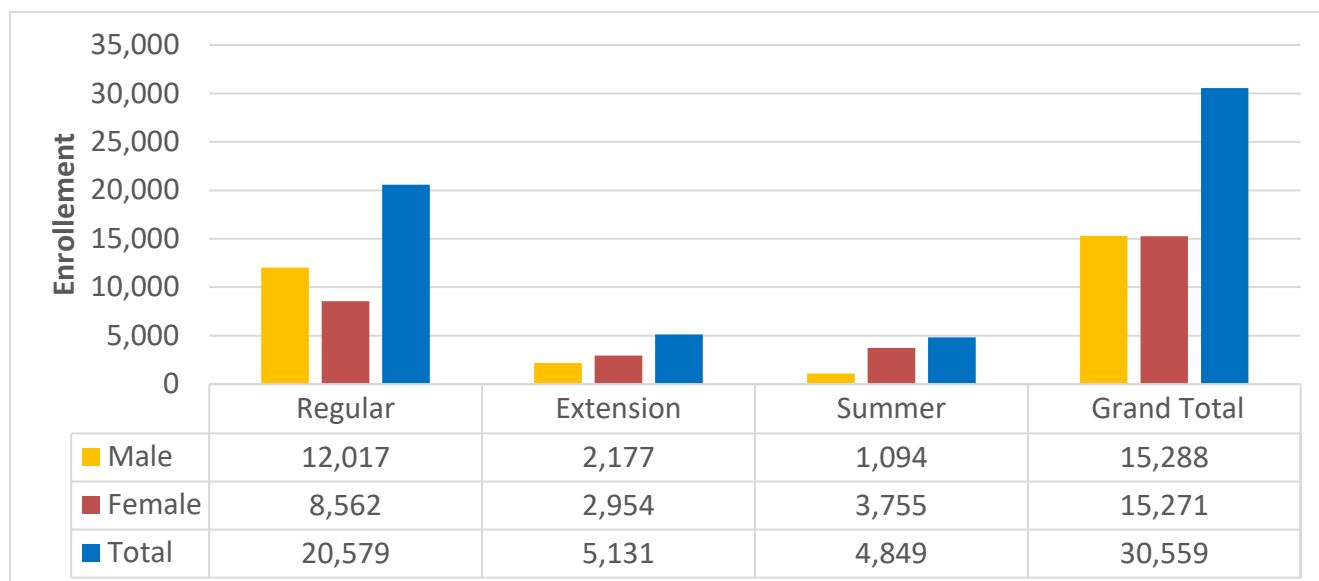

The total diploma enrolment in all programs (regular, extension and summer) for this year is 30,559, which is 38.83% increment from last year, a steady decline in enrollment starting from the year 2010 E.C. (2017/18) to 2015 E.C. (2022/23) and rise up by previous year. Moreover, CTEs are not registering first year students due to many reasons; some of them are in the process of upgrading the current diploma programs to degree.

Table 8.1 and Chart 8.1 show the diploma enrollment data disaggregated by program, year and sex. The gender share in the total enrollment shows that 50% are females. The highest proportion of enrollment is in regular programs, constituting 67.3%, followed by extension and summer programs with 16.8% and 15.9% respectively.

Table 8.1 Diploma Enrolments by Program, Year and Sex, 2024/25

Program	Year I		Year II		Year III		Year IV		Total		
	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female	Total
Regular	7883	5693	3313	2264	821	605	-	-	12,017	8,562	20,579
Extension	896	550	199	393	424	1027	658	984	2,177	2,954	5,131
Summer	467	2531	198	787	204	131	225	306	1,094	3,755	4,849
Grand Total	9,246	8,774	3,710	3,444	1,449	1,763	883	1,290	15,288	15,271	30,559

/Note: The years indicated above extends to year four as it includes Extension=Evening + Weekend/

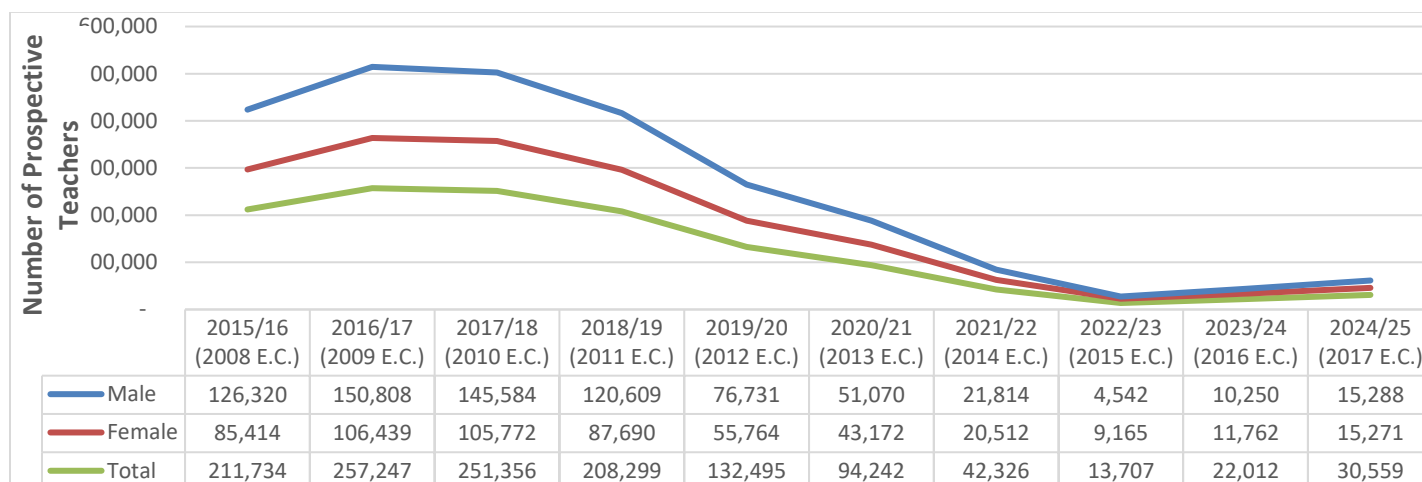

Chart 8.1 Diploma Enrolments by Program and Sex, 2024/25

With respect to modality, the majority of prospective teachers enrolled under New Modality, constituting 61.9% of the total enrollment, followed by linear modality and cluster modalities with 36.1% and 1.98% respectively.

Table 8.2 Diploma Enrolments by Program, Modality and Sex, 2024/25

Modality	Program						Total		
	Regular		Extension		Summer				
	Male	Female	Male	Female	Male	Female	Male	Female	Total

Cluster Modality	84	121	122	163	58	57	264	341	605
New Modality	6054	4580	523	3143	1843	2783	8,420	10,506	18,926
Total	12,017	8,562	1,094	3,755	2,177	2,954	15,288	15,271	30,559

Chart 8.2 below also shows enrollment trends in the last ten years. The chart shows that enrolment has been started to decrease from 2017/18 to 2022/23 and rise up starting from the previous year (2023/24).

Chart 8.2 Trends in Diploma Prospective Teachers' Enrolment, 2012/13-2024/25

On the other hand, enrollment in degree program has increased by 19.48 % from last year. The gender share in the total enrollment shows that 40.9% are female, which shows a slight gender gap with respect to equity. The highest proportion of enrollment shown in regular programs, constituting 41.1%, followed by extension (30.8%) and summer (28.1%) programs.

Table 8.3 Degree Enrollment by Program and Sex, 2024/25

Program	Year I		Year II		Year III		Year IV		Total		
	Male	Female	Male	Female	Male	Female	Male	Female	Male	Female	Total

8.2 Attrition of Prospective Teachers in CTEs

Data also collected on attrition of prospective teachers in CTEs. Though there are many reasons for attrition, the questionnaire was designed to incorporate six major reasons believed to be the most common.

Table 8.5 and Chart 8.3 below show the number and reason of diploma prospective teachers left the CTEs. It can be seen from the table and chart that “Dropout” is the reason with the highest figure, 76.8% of the total attrition, unlike the previous years’ reason in which “Academic Dismissals” was at the top.

Table 8.5 Attrition of Prospective Teachers by Program, Reason and Sex, 2024/25

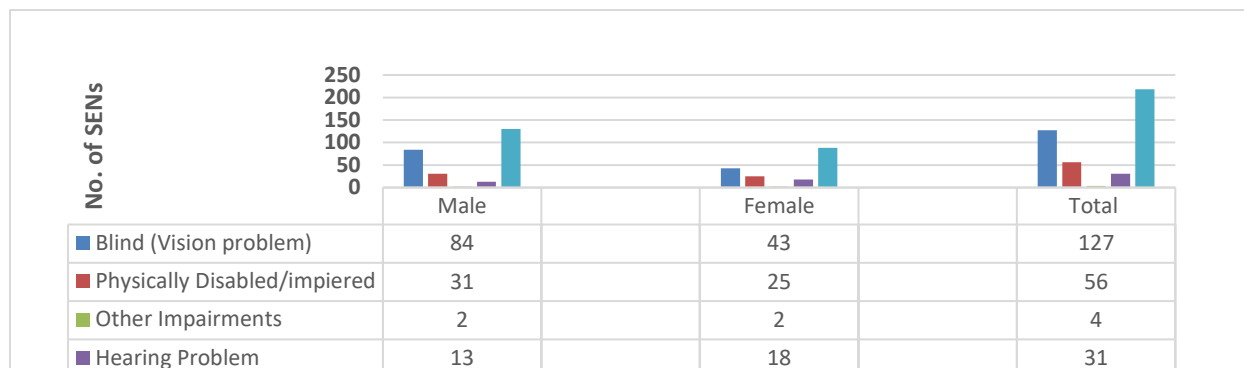

Reasons for attrition	Regular		Extension		Summer		Total		
	Male	Female	Male	Female	Male	Female	Male	Female	Total
Academic Dismissal	14	15	-	-	-	-	14	15	29
Complete dismissal	8	19	-	-	-	-	8	19	27

Chart 8.3 Attrition of Diploma Prospective Teachers by Reason and Sex, 2024/25

8.3 Diploma Prospective Teachers with SENs in CTEs

The survey tool also includes enrollment data with Special Educational Needs. Accordingly, data collected from CTEs on the number of prospective teachers enrolled with special educational needs. The data has been collected in four different categories; Blind/Vision problem, physically disabled, Hearing Problem and other Impairments.

Chart 8.4 below show a total of 218 prospective teachers are enrolled in 2024/25 with special education needs nationally in all programs, of which 88(40.4%) females; from which “Blind (Vision problem)” has the largest share, with 58.3%. However, the data used in this analysis has been subjected to better response rate than the previous year.

Chart 8.4 Prospective Teachers with SENs, 2024/25

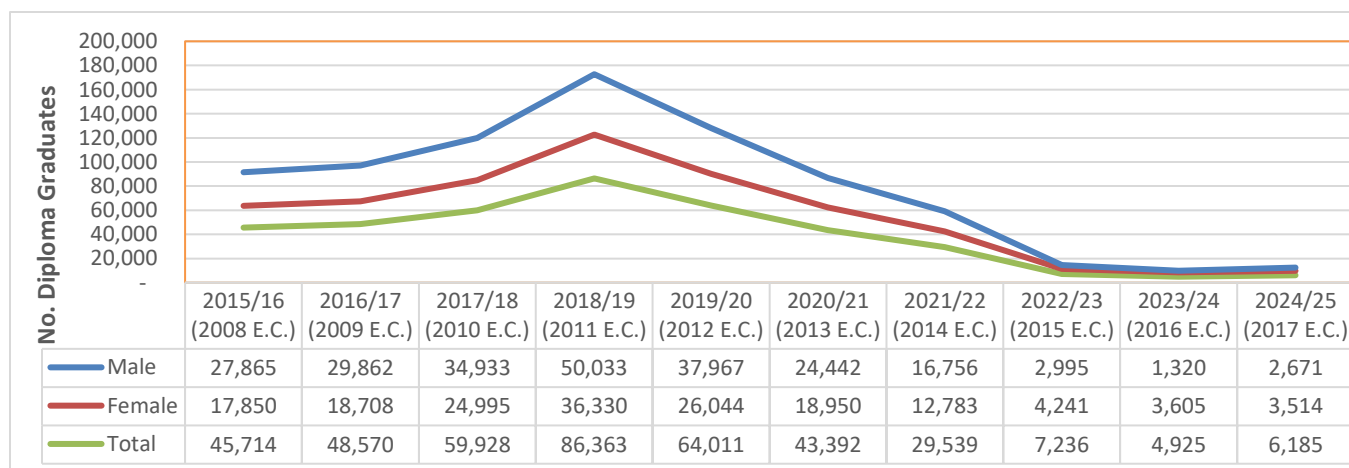

8.4 Graduates from CTEs

Table 8.6 shows that, the total number of Diploma graduates in all programs is 6,185, which is increase by 25.6% from last year. The regular program took the largest share, with 60.1% of the total graduates. With respect to modality, more than 65.9% of the graduates are from “New Modality” and “Linear Modality” constitutes the lowest share. The number of female graduates in all programs in this year is 56.8%.

Table 8.6 Diploma Graduates by Program, Modality and Sex, 2024/25

Modality	Program						Total		
	Regular		Extension		Summer				
	Male	Female	Male	Female	Male	Female	Male	Female	Total
Linear Modality	764	757	268	307	6	5	1,038	1,069	2,107

Total	2,020	1,700	499	1,087	152	727	2,671	3,514	6,185

Chart 8.5 below shows that, the trend in the number of graduates over the last ten years, with a steady decrement from 2018/19 to 2023/24 and rise up by this year.

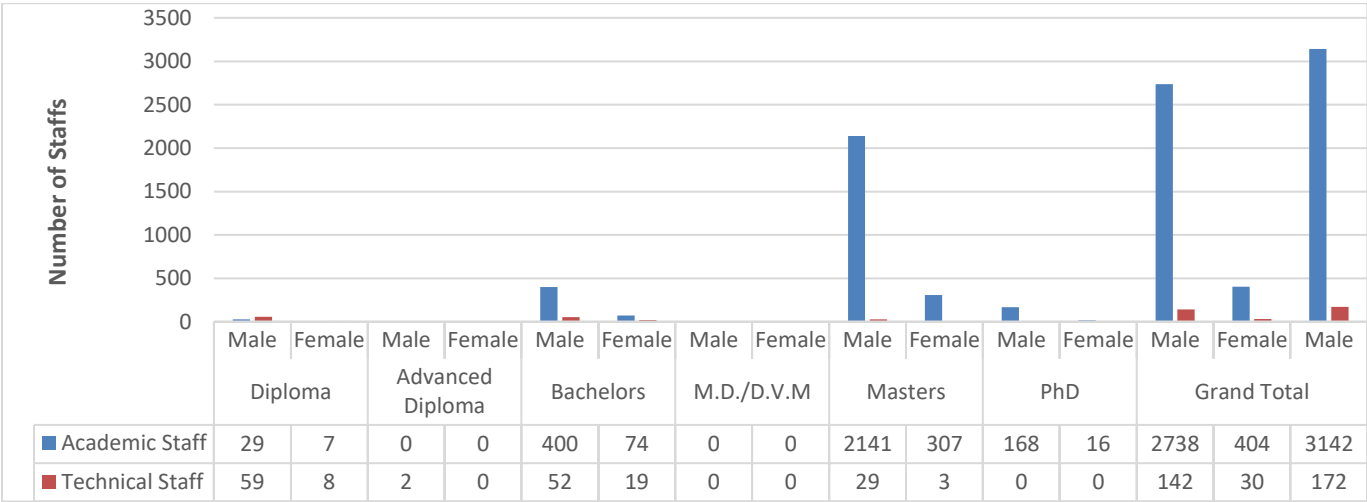

Chart 8.5 Trends in the Number of Diploma Graduates, 2014/15-2024/25

8.5 Staff in CTEs

8.5.1 Academic and Technical Staff

In 2024/25 both the academic and technical staff of CTEs nationally are 3,314, which shows 2.4 percentage points increment from last year. Among the academic staffs, the female share is only 13.1%. The chart below shows the staff distribution by qualification and sex.

Chart 8.6 Numbers of Staff by Qualification and Sex, 2024/25

When we look at the academic staff, the trend over the last ten years is shown in Chart 8.7 and it shows a steady increase over the time period, with the exception of 2016/17 and the last three years. The proportion of female staff members has remained very low for both academic and technical staff.

Chart 8.7 Trends in Academic Staff, 2014/15-2024/25

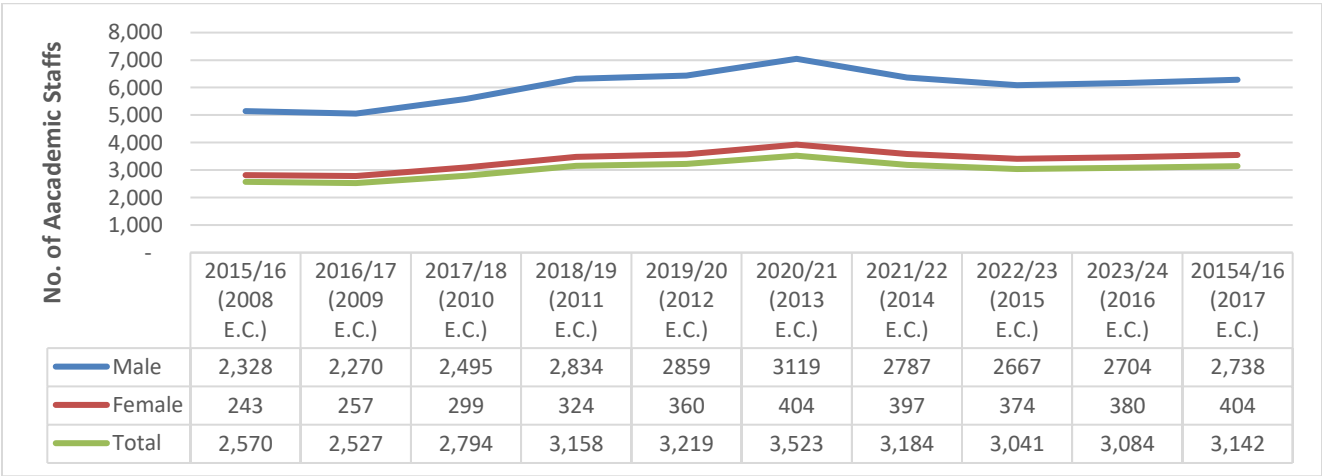

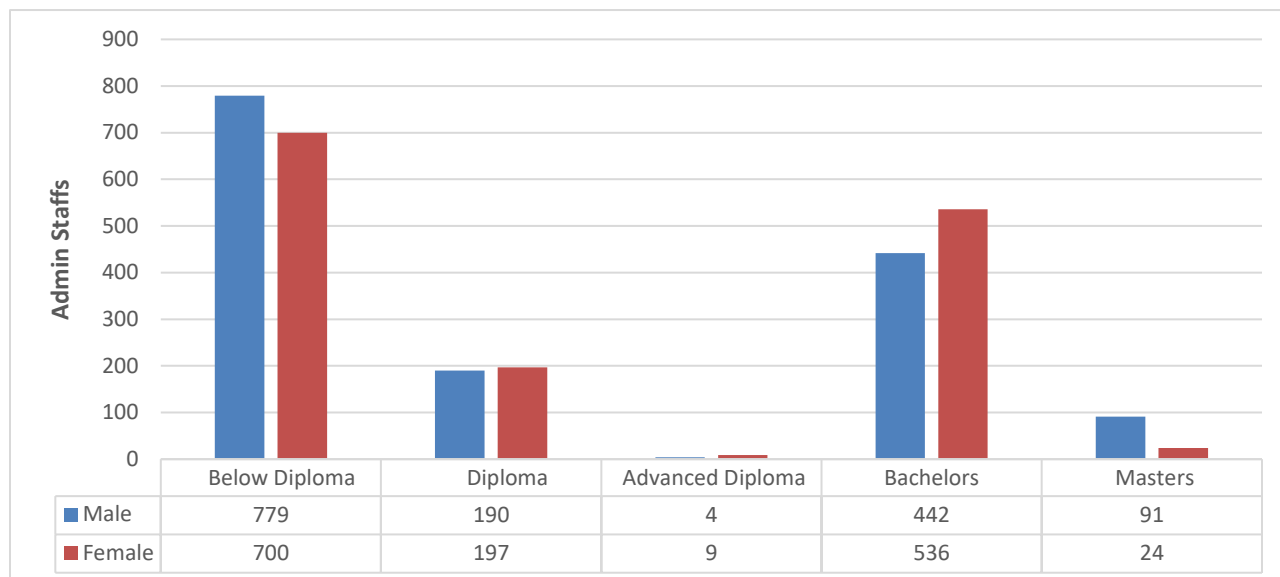

Table 8.7 Academic and Technical Staff by Rank and Sex, 2024/25

Staff by Rank	Academic Staff			Technical Staff		
	Male	Female	Total	Male	Female	Total
Geraduate Assistant I	63	17	80	17	8	25
Geraduate Assistant II	69	23	92	22	6	28
Assistant Lecturer	340	69	409	9	2	11
Lecturer	2,160	291	2,451	-	-	-
Assistant Professor	89	4	93	-	-	-
Associate Professor	4	-	4	-	-	-
Professor	-	-	-	-	-	-
Technical Assistant	1	-	1	11	3	14
Senior Technical Assistant	2	-	2	38	6	44
Chief Technical Assistant I	-	-	-	31	5	36
Chief Technical Assistant II	-	-	-	14	-	14
Others	10	-	10	-	-	-
Grand total	2,738	404	3,142	142	30	172

Academic rank is an equivalent way to measure the extent for the staff quality in addition to qualification. Majority of the academic staffs are “Lecturers”, with more than 78% of the total, followed by “Assistant Lecturer” (13%) and “Assistant Professor” (2.96%). The Technical staff is also ranked as indicated in the table 8.7 above.

8.5.2 Administrative Staff

Together with academic and technical staff, administrative staffs are playing an important role for the full functioning of CTEs. In this academic year, the total number of administrative staffs in all CTEs are 2,857; with the female share of 18.8%. From the total administrative staffs, 48.2% are Diploma and above. The chart below shows the staff distribution by qualification and sex.

Chart 8.8 Administrative Staff by Qualification and Sex, 2024/25

8.6 Staff Attrition

Similar to prospective teachers, data also collected on attrition of Academic, Technical and Administrative staffs in CTEs. In this academic year, the total staff attrition accounts to 155, which is large improvement (24%), when it is compared with the previous years.

Table 8.8 below shows the attrition of staffs that left CTEs with different reasons. It can be seen from the table that “Retirement” (25.2%) is higher in all Academic, followed by “Discipline” and “Resignation” Staffs.

Table 8.8 Staff Attrition by Reason and Sex, 2024/25

9. REFUGEE EDUCATION

According to UNHCR Ethiopia Monthly Statistics for July 31/ 2025, “Ethiopia is the third-largest refugee-hosting country in Africa, with 1,094,380 refugees and asylum-seekers. The majority originate from Sudan, South Sudan, Somalia and Eritrea.”

Ethiopia has a long history of hosting refugees based on the 1951 Convention on the Status of Refugees and its 1967 Protocol, and the Convention on Governing the Specific Aspects of Refugee Problems in Africa in 1969. The Ministry of Education calculates that more than 36.3% of them are children in the school-age children.

In the academic year (2024/25), a total of 164,178 (Male 91,100 and Female 73,078) refugee students enrolled in the different levels of General Education; from ECCE 47,543, Primary 83,458, Middle 17,850, and Secondary 15,327.

9.1 Introduction

In line with the commitments made in 2016 at the Leaders’ Summit in New York and the subsequent pledges made in 2019 and 2023 at the first and second Global Refugee Forum (GRF) to increase refugee access to national educational programs, the Government of Ethiopia continues to be a leading voice in the protection and assistance of refugees and asylum-seekers. The Refugee Proclamation No. 1110/2019, gives refugees and asylum-seekers a legal right to access pre-primary and primary education services in the same circumstances as nationals and provides the right to access secondary education, as resources allow. In December 2017, Ethiopia, as part of the IGAD member states, made a commitment to include refugee education into its national education system by signing the Djibouti Declaration. . Based on these commitments, the Government has included refugee education data into the MoE Education Management Information System (EMIS) since 2017 and the sixth series Education Sector Development Plan, 202-2025 (ESDP VI, 2020-2025) has included refugee education for the first time. The positive policy environment by the GoE opened up spaces for the World Bank funded project, Additional Financing on General Education Quality Improvement Program on /equity (AF-GEQIP-E), to advance inclusion of refugee secondary schools into the national system. Consequently, 11 Refugee Secondary schools have been transferred to MoE’s/REB management system and refugee schools are benefited from school grant funds.

Further to the enacting of the revised refugee proclamation and commitments made to advance access to education services, the adoption of Global Compact for refugees (GCR)/ (CRRF) in Ethiopia and the adoption of the 2017 Djibouti Declaration for Refugees, Returnees, IDPs, and Host Communities’ (as IGAD member state) have strengthened the implementation of these commitments at federal and regional state level. These in turn have paved the way for gradual inclusion of refugee education into the national education system reflected in the government policies and plans.

Concerted efforts from education partners in Ethiopia also contributed to the launch of projects including World Bank (WB) for improving access to education by refugee and host community children and youth in Gambella, Somali, Benishangul-Gumuz, Afar, and Amhara regions through provision of teaching and learning materials and capacity building/training of refugee teachers.

Therefore, this abstract is the 9th of its kind for refugee education to be included into the MoE’s Education Sector Annual Abstract (ESAA) and published annually. The 2024/25 ESAA continues capturing key indicators in the refugee education across different levels: pre-primary, primary and secondary. Moreover, it is important to

include time comparisons on how the provision of education in the refugee camps has evolved and possibly tertiary education data as well.

Multiple challenges still remain in refugee education when compared to the MoE standards. Challenges persist in the areas of access, quality of education, equity, teacher's qualification and supply and safe-learning environment. Despite increasing the share of students enrolled, close to 59% of the school-age children are still out of school. Majority of the schools in camps lack adequate infrastructure, electric power, WASH facilities, science laboratories and qualified teachers. Education materials like textbooks and other learning supplies are in short supply. The majority of the refugee schools still don't fulfill the minimum standards of a safe learning environment as per the government REB/MoE standards. The recent refugee influx from neighboring Somalia into the Doollo Zone of Somali Regional State of Ethiopia and the influx from Sudan into Amhara Region through Metema, Benishangul-Gumuz through kumruk and Gambella present additional education needs.

As stipulated in the National Refugee Education Strategy (2020-2025), the importance of EMIS for measuring progress of refugee education is a top priority for inclusion of refugee education in the national administration system. The Strategy recognizes the significance of partnership with MoE and other stakeholders converge more meaningfully towards sustainable refugee inclusion in the national system.

The inclusion of refugee education data in the National Statistical Abstract for the Ninth time is the result of a collaborative engagement between the MoE, the Refugees and Returnee Services (RRS), UNHCR, and UNICEF, WB and it marks an important milestone in the integration of refugee education into the national education system.

9.2 Summary Tables

Compared to June 2024, the school-age population decreased from 408,272 to 397,847 in April 2025 (Not including Shire). The decrease is mainly due to the fact that children at the age of 4 years were included in the June 2024 while the current school-age population considers children from age of 5 years. As this has to align with the national standards and policies, the school-age population for refugees has been modified. This will also have similar implication on the percentage of school-age population for refugees. The estimated school-age refugee population in the previous year was 46.8% while this year the share is estimated at 44%.

9.3 Early Childhood Care and Education (ECCE)

ESDP VI Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
Pre-Primary GER Female	58.6	81.9	78.7
Pre-Primary GER Male	63.7	83.8	81.6

In refugee education, Pre-primary Gross Enrolment Ratio (GER) calculates the number of students enrolled in pre-primary education, regardless of age, expressed as a percentage of the official pre-primary school-age population (ages 5-6). This shows the general level of participation in pre-primary education, regardless of whether students are of the correct school age.

Table 9.4 Gross Enrollment Ratio in ECCE, 2024/25

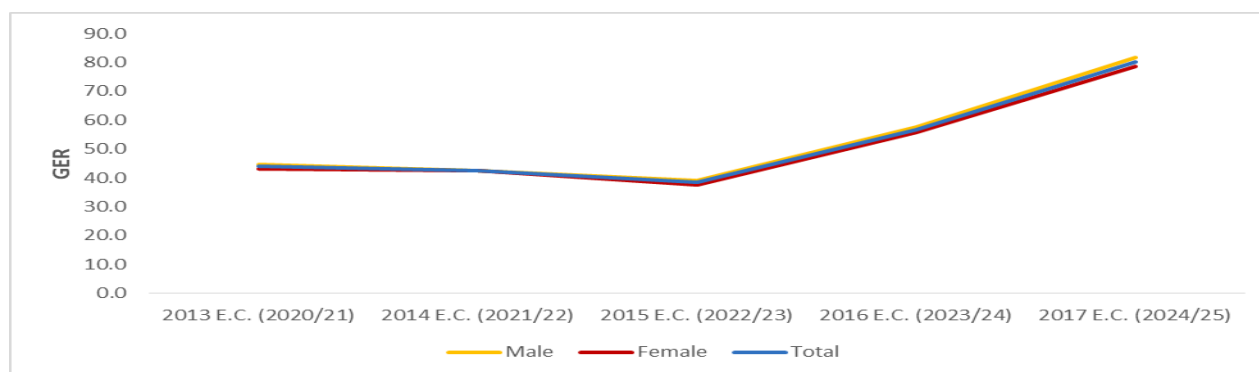

Location	School Age Population (Ages 5-6)			Gross Enrollment (All Age)			GER (%)			GPI
	Male	Female	Total	Male	Female	Total	Male	Female	Total

Gambella	13,449	13,141	26,590	13,374	12,693	26,067	99.4	96.6	98.0	0.97
Gonder	364	541	905	496	492	988	136.3	90.9	109.2	0.67
Total	29,897	29,409	59,306	24,384	23,159	47,543	81.6	78.7	80.2	0.97

Chart 9.4 Gross Enrollment Ratios in ECCE, 2024/25

According to Table 9.4, the overall GER in ECCE was 80.2% with considerable variations across the host regions. Assosa and Gonder higher performed a GER of 123.9% and 109.2% respectively, Semera and Jigjiga low score than others, which are less than average by 51.6% and 50.7% of entire GER. The overall GER in ECCE has been significant increased by 67.3 percentage points compared with the 2023/2024 academic year as shown in the chart below. GPI for this year is 0.97, has same score from the previous year.

Note that; Majority of the ECCE schools in the camps are community-based schools largely supported by national and international Non-Governmental Organizations.

Chart 9.1 GER trends in ECCE, 2020/21-2024/25

In the above Chart 9.1, trends in GER of ECCE shows from 2020/21 to 2022/23, shown declined. Then it started to increase from 2023/24, for two consecutive years.

The majority of children enrolled in Pre-Primary education are not in the appropriate school age for the level, as it shows a significant difference between GER and NER

Tables 9.5 and Chart 9.3 below present data on age-specific enrollment of students alongside with the official school-age population size and the corresponding Net Enrollment Rate (NER). The overall NER stands at 53.8%, which is far from the Gross Enrollment Rate (GER) of 80.2%. This discrepancy indicates a significant number of both over-aged and under-aged children enrolled at this level. Therefore, it is crucial for the sector to focus on bridging the gap between GER and NER while also enhancing the GPI.

Table 9.5 Net Enrolment and NER by Region and Sex, 2024/25

Semera	1,551	1,558	3,109	319	332	651	20.6	21.3	20.9
Assosa	2,723	2,670	5,393	2,184	2,041	4,225	80.2	76.4	78.3
Dollo Ado	8,256	8,089	16,345	3,151	2,916	6,067	38.2	36.0	37.1
Jigjiga	3,554	3,410	6,964	513	558	1,071	14.4	16.4	15.4
Gambella	13,449	13,141	26,590	9,650	9,241	18,891	71.8	70.3	71.0
Gonder	364	541	905	496	492	988	136.3	90.9	109.2
Total	29,897	29,409	59,306	16,313	15,580	31,893	54.6	53.0	53.8

9.4 Primary and Middle Level Education

ESDP VI Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
Primary (Grades 1-8) GER Female	54.9	74.4	39.3
Primary (Grades 1-8) GER Male	78.6	90.5	48.0

9.4.1. Apparent Intake Rate (AIR)

Apparent Intake Rate (AIR) is the percentage of new entrants to grade 1 (irrespective of age) compared against the population age of 7. It provides the rate of enrolled students who are under or over the official school admission age.

Table 9.6 AIR by Host Region and Sex, 2024/25

Location	School Age Population (Age 7)			Apparent Intake (All Age)			AIR (%)			GPI
	Male	Female	Total	Male	Female	Total	Male	Female	Total	
Semera	1,167	1,154	2,321	270	201	471	23.1	17.4	20.3	0.8
Assosa	1,392	1,365	2,757	1,935	1,670	3,605	139.0	122.3	130.8	0.9
Dollo Ado	4,093	3,966	8,059	2,385	2,176	4,561	58.3	54.9	56.6	0.9
Jigjiga	1,582	1,491	3,073	283	312	595	17.9	20.9	19.4	1.2
Gambella	6,210	5,952	12,162	6,631	5,893	12,524	106.8	99.0	103.0	0.9
Gonder	162	231	393	343	342	685	211.7	148.1	174.3	0.7
Total	14,606	14,159	28,765	11,847	10,594	22,441	81.1	74.8	78.0	0.92

From the above table and chart, one can see the overall refugee apparent intake rate is 78% and the achievement for Gonder and Assossa were 174.3 % and 130.8% respectively, is higher than the overall average and the rest of the hosting regions. This might be due to overage and underage students. In Other hand, Jigjiga and Semera achieves the lower AIR, this implies there needs an immediate intervention to narrow the gap in Jigjiga and Semera refugee camps. GPI is the highest result in Jigjiga with above 1, and lower in Gonder and Semera with 0.7 and 0.8 respectively.

9.4.2. Net Intake Rate (NIR)

Net Intake Rate is a similar indicator to AIR, but it only looks at those children who are of the correct age to enter grade 1. It is the proportion of 7-year-old children who enroll in grade 1.

Table 9.7 NIR by Host Region and Sex, 2024/25

Location	School Age Population (Age 7)			Net Intake (Age 7)			NIR (%)			GPI
	Male	Female	Total	Male	Female	Total	Male	Female	Total	
Semera	1,167	1,154	2,321	163	103	266	14.0	8.9	11.5	0.6
Assosa	1,392	1,365	2,757	1,008	819	1,827	72.4	60.0	66.3	0.8
Dollo Ado	4,093	3,966	8,059	1,024	936	1,960	25.0	23.6	24.3	0.9
Jigjiga	1,582	1,491	3,073	185	160	345	11.7	10.7	11.2	0.9
Gambella	6,210	5,952	12,162	3,286	2,860	6,146	52.9	48.1	50.5	0.9
Gonder	162	231	393	258	274	532	159.3	118.6	135.4	0.7
Total	14,606	14,159	28,765	5,924	5,152	11,076	40.6	36.4	38.5	0.90

As shown in the table above, the average NIR is 38.5% with large regional disparities, in which Gonder scored 135.4% while Jigjiga 11.2%.

9.4.3. Gross Enrollment Ratio (GER) in Primary and Middle Education

Gross Enrolment Ratio (GER) calculates the total number of children that enrolled in a given grade range irrespective of their age as a percentage of the school age population.

Based on the new education road map, Primary education covers Grades 1-6 and Middle level is Grades 7-8. GER is significantly higher in Primary than Middle level education, which shows many children are unable to continue their education to Middle level.

Table 9.8 GER in Primary Level by Host Region and Sex, 2024/25

Location	School Age Population (7-12)			Gross Enrollment (G1-6)			GER (%)			GPI
	Male	Female	Total	Male	Female	Total	Male	Female	Total	
Semera	6,417	6,343	12,760	868	715	1,583	13.5	11.3	12.4	0.8
Assosa	7,685	7,319	15,004	8,329	6,844	15,173	108.4	93.5	101.1	0.9
Dollo Ado	22,553	22,104	44,657	7,263	6,661	13,924	32.2	30.1	31.2	0.9
Jigjiga	9,061	8,882	17,943	3,439	3,179	6,618	38.0	35.8	36.9	0.9
Gambella	43,415	42,952	86,367	23,896	19,477	43,373	55.0	45.3	50.2	0.8
Gonder	948	1,396	2,344	1,413	1,374	2,787	149.1	98.4	118.9	0.7
Total	90,079	88,996	179,075	45,208	38,250	83,458	50.2	43.0	46.6	0.86

The overall Primary (Grade 1-6) GER for the academic year 2024/25 is 46.6%, showing a 2 percentage points decrement from last year. The highest GER scored by Gonder with 118.9% and the lowest was 12.4% in Semera.

Table 9.9 GER in Middle Level by Host Region and Sex, 2024/25

Location	School Age Population (13-14)			Gross Enrollment (G7-8)			GER (%)			GPI
	Male	Female	Total	Male	Female	Total	Male	Female	Total	
Semera	2,167	2,060	4,227	154	62	216	7.1	3.0	5.1	0.42
Assosa	1,978	1,780	3,758	2,241	1,282	3,523	113.3	72.0	93.7	0.64
Dollo Ado	5,694	5,469	11,163	1,093	1,024	2,117	19.2	18.7	19.0	0.98
Jigjiga	2,471	2,350	4,821	851	786	1,637	34.4	33.4	34.0	0.97
Gambella	14,135	14,036	28,171	6,464	3,829	10,293	45.7	27.3	36.5	0.60
Gonder	290	430	720	25	39	64	8.6	9.1	8.9	1.05
Total	26,735	26,125	52,860	10,828	7,022	17,850	40.5	26.9	33.8	0.66

The analysis shows that the GER at Middle level for the academic year 2024/25 is 33.8% showing a 4.6 percentage points decrement from last year. The table above shows that Assosa scored the highest and Semera the lowest.

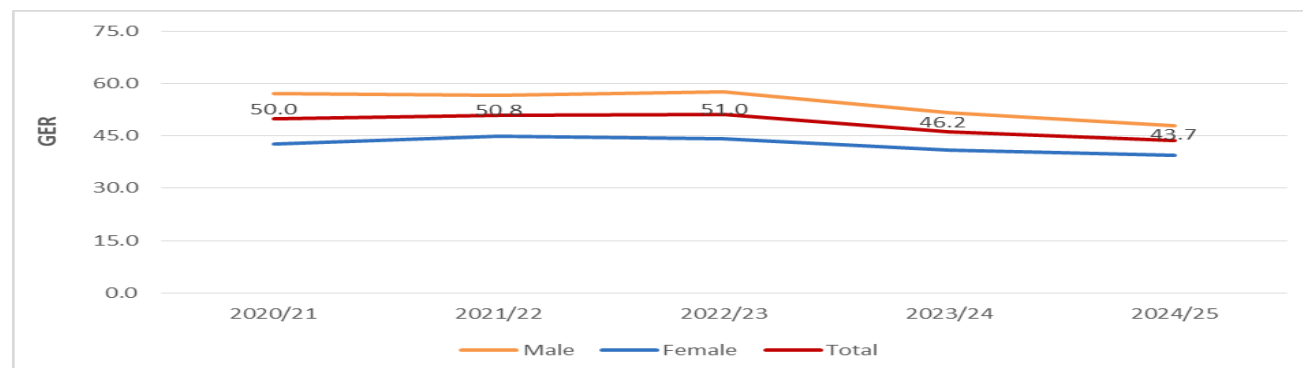

There is a gap in GPI between Primary and Middle level education. GPI in primary is 0.86, whereas the index is 0.66 in Middle level showing male enrollment is highly in favor in Middle level than Primary.

Table 9.10 GER in Primary and Middle Level (G1_8 by Host Region and Sex, 2024/25)

Location	School Age Population (7-14)			Gross Enrollment (G1-8)			GER (%)			GPI
	Male	Female	Total	Male	Female	Total	Male	Female	Total	
Semera	8,584	8,403	16,987	1,022	777	1,799	11.9	9.2	10.6	0.78
Assosa	9,663	9,099	18,762	10,570	8,126	18,696	109.4	89.3	99.6	0.82
Dollo Ado	28,247	27,573	55,820	8,356	7,685	16,041	29.6	27.9	28.7	0.94
Jigjiga	11,532	11,232	22,764	4,290	3,965	8,255	37.2	35.3	36.3	0.95
Gambella	57,550	56,988	114,538	30,360	23,306	53,666	52.8	40.9	46.9	0.78
Gonder	1,238	1,826	3,064	1,438	1,413	2,851	116.2	77.4	93.0	0.67
Total	116,814	115,121	231,935	56,036	45,272	101,308	48.0	39.3	43.7	0.82

Apart from the results shown in Primary and Middle level education, the GER and GPI for Grades 1-8 is shown to be 43.7%, is showing a 2.5 percentage points decrement from last year. GPI increased by 0.03 from last year.

Trends in the GER of Primary and Middle education (Grades 1-8) show a steady decline for the last three years of the period.

Chart 9.2 Trends in GER for Grades 1-8, 2020/21-2024/25

9.4.4. Net Enrollment Ratio (NER) in Primary and Middle Education

The Net Enrolment Ratio (NER) is a measure of students' enrolment who are in the official age group for the given level of education, i.e., in Ethiopia context, it only looks at 7 to 14 years' old that are enrolled in Primary and Middle education. Similar to the GER, NER is higher in Primary than Middle schools, with a gap of 21.7 percentage points.

Table 9.11 NER in Primary Level by Host Region and Sex, 2024/25

Location	School Age Population (7-12)			Net Enrollment (G1-6)			NER (%)		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Semera	6,417	6,343	12,760	740	639	1,379	11.5	10.1	10.8
Assosa	7,685	7,319	15,004	5,762	4,702	10,464	75.0	64.2	69.7
Dollo Ado	22,553	22,104	44,657	5,910	5,439	11,349	26.2	24.6	25.4
Jigjiga	9,061	8,882	17,943	3,410	3,152	6,562	37.6	35.5	36.6
Gambella	43,415	42,952	86,367	18,619	15,497	34,116	42.9	36.1	39.5
Gonder	948	1,396	2,344	1,221	1,208	2,429	128.8	86.5	103.6
Total	90,079	88,996	179,075	35,662	30,637	66,299	39.6	34.4	37.0

Table 9.10 above shows that the total NER for Primary education is 37%. Though there is a big gap of NER in primary. The highest NER is in Gonder (103.6%) and the lowest is in Semera (10.8%).

For Middle level, as shown in Table 9.11, the total NER is performed low, (13.6%) with a maximum score of 30.5% in Jigjiga.

Table 9.12 NER in Middle Level by Host Region and Sex, 2024/25

Location	School Age Population (13-14)			Net Enrollment (G7-8)			NER (%)		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Semera	2,167	2,060	4,227	75	41	116	3.5	2.0	2.7
Assosa	1,978	1,780	3,758	530	340	870	26.8	19.1	23.2
Dollo Ado	5,694	5,469	11,163	448	448	896	7.9	8.2	8.0
Jigjiga	2,471	2,350	4,821	759	711	1,470	30.7	30.3	30.5
Gambella	14,135	14,036	28,171	2,417	1,367	3,784	17.1	9.7	13.4
Gonder	290	430	720	10	21	31	3.4	4.9	4.3
Total	26,735	26,125	52,860	4,239	2,928	7,167	15.9	11.2	13.6

In addition to Primary and Middle levels, it will be good to see the NER of Grades 1-8, and it has been seen from the table below that total NER is 31.7% with notable variations across Host Regions.

Table 9.13 NER for Grades 1-8, 2024/25

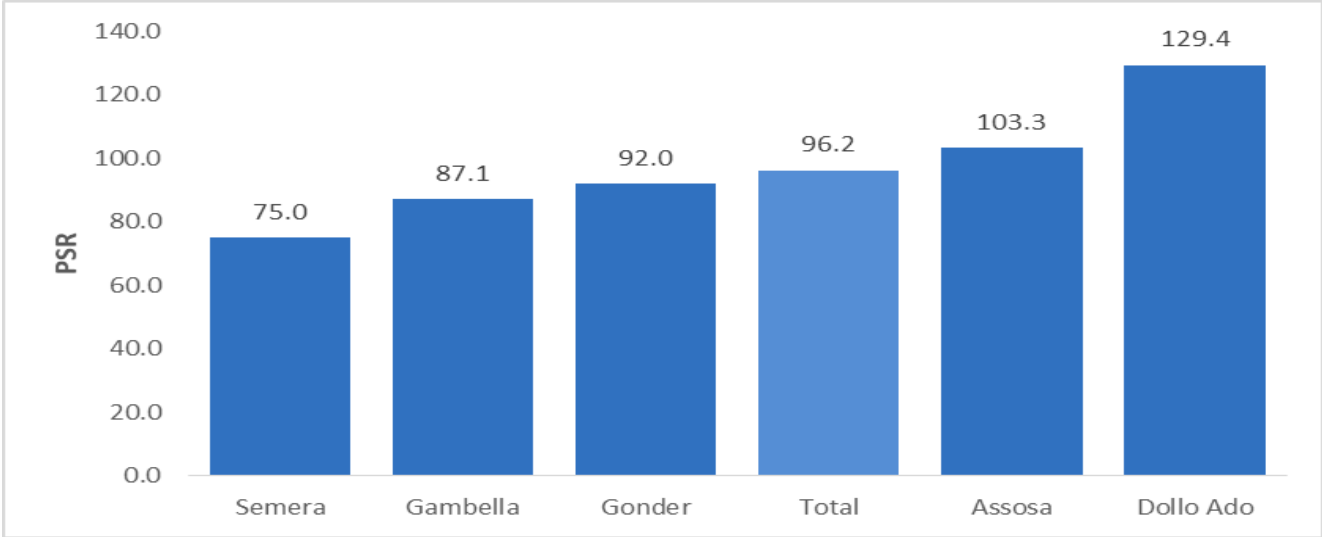

Location	School Age Population (7-14)			Net Enrollment (G1-8)			NER (%)		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Semera	8,584	8,403	16,987	815	680	1,495	9.5	8.1	8.8
Assosa	9,663	9,099	18,762	6,292	5,042	11,334	65.1	55.4	60.4
Dollo Ado	28,247	27,573	55,820	6,358	5,887	12,245	22.5	21.4	21.9
Jigjiga	11,532	11,232	22,764	4,169	3,863	8,032	36.2	34.4	35.3
Gambella	57,550	56,988	114,538	21,036	16,864	37,900	36.6	29.6	33.1
Gonder	1,238	1,826	3,064	1,231	1,229	2,460	99.4	67.3	80.3
Total	116,814	115,121	231,935	39,901	33,565	73,466	34.2	29.2	31.7

9.4.5. Pupil Section and Pupil Teacher Ratios

Among the important indicators to measure efficiency and quality in the education system is calculating the ratios between students and the corresponding class rooms and teachers. Lower Pupil-Section and Pupil-Teacher ratios are signs for a better quality of teaching-learning, apart from other factors such as qualification of teachers, supply of education materials and the like.

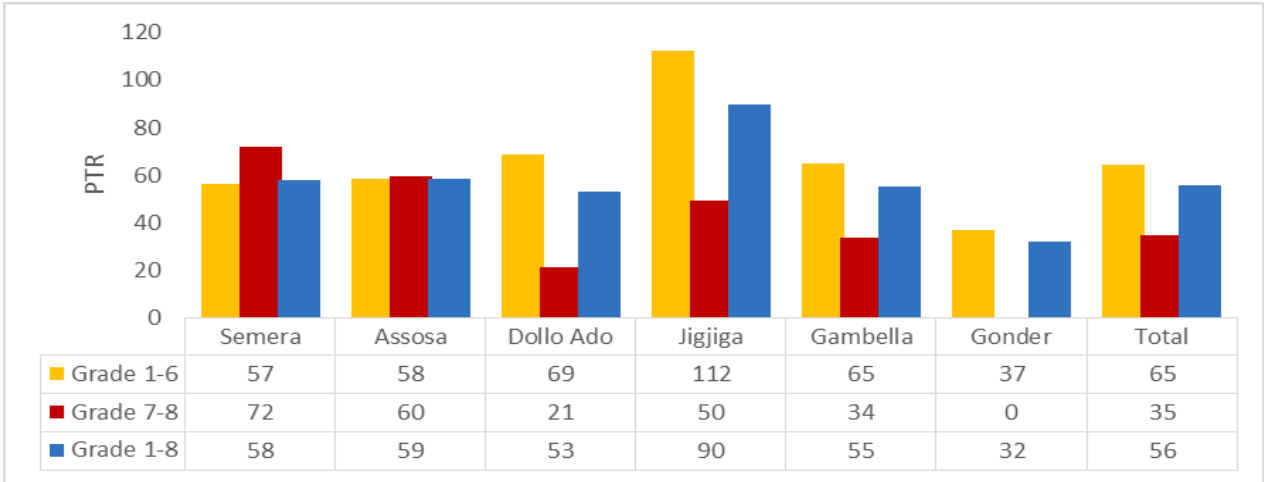

The total PSR for 2024/25 academic year in Primary and Middle levels (Grades 1-8) is 96.2. Children in Semera is relatively better learning environment compared to other locations, with PSR of 75.

Chart 9.3 PSR in Primary and Middle Schools (Grades 1-8) by Location, 2024/25

Pupil-Teacher ratio for Primary level this year is 65, which is outlying to appropriate with the National standard, set to be 50. PTR is low in Gonder with 37, and highest in Jigjiga with 112, indicating a shortage of teachers in Jigjiga compared to the rest four Host regions. The table below shows PTR by levels of education.

Chart 9.4 PTR by Levels of Education and Location, 2024/25

In the Middle level (Grades 7-8) PTR of this year is 35, which is a positive indication for quality education. PTR is low in Dolo Ado with 21, and highest in Semera with 72, indicating above the standard set for the level and showing a shortage of teachers in Semera compared to the rest of the Host regions.

*Dabat has not middle level student.

On the other hand, PTR of Grades 1-8 in this year is 56, which is a bit higher than last year. PTR in Grades 1-8 is low in Gonder with 46, and highest in Jigjiga with 90.

9.4.6. Internal Efficiency

In this section we evaluate the efficiency of refugee education by tracing pupils' flow through the education system, which will help us to clearly identify where exactly the problem of wastage in the education system lays, by applying the Reconstructed Cohort Analysis. To apply this method, we organized enrollment data on pupils by grade for two consecutive years; 2016 E.C. (2023/24) and 2017 E.C. (2024/25) academic year, and repeater and re-admitters data by grade for the latter year, 2017 E.C. (2024/25).

The three rates, Promotion, Repetition and Dropout rates are the key to show paths of student flow from grade to grade and they characterize the degree of efficiency of the education system of producing graduates. The table below shows the overall flow rate of refugee students

Table 9.14 Flow Rate for Refugee Education (Grades 1-8), 2024/25

	G1	G2	G3	G4	G5	G6	G1-6	G7	G8	G7-8	G1-8
Male											
Promotion rate	0.61	0.90	0.89	0.86	0.81	0.77	0.79	0.85	0.53	0.69	0.77
Repetition rate	0.01	0.01	0.01	0.02	0.02	0.02	0.01	0.01	0.06	0.04	0.02
Dropout rate	0.38	0.09	0.09	0.12	0.17	0.22	0.20	0.13	0.41	0.27	0.21
Female											
Promotion rate	0.62	0.91	0.83	0.83	0.78	0.78	0.77	0.80	0.44	0.63	0.75
Repetition rate	0.01	0.02	0.02	0.02	0.02	0.02	0.02	0.02	0.06	0.03	0.02
Dropout rate	0.37	0.07	0.15	0.15	0.20	0.20	0.21	0.18	0.50	0.34	0.23
Total											
Promotion rate	0.62	0.90	0.87	0.85	0.80	0.77	0.78	0.83	0.50	0.67	75.98
Repetition rate	0.01	0.02	0.01	0.02	0.02	0.02	0.01	0.02	0.06	0.04	1.85
Dropout rate	0.37	0.08	0.12	0.14	0.18	0.21	0.20	0.15	0.44	0.30	22.16

As shown above, the total dropout rate of refugee students was high at grade 8, and 1; 44% and 37% respectively. Which implies the majority of the wastage lies at the beginning and final grade of the Primary and Middle level education.

Using the above result, in order to further investigate the efficiency of refugee education in Ethiopia, the reconstructed cohort analysis was applied.

The result presented below in Chart 9.7 shows the reconstructed cohort analysis of total (sum of male and female) number of pupils who eventually graduate from the final primary school grade i.e., grade 8 and promoted to the next higher grade; i.e., grade 9. According to the cohort, 119 pupils who started schooling eight years back graduate without repeating any one grade during their stay in school. Another 20 and 2 pupils graduated after repeating once and twice respectively during their stay in school. The total number of graduates for the cohort are 142. In other word, about 14.2% of pupils who started the cohort eight years ago were eventually able to complete eight years of education and eligible to continue schooling in the next level.

Chart 9.5 Reconstructed Cohort Analysis for Total (Male + Female)

9.5 Secondary Level Education

ESDP VI Indicator	2018/19 Baseline	2024/25 Target	2024/25 Actual
Secondary GER Female	7.2	50.4	8.1
Secondary GER Male	17.2	57.6	19.7

As has been done in Primary and Middle level education, Gross and Net enrollment rates are the fundamental measures of access in secondary education.

9.5.1 Gross and Net Enrollment Ratios in Secondary Education

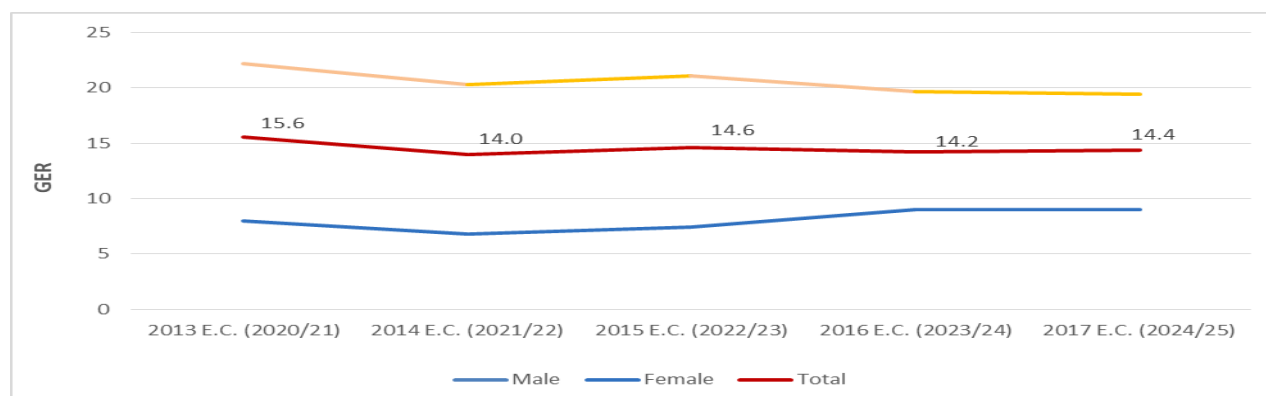

The total GER in secondary level for this academic year is 14.4%, which is a 0.2 percentage point increase from last year. According to Table 9.15 below, only 15,327 of the 106,606 pupils who could be secondary school-aged refugees are actually enrolled in secondary education. It is crucial to remember that the vast majority of pupils who should be in secondary school are either still in primary school, have dropped out, or have never attended any formal schooling. It should be noted that, in Semera and Dabat there is no secondary enrollment, while there is a significant number of school age population available, and this is one major reason for the lower achievement of GER.

On the other hand, GPI for this academic year is 0.46, which shows a slight increment from last year, 0.05 percentage point. Better GPI has been observed in Dolo Ado, with 0.70 this year.

Table 9.15 GER in Secondary Level by Location and Sex, 2024/25

Location	School Age Population (15-18)			Gross Enrollment (G9-12)			GER (%)			GPI
	Male	Female	Total	Male	Female	Total	Male	Female	Total	
Semera	4,100	3,796	7,896	-	-	-	-	-	-	
Assosa	4,379	3,612	7,991	712	311	1,023	16.3	8.6	12.8	0.53
Dollo Ado	15,185	14,639	29,824	1,298	874	2,172	8.5	6.0	7.3	0.70
Jigjiga	4,516	4,806	9,322	287	195	482	6.4	4.1	5.2	0.64
Gambella	26,073	23,976	50,049	8,383	3,267	11,650	32.2	13.6	23.3	0.42
Gonder	643	881	1,524	-	-	-	0.0	0.0	0.0	
Total	54,896	51,710	106,606	10,680	4,647	15,327	19.5	9.0	14.4	0.46

The GER trend for secondary schools shows, dropped down from 2021/22 and a steady increment from last years and there is a huge gap in enrollment and population age.

Chart 9.6 Trends in GER for Secondary Level, 2020/21-2024/25

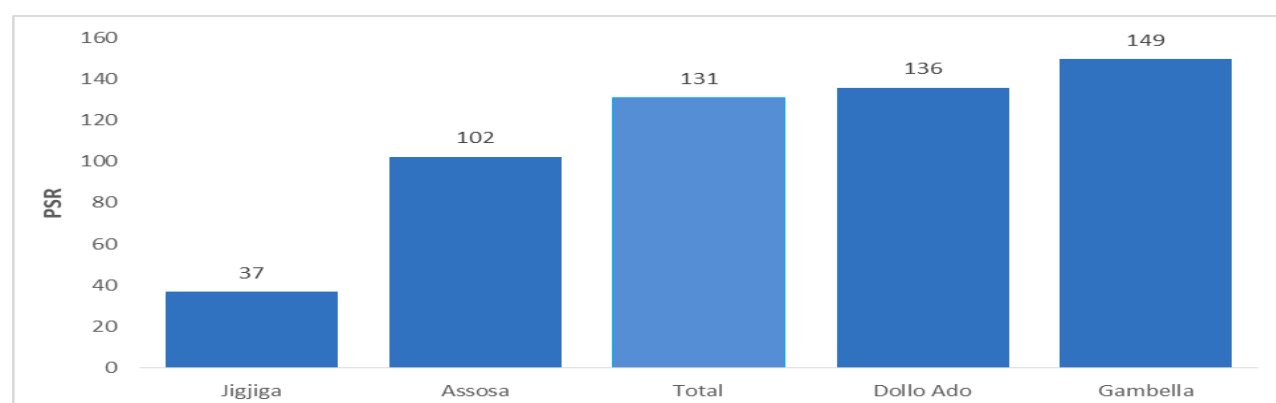

The Net Enrollment Ratio is also too low in secondary schools, with only 6.4%, which is increased by 0.1 percentage points from last year. Jigjiga performs better in NER, with 9.3%, while there is no enrollment in Semera and gonder due to absence of secondary refugee school.

Table 9.16 NER in Secondary Level by Location and Sex, 2023/24

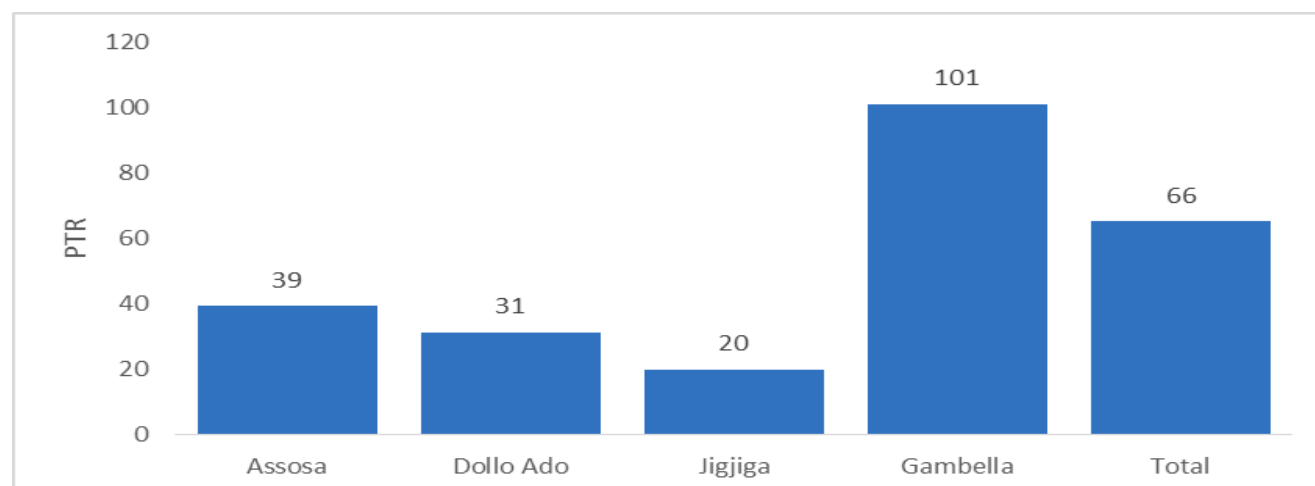

Location	School Age Population (15-18)			Net Enrollment (G9-12)			NER (%)		
	Male	Female	Total	Male	Female	Total	Male	Female	Total
Semera	4,100	3,796	7,896	-	-	-	-	-	-
Assosa	4,379	3,612	7,991	236	145	381	5.4	4.0	4.8
Dollo Ado	15,185	14,639	29,824	870	564	1,434	5.7	3.9	4.8
Jigjiga	4,516	4,806	9,322	228	139	367	5.0	2.9	3.9
Gambella	26,073	23,976	50,049	3,385	1,281	4,666	13.0	5.3	9.3
Gonder	643	881	1,524	-	-	-	-	-	-
Total	54,896	51,710	106,606	4,719	2,129	6,848	8.6	4.1	6.4

9.5.2 Pupil Section and Pupil Teacher Ratios

The total PSR in secondary schools for this academic year is 131, which is too far from the national standard set for the level, i.e. 40. Jigjiga is in a best learning environment than others, with the PSR value of 37.

Chart 9.7 PSR in Secondary Level by Location, 2024/25

On the other hand, the total Pupil-Teacher ratio for secondary level in this year is 66, which is a 3 percentage point decrease from last year, which was 69. The Chart below shows the PTR across locations.

Chart 9.8 PTR in Secondary Level by Location, 2024/25

9.6 Special Needs Education

9.6.1 Enrolment of Students with SENs in ECCE

Pre-primary education is essential for all children particularly for students with disabilities. In pre-primary education they learn different skills which are important for their primary education and future life such as Braille reading and writing, mobility, sign language and different life skills. Of course, they learn other important aspects of Pre-Primary education including social skills, communication skills, cognitive skills, motor skills and skills which all children attending pre-primary education should acquire.

The population figures in the calculation of Gross and Net Enrollment Ratios have been based on the same assumption used in ESDP VI that 15% of the population live with disabilities based on a World Health Organization estimate. Pre-Primary Education includes all the four modalities (KG, O-Class, C2C and ASR).

Table 9.17 Pre-Primary GER for Students with SENs by Host Region and Sex, 2024/25

Location	Population with SENs			Students with SENs			GER (%)			GPI
	(Ages 5-6)						Male	Female	Total	
	Male	Female	Total	Male	Female	Total	Male	Female	Total	
Semera	233	234	466	6	1	7	2.6	0.4	1.5	0.2
Assosa	408	401	809	33	17	50	8.1	4.2	6.2	0.5
Dollo Ado	1,238	1,213	2,452	25	18	43	2.0	1.5	1.8	0.7
Jigjiga	533	512	1,045	11	2	13	2.1	0.4	1.2	0.2
Gambella	2,017	1,971	3,989	78	52	130	3.9	2.6	3.3	0.7
Gonder	55	81	136	15	11	26	27.5	13.6	19.2	0.5
Total	4,485	4,411	8,896	168	101	269	3.7	2.3	3.0	0.6

According to Table 9.17 above, the Gross Enrolment Ratio for Pre-Primary is 3%, which shows that children with disabilities in refugees are not yet attending Pre-Primary education, or not wisely recorded.

According to type of disability, “Physical Disability” is the highest figure with 60.2% of the total, followed by “Visual Impairment” and “Hearing Impairment” 21.6% and 10%, respectively. The table below shows the detailed enrollment figure by type and level of disability for preprimary School.

Table 9.18 Enrollment of Students with SENs in ECCE by Host Region, Sex and Type, 2024/25

Total	13,512	13,349	26,861	609	365	974	4.5	2.7	3.6	0.6

According to the data collected and shown in the above table, out of the expected total SNE School age population of 26,861, the total number of students with special educational needs who are attending Primary school in 2024/25 is 974. Dollo Ado has the highest enrollment share followed by Gonder. In the other hand, the table below shows that, “Hearing Impairment” is the highest figure with 27.21% of the total, followed by “Physical Impaired” 26.28%.

Table 9.20 Enrollment of Students with SENs in Primary Level by Host Region, Sex and Type, 2024/25

9.6.3 Enrolment of Students with SENs in Middle Level

In the table below shown, the total number of students with special educational needs who are attending Middle schools in 2024/25 are 190 out of the expected number of SNE school age population which are 7,929. From the data indicated in the table 9.22, the GER of students with special educational needs in Middle schools is 2.4%.

9.7 Teachers in Refugee Education

In this academic year, the total number of teachers in all refugee camps at all levels is reported as 2,496. Out of this, 462 teachers are in ECCE, 1,293 in Primary, 512 in Middle, and 234 are in secondary levels.

Table 9.25 Teachers by Level, Location and Sex, 2024/25

Location	ECCE			Primary and Middle			Primary			Middle			Secondary			Total		
	Male	Female	Total	Male	Female	Total	Male	Female	Total	Male	Female	Total	Male	Female	Total	Male	Female	Total

The qualification level of teachers is also an important aspect of improving the quality of education. Based on the new education road map, the minimum qualification required is Diploma for ECCE, diploma for Primary, first degree for Middle and second degree for Secondary level. The tables below describe the detail of teachers with respect to their level of qualification in ECCE, Primary and Middle and Secondary schools

Table 9.26 Teachers by Location, Qualification and Sex in ECCE, 2024/25

Location	Total Number of Teachers			Refugee Teachers		Teachers By Level of Qualification (Total)						Qualified Teachers (%)
	Male	Female	Total	Number	Share (%)	Below Secondary	Secondary	TTI Certificate	Diploma	BA, BSc, BED	MA, MSC or above	
Semera	7	4	11	6	55	4	5	-	2	-	-	18.2

Total	1084	209	1293	1,044	81	808	172	118	191	4	24.2

Table 9.27 above shows that, in primary school, the total number of teachers are 1,293, of which 16.2% of them are females. On the other hand, the share of refugee teachers in Primary schools is 81%, implying that refugee education is mostly run by refugee teachers within the camp from ECCE to Primary levels. Total qualified teachers are only 24.2%, with Semera scoring the highest value with 64.3%.

Table 9.28 Teachers by Location, Qualification and Sex in Middle Level (Grades 7-8), 2024/25

Location	Total Number of Teachers			Refugee Teachers		Teachers By Level of Qualification (Total)					Total Qualified Teachers (%)

Total	450	62	512	185	36	105	64	77	234	32	52.0

Table 9.28 shows that, in Middle level education, the total number of teachers are 512, of which 12% are females. On the other hand, the share of refugee teachers in Middle level is 36%, implying that Ethiopian Teachers share is higher when compared to ECCE and Primary Level. Total qualified teachers are 52%, Semera scored the highest, 100%, followed by Assosa and Jigjiga with 67.8 and 54.5%.

Table 9.29 Teachers by Location, Qualification and Sex in Secondary Level, 2024/25

Location	Total Number of Teachers			Refugee Teachers	Teachers By Level of Qualification (Total)					Qualified Teachers (%)
	Male	Female	Total	Number	Share (%)	Below Diploma	Diploma	BA, BSc, BED	MA, MSC or above

In the secondary level, the total number of teachers are 234, of which 7.7% are females there are no refugee teachers at all, and 99% of the teaching force in this level are qualified, with a qualification level of BA/BSc./BEEd. and above.

Executive Summary

The Education Statistics Annual Abstract (2024/25) provides education statistical data measuring progress against educational priorities set out in the Education Sector Development Program VI (2020/21 – 2024/25) in Ethiopia.

The publication reports on General Education (including Pre-Primary, Primary, Middle, Secondary, Adult and Non-Formal Education (ANFE), Special Needs Education), Colleges of Teachers’ Education (CTEs), and Education in Refugees.

A. Overview of Indicators

The Education Statistics Annual Abstract reports progress against a total of 58 ESDP VI indicators (including indicators of the Pastoralist communities and Refugees) in 2024/25, which are divided into 4 categories covering access/coverage, equity, quality, and internal efficiency.

Among the 58 indicators to be measured, 13 of them do not have data available for this academic year. Six of them are indicators of Licensing in which no data available for the last couple of years.

Data is obtained from 11 Regions and 2 City Administration Education Bureaus, 38 Colleges of Teacher Education (CTEs), and from refugee camps in the five (including Amhara) refugee hosting regions.

B. Summary of Findings

PRE-PRIMARY EDUCATION	● Nationally, 60% of children enrolled in Pre-Primary classes in all ages. And, enrollment with the official school age accounts to 58%. ● Most enrolled in Pre-Primary level attend ‘O’ class, with 32% share of the total Pre-Primary enrollment. ● Gender parity shows a slight decrement from last year and could not achieve the ESDP VI target of the year.
PRIMARY AND MIDDLE LEVEL EDUCATION	● Grade 1 is in high demand, and many students have enrolled outside of the official school entry age so that the Gross Enrollment Rate still be above 100% nationally, and in most regions too. Oppositely, the NIR in most regions are below 100%, and the national NIR is 99.2%. ● Transition from Primary to Middle is low, with GER dropping from 111.3% (Primary) to 56.9% (Middle) ● The National GPI target could not be achieved in both levels, with 0.91 in Primary and 0.9 in Middle level.

SECONDARY LEVEL EDUCATION	- Transition from Middle to Secondary, as has been seen from Primary to Middle, is low nationally, with notable regional disparities. The national GER is 30.4%, with a 6.2 percentage points decrement from last year. Addis Ababa, exceptionally, scored a GER above 100% - When we look at the NER, the rate is too low, with 22.9% nationally, which shows a significant decrement from last year. All regions have an NER below 40% with the exception of Addis Ababa (80.0%). - GPI exceeds the ESDP target for the year. However, there is gender imbalance with GPI scores greater than 1 many regions.
ADULT AND NON-FORMAL EDUCATION	- Enrolment in IFAE programs has increased over time starting from ten years before, but there are signs of decline over the past seven years. - Adult Graduates are only 5% of the total enrolled. - Total enrollment from Accelerated Education Programs (AEP) are 68,163 this year, almost double of last year.
SPECIAL NEEDS EDUCATION	- Enrollment rate in children with SENs is still low with respect to the national target in all levels, however the values are better than last year. - GER at Pre-Primary is 6.5%. Similarly, the GER in Primary, Middle and Secondary levels are 13.9%, 6.8% and 3.9% respectively. - The ESDP VI target for the year could not be achieved at all levels “Learning Difficulty” and “Visual Impairment” are the type of disabilities with highest number of children in Primary and Middle level education.
TEACHERS IN GENERAL EDUCATION	- Based on the minimum qualification required for the level, 86.4% of Pre-Primary (KG) teachers are appropriately qualified. 93.8% Primary and 38.5% Middle school teachers also fulfilled the minimum qualification required for the levels. - On the other hand, 90.8% of Secondary school teachers are appropriately qualified, holding First Degree and above. - The national attrition rate for Primary and Middle school teachers is 2.4%, where as in Secondary schools the rate is 2.9%. “Changing the profession” is the reason with highest number in both levels. - From the total number of school leaders, females constitute 17.7% in Primary and Middle and 7.1% in Secondary schools. - Qualified school leaders are 67.0% in Primary and Middle schools, and 58.4% in Secondary. - On the other hand, 83.7% of Primary and Middle schools and 60.8% of Secondary school supervisors are appropriately qualified. - In this year, the total number of teachers with disabilities are reported

	to be 3,039 in Primary and Middle, and 1,351 in Secondary schools. • “Blind” and “Physical Disability” are disabilities with highest number in Primary and Middle and Secondary school teachers respectively.
COLLEGES OF TEACHERS’ EDUCATION	• 67.3% of the total Diploma enrollment is from Regular program and the total female share is 53.4%. • Majority of the Diploma prospective teachers are under “New Modality” • There are 19,501 prospective teachers enrolled in Degree programs, from which 7,971 of them are females. • Around 77% of the total attrition of prospective teachers is due to dropout. • The number of Diploma graduates from CTEs has drastically decreased starting from 2022/23. • 83.8% of the total academic staff are M.A/M.Sc. and above, and the female share of the total academic staffs is only 13%.
EDUCATION IN REFUGEE	• GER of ECCE is 80.2%, showing a significant increment from last year. The corresponding GPI is 0.97. • AIR and NIR are 78.0% and 38.5% respectively, showing an increment in both from last year. • The Primary GER is 46.6%, with a GPI of 0.86; whereas in Middle level, GER is 33.8% with a corresponding GPI of 0.66. • The overall GER in Primary and Middle (Grades 1-8) has shown a slight decrement from last year, with 43.7%, however GPI has been increased from 0.79 to 0.82. • PSR is too high in all levels, with 96.2 in Primary and Middle schools, and 131 at Secondary. On the other hand, PTR is 56 in Primary and Middle and 66 in Secondary • GER is too low in secondary schools, with 14.4% and GPI is 0.46. • With respect to the qualification level of teachers, 3.5%, 24.2%, 52.0% and 99.0% of the total teaching force are appropriately qualified in ECCE, Primary, Middle and Secondary levels respectively.

Annexes

Annex A: Definition of Terms

Gross Enrollment Ratio (GER)

Definition: Total enrolment in a specific level of education, regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education in a given school year. (For instance, in Ethiopia, Primary level of education covers Grades 1 to 6 and the official school age population for the level is age 7 to 12)

Calculation method: Divide the number of pupils (or students) enrolled in a given level of education (for example Primary) regardless of age by the population of the age group which officially corresponds to the given level of education (which is age 7 to 12), and multiply the result by 100.

Net Enrollment Rate (NER)

Definition: Enrolment of the official age group for a given level of education expressed as a percentage of the corresponding population.

Calculation method: Divide the number of pupils (or students) enrolled who are of the official age group for a given level of education (for instance students with ages 7 to 12 in Primary level) by the population for the same age group and multiply the result by 100.

Apparent (Gross) Intake Rate (AIR/GIR)

Definition: Total number of new entrants in the first grade of primary education (Grade 1 in Ethiopia), regardless of age, expressed as a percentage of the population at the official primary school-entrance age.

Calculation method: Divide the number of new entrants in grade 1, irrespective of age, by the population of official school-entrance age (age 7 in Ethiopia), and multiply the result by 100.

Net Intake Rate (NIR)

Definition: New entrants in the first grade of primary education who are of the official primary school-entrance age, expressed as a percentage of the population of the same age.

Calculation method: Divide the number of children with the official primary school-entrance age (age 7) who enter the first grade of primary education (Grade 1) for the first time by the population of the same age, and multiply the result by 100.

Gender Parity Index (GPI)

Definition: Ratio of female to male values of a given indicator.

Calculation Method: Divide the female value of a given indicator (for instance GER) by that of the male.

Promotion Rate (PR)

Definition: Proportion of pupils from a cohort enrolled in a given grade at a given school year who study in the next grade in the following school year.

Calculation method: Divide the number of new enrolments in a given grade in school year t+1 by the number of pupils from the same cohort enrolled in the preceding grade in the previous school year t. (If data on new

entrants is not available, it can be estimated by subtracting repeaters and readmitted from the total enrollment of the grade)

Repetition Rate (RR)

Definition: Proportion of pupils from a cohort enrolled in a given grade at a given school year who study in the same grade in the following school years (repeat a grade once or twice).

Calculation method: Divide the number of repeaters in a given grade g in school year $t+1$ by the number of pupils from the same cohort enrolled in the same grade in the previous school year t .

Dropout Rate (DR)

Definition: Proportion of pupils from a cohort enrolled in a given grade at a given school year who are no longer enrolled in the following school year.

Calculation method: Dropout rate by grade is calculated by subtracting the sum of promotion rate and repetition rate from 100 in the given school year. For cumulative dropout rate in primary education, it is calculated by subtracting the survival rate from 100 at a given grade (see survival rate).

Survival Rate (SR)

Definition: Percentage of a cohort of pupils (or students) enrolled in the first grade of a given level or cycle of education in a given school year who are expected to reach successive grades. (For instance, the survival rate to grade 7 is used to estimate the percentage of students who completes the Primary level of education, Grades 1-6)

Calculation method: Divide the total number of pupils belonging to a school-cohort who reached each successive grade of the specified level of education by the number of pupils in the school-cohort i.e. those originally enrolled in the first grade of primary education, and multiply the result by 100.

Note: The survival rate is calculated on the basis of the reconstructed cohort method, which uses data on enrolment and repeaters for two consecutive years.

Completion Rate (CR)

Definition: Total number of new entrants in the last grade of primary education (for instance Grade 6), regardless of age, expressed as a percentage of the population at the theoretical entrance age to the last grade of primary (age 12).

Calculation method: Divide the number of new entrants in last grade of primary, irrespective of age, by the population of theoretical entrance age to the last grade of primary, and multiply the result by 100.

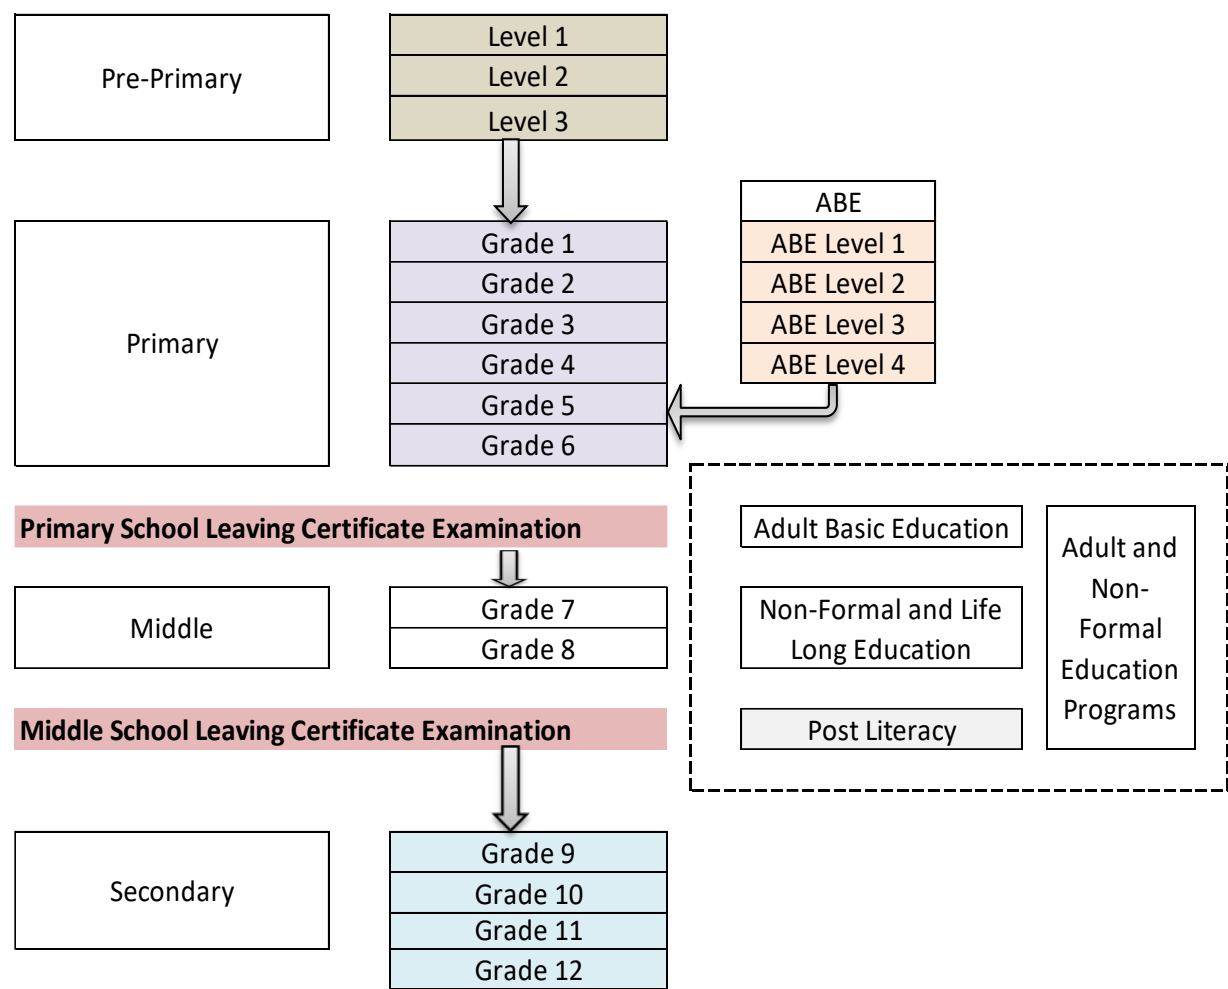

Note: This indicator is also named as “Gross Intake Ratio in The Last Grade of Primary” in some literature.

Pupil Teacher Ratio (PTR)

Definition: Average number of pupils (students) per teacher at a specific level of education in a given school year.

Calculation method: Divide the total number of pupils enrolled at the specified level of education by the number of teachers at the same level.

Annex B: Education and Training System in Ethiopia (General Education)

*Grade 11 and Grade 12 has two streams (Natural Science and Social Science) with additional Career and Technnical Education

Ethiopian Higher Education Entrance Examination Certificate

Annex C: Summary Tables in General Education

Executive Summary

The organization and synthesis of statistical data are essential for making policy decisions in the current knowledge-based economy. It is also important to create context-friendly knowledge that could be stored, retrieved, interpreted, and disseminated when needed. Thus, the very purpose of producing the Higher Education Statistical Annual Abstract (HESAA), among others, is to leverage government decision-making and policy formulation with valid and reliable evidence.

This statistical abstract was developed based on the 2024/25 (2017 E.C) data collected from government universities accountable to the FDRE Ministry of Education and non-government higher education institutions. Then, the contents and structure of the items were rigorously validated by authorities. The data were encoded in Microsoft Excel and analyzed descriptively using percentages, and frequency counts in graphs or in tables.

The statistical abstract is organized into five chapters that address issues of access and equity, quality and relevance, research and technology transfer, community services, leadership, and governance in higher education sub-sector. This is mainly to show how the country performance during 2024/25 (2017 E.C) on the following main issues: (i) expand access to higher education equitably; (ii) improve the quality and relevance of higher education; (iii) intensify research productivity as well impact and technology innovation and transfer; (iv) enhance community engagement and service; (v) strengthen internationalization; and (vi) improve higher education leadership and governance.

Public universities are differentiated into four categories in a way that reflects their respective accumulated talent, expertise, comparative advantages, skills and knowledge and resources in niches of their distinction to students with divergent specific interests and abilities. Significant efforts have been made to ensure internal efficiency in higher education and training. Since 2016, the focus in the sector has been on quality and relevance. This is due to the pressing need to decrease the unemployment rate among graduates of higher education and improve productivity in the economy.

Accordingly, the government exerted utmost efforts to upgrade the qualification of higher education faculties, installed systems to standardize the curriculum, endorsed competence-based assessment, to equip the higher education institutions with cutting edge equipment and facilities, and increased international and community engagement and participation. Consequently, in higher education, encouraging accomplishments have been registered so far with regards to expansion, learners' participation, equity, quality and relevance, research, technologies transfer and community service.

However, the absence of well-organized data has challenged the Higher Education systems over the last couple of years to plan and make informed decisions. Even when partially available, data reliability and validity were questionable. Thus, this statistical abstract intends to provide decision-makers planners and researchers with valid and reliable data to assist evidence-based decision-making and policy formulation.

INTRODUCTION

The Ministry of Education (MoE) is responsible to coordinate and lead the development of General and Higher education in Ethiopia as indicated in the proclamation number 1263/2021.

Higher education in Ethiopia includes education programs which are offered as undergraduate degree for four or more years and postgraduate degree (Masters and PhD) and specialty & sub-specialty programs. The higher education data has been collected from 47 government higher education institutions and 111 non-government higher education institutions which are accountable to MoE using a tool (software) named Higher Education Management Information System (HEMIS). This year's data uploading process has been challenged by poor and incomplete response of some institutions especially from those who do not have human resource permanently assigned for this task. The data used in this document is downloaded from the system on 20th August 2025.

This abstract contains the most basic components such as students' enrolment, students' graduation, students' attrition, and academic staffs on duty, staff development, academic staff attrition, administrative staff data, budget performance and other attributes related to educational sector development program.

1. ENROLLMENTS IN HIGHER EDUCATION

Summary of Enrollment

Table 1: Enrollment by Gender and Ownership

Government				Non-government				Total			
Female	Male	Total	% Female	Female	Male	Total	% Female	Female	Male	G. Total Enrollment	% Female
152,445	335,519	487,964	31.2%	172,439	167,599	340,038	50.7%	324,884	503,118	828,002	39.2

Table 1 above shows the total enrollment of students across government and non-government institutions is 828,002, with females comprising 39.2% of all students which is a relative progress compared to previous year (38.6%). Government institutions enroll a larger share of students (487,964), but only 31.2% are female, indicating a significant gender imbalance. In contrast, non-government institutions enrolled 340,038 students of which 50.7% of them are females and show more balanced gender distribution. This suggests that non-government institutions may offer more inclusive or accessible opportunities for female students compared to their government counterparts.

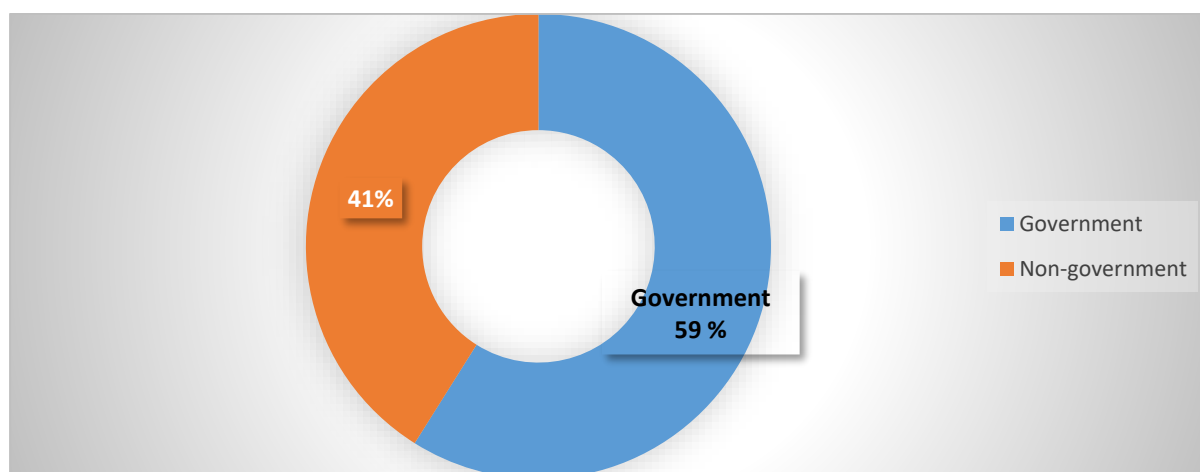

Figure 1: Enrolment by Ownership

As shown in figure 1, among the total enrollment of students, 59% of them are enrolled in government institutions while 41% of the students were enrolled in nongovernmental higher education institutions.

1.1 Enrollment by Qualification and Gender

Table 2: Enrollment by Qualification

Qualification	Government			Non-government			Total			% from total	% Female
	Female	Male	Total	Female	Male	Total	Female	Male	G. Total		
Bachelor's Degree	139,832	293,284	433,116	167,447	160,816	328,263	307,279	454,100	761,379	92.0	40.4
Master's Degree	9,569	30,547	40,116	4,799	6,467	11,266	14,368	37,014	51,382	6.2	28.0
Doctorate Degree	743	5,161	5,904	0	0	0	743	5,161	5,904	0.7	12.6
Health Specialty	249	1,265	1,514	38	74	112	287	1,339	1,626	0.2	17.7
Health Sub-Specialty	18	86	104	0	0	0	18	86	104	0.01	17.3
Post Graduate Diploma	2,034	5,176	7,210	155	242	397	2,189	5,418	7,607	0.9	28.8
Total	152,445	335,519	487,964	172,439	167,599	340,038	324,884	503,118	828,002	100	39.2

Table 2 shows 761,379 (92%) of the students are enrolled in pursuing Bachelor's degree, in which 433,116 (56.9%) of them were enrolled in governmental institutions while 328,263 (43.1%) of them were enrolled in non-governmental higher education institutions. The remaining 66,623 (8%) of the students are enrolled in master's program (6.2%), Doctorate program (0.7%), health specialty (0.19%), health sub-specialty (0.01%) and postgraduate diploma (0.9%).

Moreover, Table 2 shows, female students make up 39.2 % of the total enrollment, with their highest representation in undergraduate (40.4%) but significantly lower in Doctorate programs (12.6 %). Government institutions account for 59 % of total enrollment, while non-government institutions contribute 41%, with relatively stronger female participation (51%) in non-government Bachelor's programs. These figures highlight the need for targeted efforts to improve the proportion of postgraduate students and gender balance in advanced and specialized education qualification levels.

1.2 Enrollment by ISCED

UNESCO classifies education programs into eleven categories which is called the International Standard Classification of Education (ISCED). These categories are named Generic programs and qualifications (00), Education (01), Arts and Humanities (02), Social Sciences, Journalism, and Information (03), Business, Administration and Law (04), Natural Sciences, Mathematics and Statistics (05), Information and Communication Technologies (06), Engineering, Manufacturing and Construction (07), Agriculture, Forestry, Fisheries and Veterinary (08), Health and Welfare (09), Services (10). Table 3 below shows students' enrollment in Ethiopian higher education institutions by gender and ISCED band.

Table 3: Enrollment by ISCED, ownership and Gender

Band name	Government			Non-government			Total			% from total	% Female
	Female	Male	Total	Female	Male	Total	Female	Male	G. Total		
Agriculture, forestry, fisheries and veterinary	5,394	13,686	19,080	1,312	1,221	2,533	6,706	14,907	21,613	2.6	31.0
Arts and humanities	13,026	23,276	36,302	0	0	0	13,026	23,276	36,302	4.4	35.9
Business, administration and law	33,107	61,756	94,863	124,880	110,298	235,178	157,987	172,054	330,041	39.9	47.9
Education	9,476	21,666	31,142	588	1,083	1,671	10,064	22,749	32,813	4.0	30.7
Engineering, manufacturing and construction	9,080	33,681	42,761	1,548	3,649	5,197	10,628	37,330	47,958	5.8	22.2
Generic programmes and qualifications	31,685	63,938	95,623	5,873	11,302	17,175	37,558	75,240	112,798	13.6	33.3
Health and welfare	18,950	32,118	51,068	26,026	21,643	47,669	44,976	53,761	98,737	11.9	45.6
Information and Communication Technologies	7,954	19,510	27,464	6,367	8,752	15,119	14,321	28,262	42,583	5.1	33.6
Natural sciences, mathematics and statistics	12,680	35,228	47,908	0	0	0	12,680	35,228	47,908	5.8	26.5
Services	1,361	4,989	6,350	145	87	232	1,506	5,076	6,582	0.8	22.9
Social sciences, journalism and information	9,732	25,671	35,403	5,700	9,564	15,264	15,432	35,235	50,667	6.1	30.5
Total	152,445	335,519	487,964	172,439	167,599	340,038	324,884	503,118	828,002	100	39.2

The enrollment data across Ethiopian higher education institutions reveals a strong concentration in Business, Administration, and Law, which accounts 330,041 (39.9%) of which 235,178 (71.3%) were enrolled in nongovernmental Higher education institution while 94, 863 (28.7%) of them were enrolled in government higher education institutions. In this qualification, the total enrollment of female students reaches to 157,987 (47.9%) suggesting growing gender inclusive in economically strategic fields. Health and Welfare also demonstrate significant females share (45.6 %), indicating females' preference towards care-giving professions. In contrast, STEM fields such as Engineering and Natural Sciences remain male-dominated, with female shares of just 22.2 % and 26.5 %, respectively, highlighting persistent gender gaps in technical disciplines. Government institutions dominate most fields except Business and Health, where non-government providers play a major role. Overall, female students constitute 39.2 % of total enrollment, reflecting gradual progress toward gender parity but underscoring the need for targeted interventions to improve female participation in science and technology programs. More clarity can be reflected on figure 2 below.

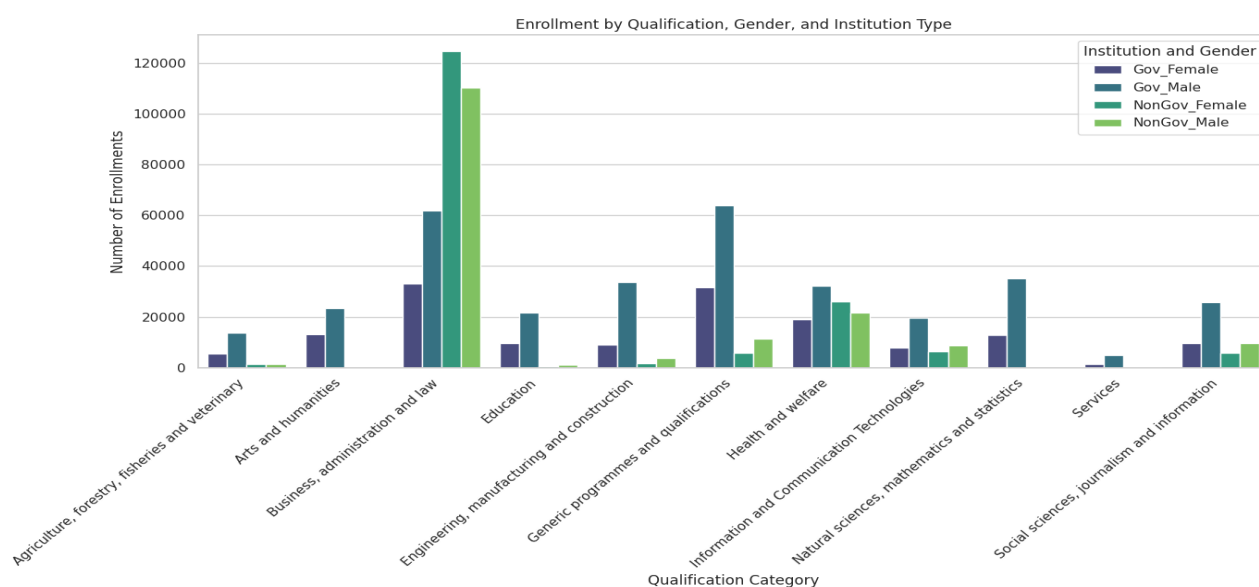

Figure 2: Enrolment by ISCED, ownership and Gender

1.3. Enrolment by Local Band

Higher education programs (fields of studies) are categorized in six major categories in Ethiopian context. These are Engineering and Technology (Band-1), Natural and Computational Science (Band-2), Medicine and Health Science (Band-3), Agriculture and Natural Resources (Band-4), Business and Economics (Band-5), Social Sciences and Humanities (Band-6). The programs in the first four bands (Band 1 to Band 4) are Natural Science and Technology fields of studies and the programs in the last two bands (Band 5 and Band 6) are Social Science fields of studies.

Table 4: Enrolment by Local band and sex.

Local Band Name	Government			Non-government			Total			% from total	% Female
	Female	Male	Total	Female	Male	Total	Female	Male	G. Total		
Engineering and Technology	17,639	53,540	71,179	-	-	-	17,639	53,540	71,179	8.6	24.8
Natural and Computational Science	11,756	35,559	47,315	8,077	12,575	20,652	19,833	48,134	67,967	8.2	29.2
Medicine and Health Science	18,895	32,374	51,269	26,992	21,970	48,962	45,887	54,344	100,231	12.1	45.8
Agriculture and Environmental Sciences	8,337	20,837	29,174	492	1,176	1,668	8,829	22,013	30,842	3.7	28.6
Business and Economics	31,796	62,726	94,522	130,019	119,188	249,207	161,815	181,914	343,729	41.5	47.1
Social Sciences and Humanities	34,233	70,473	104,706	1,003	1,481	2,484	35,236	71,954	107,190	12.9	32.9
Uncategorized	29,789	60,010	89,799	5,856	11,209	17,065	35,645	71,219	106,864	12.9	33.4
Total Enrollment	152,445	335,519	487,964	172,439	167,599	340,038	324,884	503,118	828,002	100	39.2

From the table above the chart below we can see that among the six categories of education division 41.5% of students are enrolled in Business and Economics field of studies which is the largest share and compared to the previous year share (38.9%) increased by 2.6%. Social Sciences and Humanities field of studies hold the second larger share (12.9%) of students followed by Medicine and Health Sciences field of studies which is 12.1 %. In aggregate data the share of female enrolment based on the local band classification is 39.2%, of which more females are enrolled in Business and Economics and Medicine and Health Science field of studies with a share of 47.1% and 45.8 % respectively. As can be seen from the table above, the Engineering and Technology Band has the least share of females' enrolment (24.8%).

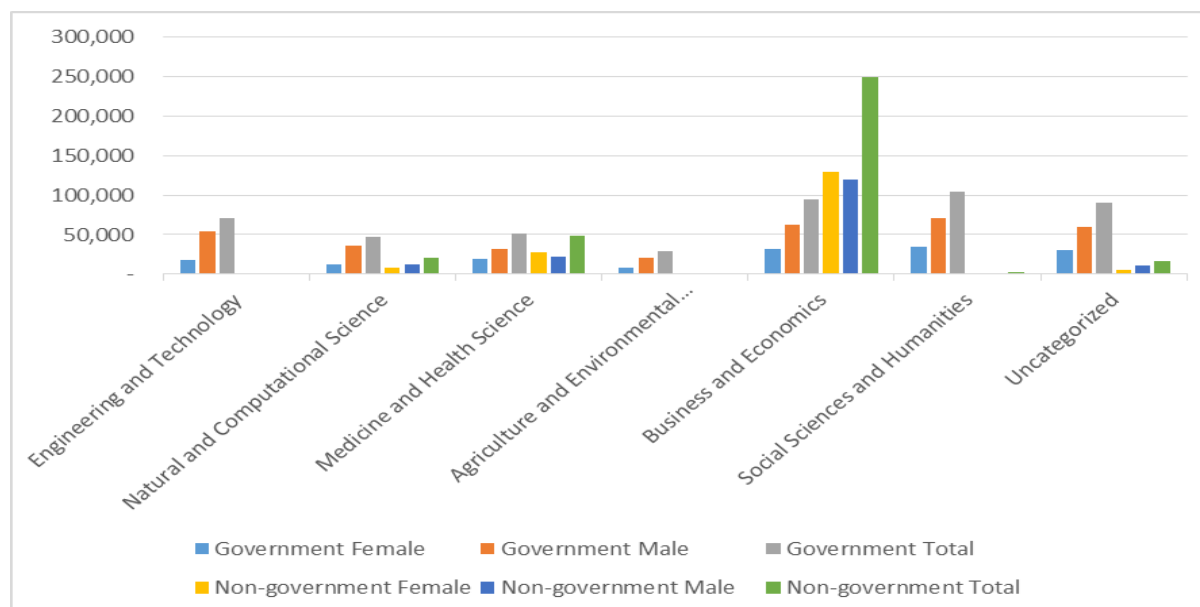

Figure 3: Enrolment by Local band and sex.

1.4. Enrolment by Mode of Admission

Table 5: Enrollment by Mode of Admission

Mode of Admission	Government			Non-government			Total			% from total	% Female
	Female	Male	Total	Female	Male	Total	Female	Male	G. Total		
Regular	107,209	232,087	339,296	75,907	69,478	145,385	183,116	301,565	484,681	58.5	37.8
Extension	27,582	62,722	90,303	43,925	43,716	87,641	71,507	106,438	177,944	21.5	40.2
Distance	2,241	3,750	5,991	52,018	53,208	105,226	54,259	56,958	111,217	13.4	48.8
Summer	15,155	36,518	51,673	0	0	0	15,155	36,518	51,673	6.2	29.3
Daytime Extension	173	264	437	0	0	0	173	264	437	0.1	39.6
Winter In-service	85	179	264	0	0	0	85	179	264	0.03	32.2
Online	0	0	0	588	1,198	1,786	588	1,198	1,786	0.2	32.9
Total	152,445	335,519	487,964	172,438	167,600	340,038	324,883	503,119	828,002	100.0	39.2

As shown in Table 4, the enrollment distribution across program modalities in Ethiopian higher education reveals that Regular modality dominates with 484,681 (58.5%) of total enrollment, yet female participation remains at 37.8%. Interestingly, female's enrollment proportion in distance education is the highest, 48.8% compared to other modalities suggesting its role in expanding access for women, possibly due to its flexibility. Extension programs also demonstrate relatively balanced gender participation (40.2), indicating their appeal to working or non-traditional students. Summer, Daytime Extension, Winter In-service, and Online modalities collectively account for a small fraction of total enrollment, with female shares ranging from 29.3 % to 39.6 % reflecting limited share of as modality of admission. The online modality of contributes 0.2% compared to all other modalities and this is also found in non-governmental higher education institutions while the governmental education institutions contribute nothing as the data reported from HEIs. Overall, while the total female enrollment stands at 39.2%, the data underscores the importance of alternative modalities—especially Distance and Extension programs—in promoting gender equity and higher educational accessibility. Moreover, both government and non-governmental institutions are advised to work on online modality to increase their student enrollment. Figure 4 illustrate the above description clearly.

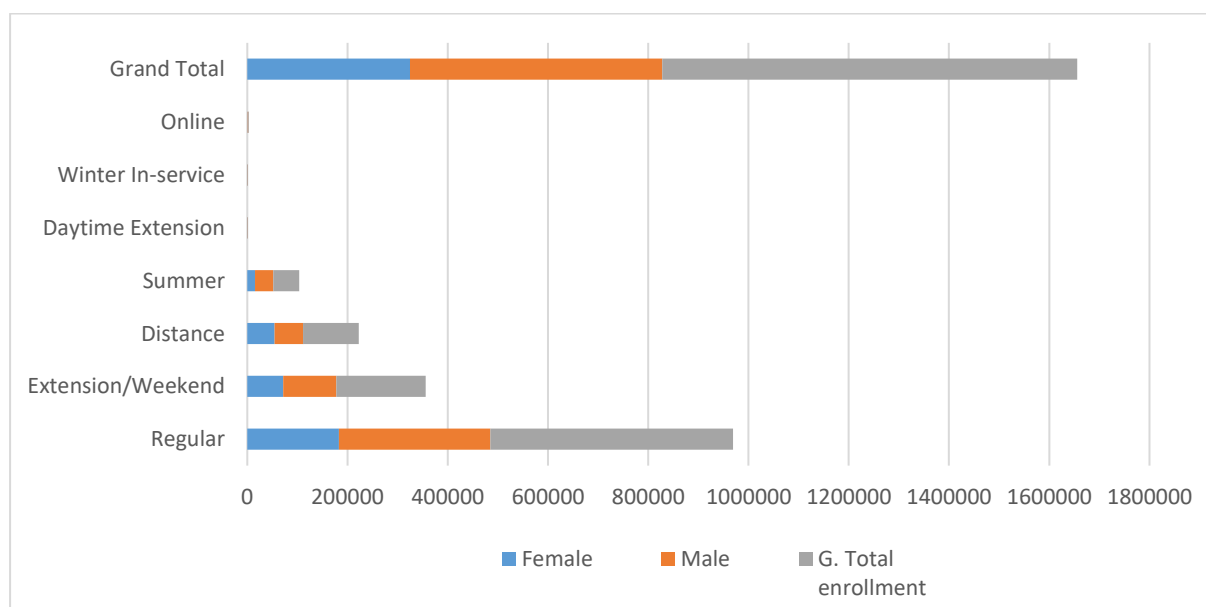

Figure 4: Enrollment by Mode of Admission

1.5 Enrollment by Differentiation Category for GHEIs

Among the reforms initiated by Ministry of Education recently, differentiation is the one that categorize government universities in to Research Universities, Universities of Applied Sciences, Comprehensive universities and Science and Technology Universities according to their focus areas. According to this category, there are 9 Research Universities, 15 Universities of Applied Science, 21 Comprehensive universities and 2 Science and Technology Universities.

Table 6: Enrollment by Differentiation Category

Differentiation Category	Female	Male	Total	% from total	% female
Comprehensive Universities	39,899	89,834	129,733	26.6	30.8
Research Universities	54,516	122,806	177,322	36.3	30.7
Science and Technology Universities	4,242	11,277	15,519	3.2	27.3
University of Applied Sciences	53,788	111,602	165,390	33.9	32.5
Total	152,445	335,519	487,964	100	31.2

Table 6 shows the enrollment distribution across differentiated university categories in Ethiopia highlights Research Universities as the leading one that accounts 177,322 (36.3 %) of the total enrollment, followed closely by University of Applied Sciences at 165,390 (33.9 %). Comprehensive Universities enrolled 129,733 (26.6 %), while Science and Technology Universities enrolled 15,519 (3.2 %). Female participation is better in Research Universities (30.7%) and University of Applied Sciences (32.5%), suggesting these institutions in these categories may offer broader or more accessible program portfolios for women. However, there is a relatively low female enrollment in Science and Technology Universities (27.3 %) reflects ongoing gender disparities in STEM-focused institutions. Overall, the data underscores the need to strengthen gender equity and diversify institutional offerings, especially within science and technology streams. Moreover, for clear understanding of the differentiation category and related concepts figure 5 is presented below.

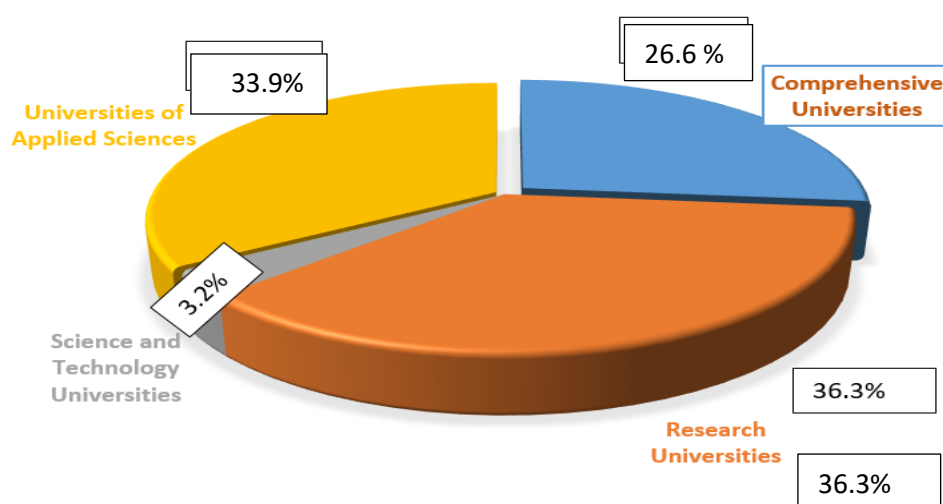

Figure 5: Enrollment by Differentiation category

1.6. Undergraduate Enrollment by ISCED

Table 7: Undergraduate Enrollment by ISCED

Band name	Government			Non-government			Total			% from total	% Female
	Female	Male	Total	Female	Male	Total	Female	Male	G. Total		
Agriculture, forestry, fisheries and veterinary	4,863	10,795	15,658	1,312	1,221	2,533	6,175	12,016	18,191	2.4	33.9
Arts and humanities	12,594	22,102	34,696	-	-	-	12,594	22,102	34,696	4.6	36.3
Business, administration and law	29,155	52,773	81,928	120,760	104,648	225,408	149,915	157,421	307,336	40.4	48.8
Education	7,837	17,150	24,987	587	1,079	1,666	8,424	18,229	26,653	3.5	31.6
Engineering, manufacturing and construction	7,807	27,293	35,100	1,502	3,485	4,987	9,309	30,778	40,087	5.3	23.2
Generic programmes and qualifications	31,544	63,656	95,200	5,873	11,302	17,175	37,417	74,958	112,375	14.8	33.3
Health and welfare	17,190	26,636	43,826	25,438	21,232	46,670	42,628	47,868	90,496	11.9	47.1
Information and Communication Technologies	7,545	18,085	25,630	6,164	8,393	14,557	13,709	26,478	40,187	5.3	34.1
Natural sciences, mathematics and statistics	11,698	29,245	40,943	-	-	-	11,698	29,245	40,943	5.4	28.6
Services	1,221	4,432	5,653	139	78	217	1,360	4,510	5,870	0.8	23.2
Social sciences, journalism and information	8,378	21,117	29,495	5,672	9,378	15,050	14,050	30,495	44,545	5.9	31.5
Total	139,832	293,284	433,116	167,447	160,816	328,263	307,279	454,100	761,379	100	40.4

Looking at Table 7 above enrollment data segmented by ISCED band name reveals that Business, Administration, and Law dominate Ethiopia's higher education enrollment landscape, accounts 307,336 (40.4 %) of the total enrollment and showing the highest female participation rate 48.8%, signaling strong gender inclusiveness in these fields of study. Health and Welfare follow with 11.9 % of the total enrollment and a notable 47.1 % female share, reinforcing its appeal among women. Conversely, Engineering and Services remain male-dominated, with female representation is just 23.2%, highlighting persistent gender gaps in technical and vocational domains. Generic Programs and ICT also show moderate female participation (33.3% and 34.1 %, respectively), while Natural Sciences and Agriculture remain slightly behind. Enrollment in Government institutions continue to lead in most fields, though non-government providers play a significant role in expanding access, especially in Business and Health. Overall, the total female enrollment stands at 40.4 %, reflecting gradual progress toward gender equity, while strengthening female engagement in STEM and applied sciences must be noted.

1.7 Undergraduate Enrollment by Local Band

Higher education programs (fields of studies) are categorized in six major Bands in Ethiopian context. These are Engineering and Technology (Band-1), Natural and Computational Science (Band-2), Medicine and Health Science (Band-3), Agriculture and Natural Resources (Band-4), Business and Economics (Band- 5), Social Sciences and Humanities (Band-6). The programs in the first four bands (Band 1 to Band 4) are Natural Science and Technology fields of studies and the programs in the last two bands (Band 5 and Band 6) are Social Science fields of studies.

Table 8: Undergraduate Enrollment by Local Band, ownership and sex.

Local Band name	Government			Non-government			Total			%from total	%Female
	Female	Male	Total	Female	Male	Total	Female	Male	G. Total		
Engineering and Technology	16,047	46,054	62,101	-	-	-	16,047	46,054	62,101	8.2	25.8
Natural and Computational Science	10,813	30,482	41,295	7,822	12,049	19,871	18,635	42,531	61,166	8.0	30.5
Medicine and Health Science	17,189	26,761	43,950	26,404	21,559	47,963	43,593	48,320	91,913	12.1	47.4
Agriculture and Environmental Sciences	7,558	16,614	24,172	492	1,176	1,668	8,050	17,790	25,840	3.4	31.2
Business and Economics	27,990	53,312	81,302	125,871	113,352	239,223	153,861	166,664	320,525	42.1	48.0
Social Sciences and Humanities	30,587	60,333	90,920	1,002	1,471	2,473	31,589	61,804	93,393	12.3	33.8
Uncategorized	29,648	59,728	89,376	5,856	11,209	17,065	35,504	70,937	106,441	14.0	33.4
Total	139,832	293,284	433,116	167,447	160,816	328,263	307,279	454,100	761,379	100	40.4

The enrollment data across Ethiopian higher education institutions in Table 8 reveals that Business and Economics dominates and accounts 320,525 (42.1%) of total enrollment and showing near gender parity (48.0 % female), followed by Social Sciences and Humanities (12.3 %), and Medicine and Health Sciences (12.1%), the latter showing the highest female representation at 47.4 %. STEM fields such as Engineering and Technology (8.2 %) and Natural and Computational Sciences (8.0 %) remain male-dominated, with female participation at just 25.8 % and 30.5% respectively—highlighting persistent gender gaps. Notably, non-government institutions contribute significantly to Band 3 which accounts 47,963 (52.2%) and Band 5 which accounts, 229,235 (71.5%), while engineering shows no presence outside the government higher education institutions. These trends underscore the urgent need for targeted gender equity interventions, especially in STEM and applied sciences, to foster inclusive growth and institutional diversification

1.8 Undergraduate Enrollment by Mode of Admission

Table 9: Undergraduate Enrolment by Mode of Admission.

Mode of Admission	Government			Non-government			Total			%from total	%Female
	Female	Male	Total	Female	Male	Total	Female	Male	G. Total		
Regular	101,586	209,942	311,528	72,544	65,541	138,085	174,130	275,483	449,613	59.1	38.7
Extension/Weekend	22,256	48,335	70,591	42,883	42,055	84,938	65,139	90,390	155,529	20.4	41.9
Distance	1,865	3,276	5,141	52,019	53,208	105,227	53,884	56,484	110,368	14.5	48.8
Summer	13,871	31,347	45,218	-	-	-	13,871	31,347	45,218	5.9	30.7
Daytime Extension	173	264	437	0	0	0	173	264	437	0.1	39.6
Winter In-service	82	119	201	0	0	0	82	119	201	0.03	40.8
Online	0	0	0	1	12	13	1	12	13	0.002	7.7
Total	139,833	293,283	433,116	167,447	160,816	328,263	307,280	454,099	761,379	100	40.4

Table 9 depicts that enrollment data by mode of admission in Ethiopian higher education institutions show that Regular programs remain the dominant modality which accounts 59.1% of total enrollment, though female representation is relatively modest at 38.7%. Extension/Weekend and Distance modes collectively serve over one-third of students (20.4% and 14.5%, respectively), with notably higher female enrollment 41.9% and 48.8 % indicating their critical role in expanding access for women, especially among non-traditional learners. Summer programs contribute 5.9 % of enrollment but show a lower female share (30.7 %), while modalities like Daytime Extension, Winter In-service, and Online remain marginal, together comprising less than 0.2 % of total enrollment. The overall female participation rate stands at 40.4 %, with Distance education emerging as the most gender-inclusive mode, underscoring its potential for promoting equity and flexibility in higher education access. Figure 6 illustrates the above concept more.

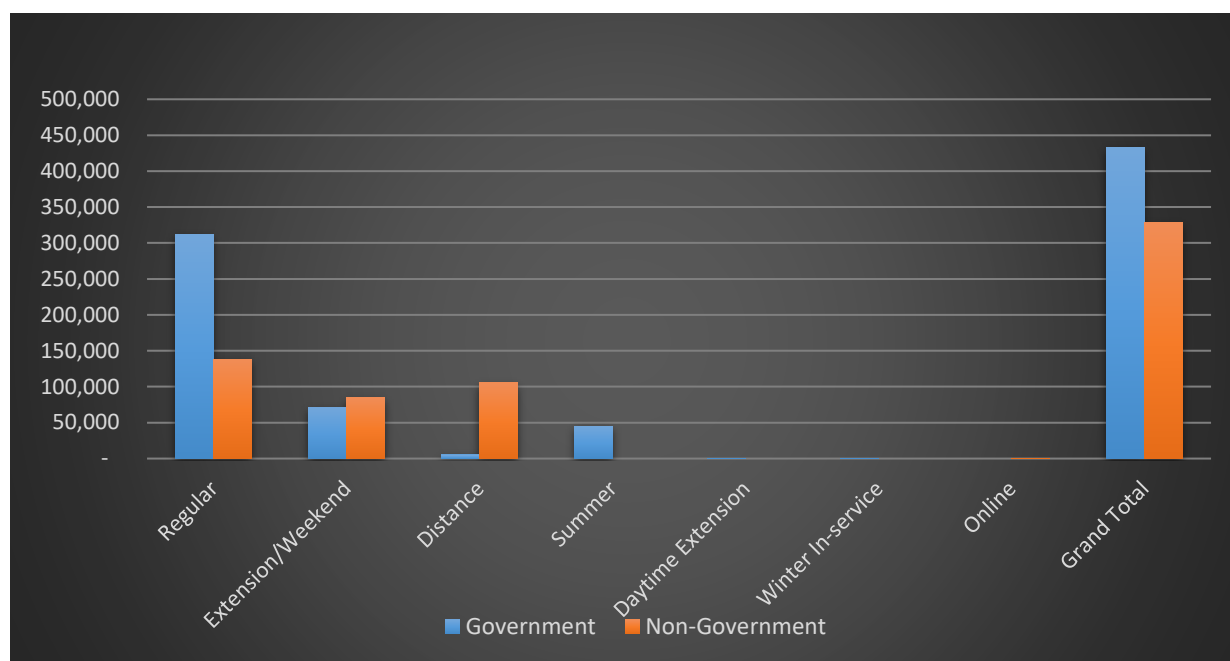

Figure 6: Undergraduate Enrolment by Mode of Admission.

1.9 Undergraduate Enrollment by Differentiation Category

Table 10: Undergraduate Enrollment by Differentiation Category

Differentiation Category	Government			% from total	% Female
	Female	Male	Total		
Comprehensive Universities	39,610	88,155	127,765	29.5	31.0
Research Universities	45,408	92,886	138,294	31.9	32.8
Science and Technology Universities	3,893	9,524	13,417	3.1	29.0
University of Applied Sciences	50,921	102,719	153,640	35.5	33.1
Total	139,832	293,284	433,116	100	32.3

The enrollment data across government higher education institutions in table 10 reveals that notable variation in all differentiation categories and gender representation. Universities of Applied Sciences lead in total enrollment accounts 153,640 (35.5%) of government higher education institution students, followed by Research Universities 138,294 (31.9%) and Comprehensive Universities, 127,765 (29.5 %), while Science and Technology Universities contribute 3.1 % in undergraduate enrollments. Despite these differences, female participation remains consistently below parity, with the highest female share observed in Universities of Applied Sciences (33.1 %) and the lowest in Science and Technology Universities (29.0 %). The overall female enrollment across all differentiation category accounts 139,832 (32.3%), underscoring a persistent gender gap, particularly in STEM-oriented institutions. These figures highlight the need for targeted interventions to promote gender equity and diversify participation across all university types. Figure 7 shows undergraduate females' participation across the four categories of differentiation of universities clearly.

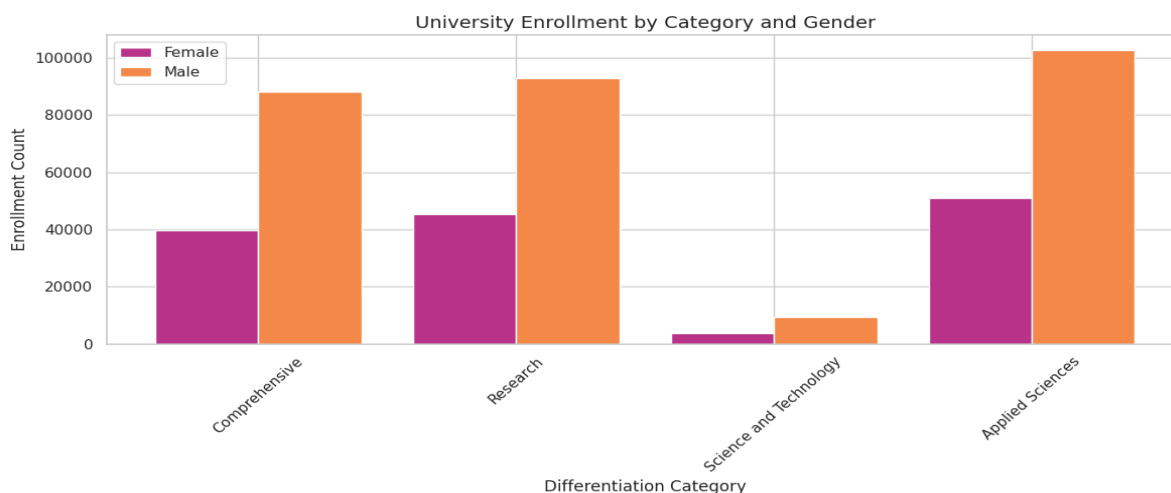

Figure 7: Enrollment and Female Share across Ethiopian Universities

1.10 Gross Enrollment Rate (GER)

The Gross Enrolment Rate (GER) in tertiary education is a statistical measure used to indicate the general level of participation in tertiary education within a given country. It represents the number of students enrolled in tertiary education regardless of age expressed as a percentage of the official school-age population corresponding to the tertiary level.

Table 11: GER of higher education

GER for Higher Education			
Sex	Enrollment of Higher Education	School Age group	GER
Female	324,884	5,386,407	6.0
Male	503,118	5,408,272	9.3
Total	828,002	10,794,679	7.7

The gross enrollment rate of higher education is low, GER (7.7%) in Ethiopian tertiary education. However, it should be noted that tertiary education is the level of education that follows the completion of secondary education (high school). It includes a variety of programs and qualifications offered by universities, colleges, and vocational education institutions. In this GER calculation, students' data were collected only from 47 government and 111 non-government higher education institutions which are under the supervision of the federal government. While there are students who attend tertiary education in vocational institutions, regional health institution, regional teacher education institutions, state universities and special universities.

Considering the existing data, it suggests a major crisis in the higher education system, likely linked to: Poverty and Economic Underdevelopment: Inability to fund universities or student subsidies. High dropout rates in primary and secondary school mean very few students are prepared for or able to enter higher education. The higher education system is failing women disproportionately. Closing this gender gap must be a primary policy focus. Strategies could include scholarships for women, campaigns to change societal attitudes, and ensuring safe learning environments. A population with

such low levels of higher education will struggle to develop a skilled workforce necessary for economic growth, technological adoption, and innovation. This creates a cycle of poverty and underdevelopment.

1.11 Gender Parity Index

The Gender Parity Index (GPI) is a socioeconomic statistic used to measure the relative access to education of males and females. It is a crucial tool for identifying and quantifying gender disparities within an education system. In simple terms, the GPI tells you the ratio of females to males in a given educational indicator. For tertiary (higher) education, the most common indicator used is the Gross Enrollment Ratio (GER), which we saw in your previous table. $GPI (Tertiary) = \text{Gross Enrollment Ratio (GER) of Females} / \text{Gross Enrollment Ratio (GER) of Males}$.

GPI = 1: Perfect Parity. This means females and males have exactly equal representation in tertiary education relative to their population sizes. For every male enrolled, there is one female enrolled.

GPI > 1: Disparity in favor of females. A value greater than 1 indicates that women are participating in higher education at a higher rate than men.

GPI < 1: Disparity in favor of males. A value less than 1 indicates that men are participating at a higher rate than women. This was the case in the data from our previous analysis.

Female GER = 6.0, Male GER = 9.3,

$GPI = \text{Female GER} / \text{Male GER} = 6.0 / 9.3 \approx 0.65$

Interpretation: A GPI of 0.65 indicates a severe disparity in favor of males. For every 100 men in tertiary education (relative to the male population), there are only 65 women (relative to the female population). This confirms the significant gender gap we identified.

Tracks Global Goals: It is a key indicator for measuring progress towards the United Nations Sustainable Development Goal 4 (Quality Education), which aims to eliminate gender disparities in education by 2030.

1.12 Enrollment by Year Level and Institution Type

In Ethiopia the current policy of higher education to complete an undergraduate program requires a minimum of four years, Master's program requires two years and a Ph.D. program needs to attend for four years. A total of 828,002 students are attending a tertiary education in both government and non-government who reported their data via HEMIS platform. The data is collected from 47 government universities who are accountable to the Ministry of Education and 111 non-government higher education institutions.

Table 12: Enrolment by Year Level and Ownership

Year Level	Ownership						G.Total			%	%	%
	Government			Non government						Non	Tot	Fem
	Female	Male	Total	Female	Male	Total	Female	Male	Total	Gov	al	ale
First year	41,554	86,532	128,086	33,557	35,556	69,113	75,111	122,088	197,199	35.0	23.8	38.1
Second year	38,524	82,330	120,854	21,814	23,480	45,294	60,338	105,810	166,148	27.3	20.1	36.3
Third year	32,624	75,432	108,056	34,257	29,975	64,232	66,881	105,407	172,288	37.3	20.8	38.8
Fourth year	27,115	63,128	90,243	50,732	48,273	99,005	77,847	111,401	189,248	52.3	22.9	41.1
Fifth year	10,918	23,110	34,028	30,223	29,101	59,324	41,141	52,211	93,352	63.5	11.3	44.1
Sixth year	1,485	4,638	6,123	1,313	916	2,229	2,798	5,554	8,352	26.7	1.0	33.5
Seventh year	218	314	532	543	295	838	761	609	1,370	61.2	0.2	55.5
Eighth year	7	35	42		3	3	7	38	45	6.7	0.01	15.6
Total	152,445	335,519	487,964	172,439	167,599	340,038	324,884	503,118	828,002	41.1	100	39.2

When we look the data by ownership, in table 12, government institutions account for the majority of enrollment, with 487,964 students (59%), compared to 340,038 students (41%) in non-government institutions. Table 12 also shows, enrollment is heavily concentrated in the first four years, which together account for nearly 90% of total students. The first year (197,199 students) has the highest intake, making up 23.8% of the total, followed closely by the second, third, and fourth years with between 20–23% each. After fourth year, the number of students decrease since students who attend their education for four year gets graduated. This can be illustrated more clearly and comprehensively in figure 8 below.

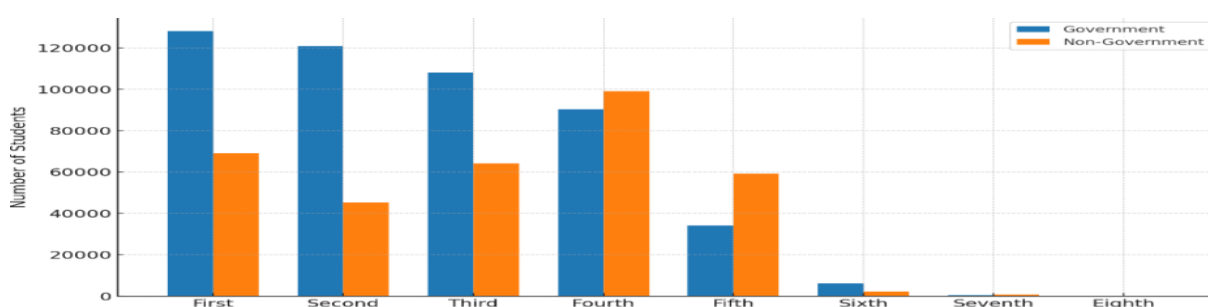

Figure 8: Enrollments by year level and ownership

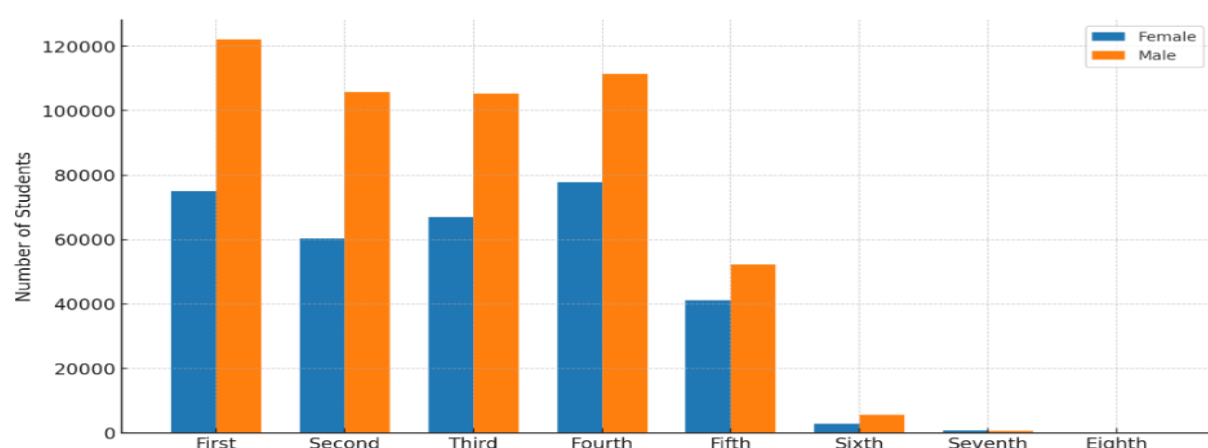

Figure 9: Enrollments by year level and gender

Figure 9, shows a consistent **gender imbalance** across all year levels, with **males (60.8%) significantly outnumbering females (39.2%)** in total enrolment. The gender gap is most pronounced in the in all years (up to fourth year), for instance in the **first year (38.1% female)** and the **second year (36.3% female)**. However, most programs ended at fourth year and only some programs such as law, engineering and medicine continue to fifth and sixth year.

1.13 Enrollments of Students with Special Needs

Student disability refers to a variety of physical, mental, or learning challenges that may affect a student's ability to participate fully in educational activities. It encompasses a wide range of conditions, including but not limited to: Physical Disabilities: Conditions that may require mobility assistance or other accommodations. Sensory Impairments: Including vision or hearing impairments. Mental Health Conditions: Such as anxiety or depression, which can impact a student's focus and engagement.

Higher education institutions often provide accommodations and support services to help students with disabilities succeed, such as extended time on tests, individualized education plans, and specialized tutoring. It's important for students and their families to communicate with educators to ensure that appropriate support is in place to enhance equity in education.

Table 13: Enrollments of Students with Special Needs

Sum of Enrollments		Sum of Enrollments			%Total
Disability_name		Female	Male	Total	
Government	Blind	53	120	173	66.3
	Deaf	4	17	21	8.0
	Deaf&Mute	0	1	1	0.4
	Mentally retarded	0	1	1	0.4
	Physically handicapped	18	47	65	24.9
Grand Total		75	186	261	100

As shown in Table 13, In 2024/25, there are 261 special needs students enrolled in government higher education institutions. Among the disability types; the largest share (66.3%) is taken by blindness, followed by physically handicapped which shares 24.9% out of a total. There are no disabled students reported from non-government institution. The share of female special need students` is 28.7%, the data points to a major equity issue where girls with disabilities are accessing government education at a much lower rate than boys with disabilities.

1.14 Enrollment by Area Type better to include analysis by area type

In Ethiopian context the regions are categorized in to two, pastoral and non-pastoral areas. A pastoral area typically refers to a region that is primarily used for raising livestock and grazing animals. These areas often feature open landscapes, grasslands, and sometimes rolling hills. In a broader context, "pastoral" can also describe a lifestyle or art that idealizes rural life and the simple pleasures

associated with nature, often depicted in literature and visual arts. These areas are considered as disadvantaged regions regarding education facilities.

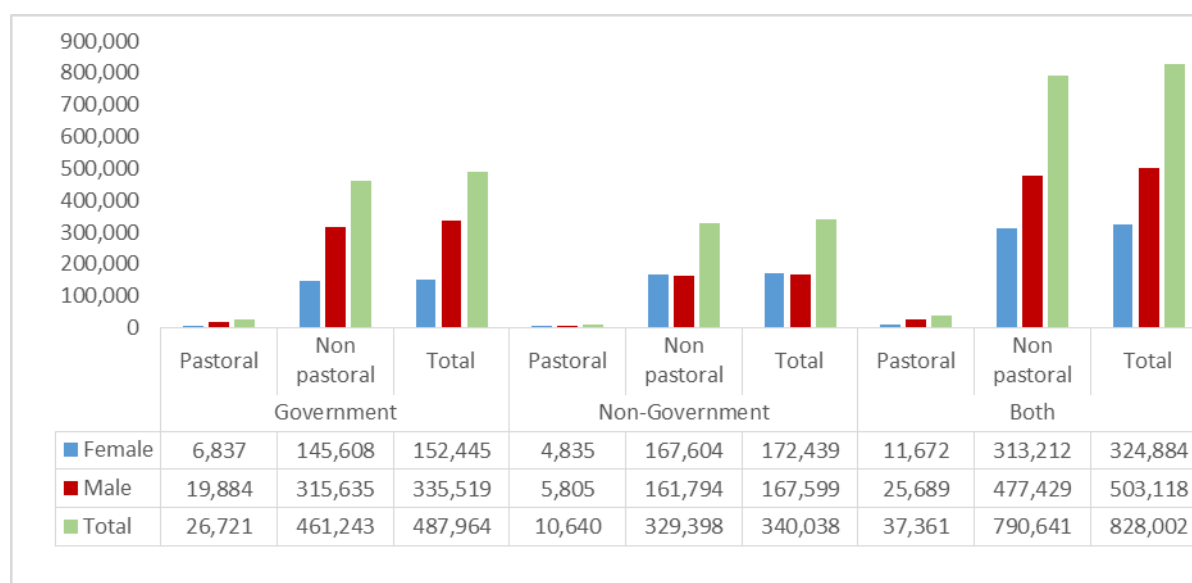

Figure 10: Enrollment by Area Type

As shown in Figure 10, the distribution of students is heavily skewed towards non-pastoral areas, which account for 95.5% (790,641 students) of all enrollments, starkly contrasting with the 4.5% (37,361 students) in pastoral areas. This highlights a critical challenge in providing educational access in pastoral regions. The gender gap also varies dramatically between these area types. In non-pastoral areas, the gender split is relatively better (39.6% female vs. 60.4% male), though still favoring males. In pastoral areas, however, the disparity is extreme, with females making up only 31.2% of the student population. This indicates that the obstacle of female enrollment is severely compounded by geographic and pastoral livelihoods.

From the table above it can be seen that 5.5 percent of all enrollment of government students are from pastoral areas. Whereas in non-government only 3.1 % among all enrollment are from pastoral area of the country. The share of females in the pastoral areas is 31.2 percent which is lower than the national average value.

Area Type Analysis (Pastoral vs. Non-Pastoral) Concentration in Non-Pastoral Areas: For both ownership types, the overwhelming majority of students are in non-pastoral areas (94.5% for government, 96.9% for non-government). This indicates that pastoral communities are underserved in terms of educational access.

Government Schools: The gender gap is dramatically worse in pastoral areas. Here, only 25.6% of students are female. Even in non-pastoral government schools, the female representation (31.6%) is well below parity. **Non-Government Schools:** The trend is reversed. Non-government schools actually have a higher percentage of female students in both area types. In pastoral areas, 45.4% are female, and in non-pastoral areas, there is a slight female majority at 50.9%. Students (especially girls) in pastoral areas are the most educationally disadvantaged group. The extremely low enrolment of girls in government pastoral schools (only 6,837) is a major red flag.

The gender gap is most extreme in pastoral regions, particularly within Government schools, where only **1 in 4 students (25.6%) is female**.

Pastoral Schools: The vast majority of students (over 95%) are enrolled in non-pastoral schools, indicating limited educational access in pastoral communities. **Pastoral Communities are doubly disadvantaged:** Children in pastoral areas have less access to education (only 4.5% of total enrolment), and girls face a "double jeopardy" of geographic and gender discrimination

1.15 Enrolments of Foreign Students

Table 14: Enrollments of Foreign Students

Ownership	Sex	Bilateral	Scholarship	Total	%Females
Government	Female	25	86	111	25.5
	Male	75	250	325	74.5
	Total	100	336	436	100
Non-Government	Female	653	0	653	61.3
	Male	413	0	413	38.7
	Total	1066	0	1066	100
G. Total	Female	678	86	764	50.9
	Male	488	250	738	49.1
	Total	1166	336	1502	100

As observed in Table 14, there is a stark difference in scholarship in institution type. Government institutions offer a mix of scholarship types. Bilateral: 100 scholarships (22.9% of government total) other scholarship: 336 scholarships (77.1% of public total) non-government institutions: Offer only Bilateral scholarships. Bilateral: 1,066 scholarships (100% of non-government total). Significant Gender Imbalance, especially in non-government institutions Overall Totals: Across all scholarships and institutions, more scholarships were awarded to males (738) than females (764), but the difference is not extreme. Government institutions: Show a strong bias towards male recipients. 74.5% of government scholarships went to males (325 out of 436). Only 25.5% went to females (111 out of 436). Non-government institutions: Also show a bias, but less severe than in government institutions. 61.3% of private (bilateral) scholarships went to females (653 out of 1066). 38.7% went to males (413 out of 1066). C. Volume and Dominance of Private Scholarships. The vast majority of scholarships in this dataset are from private institutions. Private institutions awarded 1,066 scholarships. Public institutions awarded 436 scholarships. This means ~71% of all scholarships were bilateral scholarships from private institutions.

1.16 Number of Programs offering in government Institutions

Table 15: Number Programs Offering in all Level of Education

Level of Qualification	Number of Programs
Under Graduate	246
Master's Degree	450
PhD	110
Health Specialty	31
Health Subspecialty	39
Post graduate Diploma	24

Table 15 indicates the number of Programs in different level of education collected from 47 governmental HEIs and 111 non-governmental HEIs in the year 2024/25. From the data it can be seen that there are 246 active programs in undergraduate level of education, 450 programs in the second-degree level of education, 110 programs in PhD, 70 programs are existing in health specialty and sub-specialty and there are Post graduate diploma programs attendants in 24 programs.

1.17 National Exit Exam 2023/24

The government of Ethiopia has started the national exit examination test in all undergraduate programs in the year 2022/23 Academic year aims to measure the competency (Knowledge, skill and attitude) of undergraduate students.

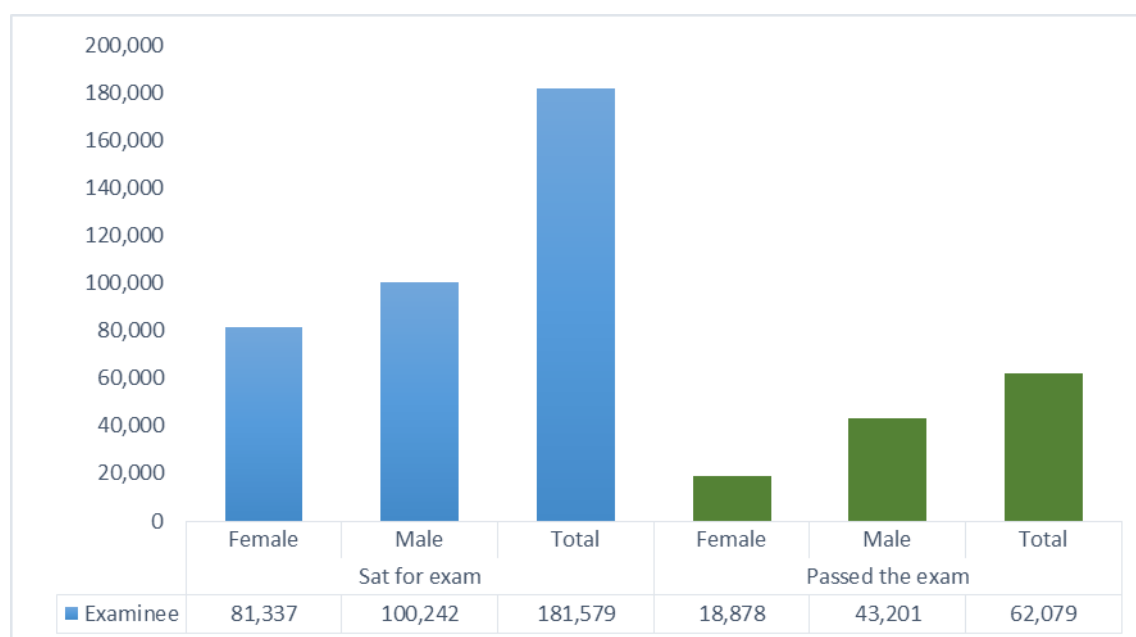

Figure 11: National Exit Exam Pass Rate by Ownership.

Figure 11 shows that a total of 181,579 candidates sat for the exam, with 81,337 females and 100,242 males in both first-time examinee and second-time examinee. Out of these, 62,079 passed, consisting of 18,878 females and 43,201 males. This reveals a gender disparity in success rates: the female pass rate was about 23.2% compared to 43.1% for males. Although males made up 55% of examinees, they

accounted for nearly 70% of those who passed, highlighting that male candidates not only participated more but also achieved significantly higher success rates than females.

1.18 Attrition of Students

In higher education, attrition of students specifically refers to students who discontinue their studies before completing their degree. This can result from factors like academic challenges, financial issues, or lack of engagement and the like. Understanding attrition helps institutions identify areas for improvement to enhance student retention and support.

Table 16: Attrition of students by ownership, cause of attrition and gender.

Causes of attrition	Government			Non-government			Total			%	%
	Female	Male	Total	Female	Male	Total	Female	Male	G.Total	Total	Female
Death	1	3	4	0	1	1	1	4	5	0.1	20.0
Dismissal for Good	493	1,025	1,518	45	43	88	538	1,068	1,606	16.1	33.5
Dropout	468	844	1,312	1,599	1,510	3,109	2,067	2,354	4,421	44.3	46.8
Employment	2	6	8	0	0	0	2	6	8	0.1	25.0
Family Commitment	3	9	12	4	2	6	7	11	18	0.2	38.9
Health Reasons	13	24	37	0	0	0	13	24	37	0.4	35.1
Other	304	709	1,013	524	398	922	828	1,107	1,935	19.4	42.8
Withdrawal	249	361	610	681	663	1,344	930	1,024	1,954	19.6	47.6
Grand Total	1,533	2,981	4,514	2,853	2,617	5,470	4,386	5,598	9,984	100	43.9

Table 16 shows the grand total attrition of students is 9,984, with 4,386 (43.9%) females and 5,598 (56.1 %) males. Dropout is the leading cause of attrition which accounts 4,421 (44.3%) and withdrawal is the second cause of attrition which accounts 1,954 (19.6%) while death is the least case of attrition which accounts 5 (0.1 %) of the of the total students. In NGHEIs Dropout is the leading cause of attrition which accounts 3,109 (70.3% of total drop out) and withdrawal is the second cause of attrition which accounts 1,344 (68.7% of total withdrawal) while death is the least case of attrition which accounts 1 (20%) of the total students. Dismissal for good is the leading cause of attrition which accounts 1,518 (94.5% of all dismissed) and dropout is the second cause of attrition which accounts 1,312 (29.6%) while death is the least case of attrition which accounts 4 (80%) of the of the total students in GHEIs

1.18.1 Attrition in Undergraduate by Cause of Attrition and Gender.*Table 17: Attrition in Undergraduate by Cause of Attrition and Gender*

Causes of attrition	Goveronment			Non-goveronment			Total			% Total	% Female
	Female	Male	Total	Female	Male	Total	Female	Male	G.total		
Death	1	3	4	0	1	1	1	4	5	0.1	20.0
Dismissal for Good	484	998	1,482	42	35	77	526	1,033	1,559	16.4	33.7
Dropout	447	765	1,212	1,546	1,449	2,995	1,993	2,214	4,207	44.1	47.4
Employment	2	6	8	0	0	0	2	6	8	0.1	25.0
Family Commitment	3	9	12	4	2	6	7	11	18	0.2	38.9
Health Reasons	13	23	36	0	0	0	13	23	36	0.4	36.1
Other	277	596	873	520	395	915	797	991	1,788	18.8	44.6
Withdrawal	235	336	571	679	660	1,339	914	996	1,910	20.0	47.9
Grand Total	1,462	2,736	4,198	2,791	2,542	5,333	4,253	5,278	9,531	100	44.6

Table 17 summarizes student attrition in undergraduate programs by causes of attrition, ownership and sex. Dropout is the most significant cause of attrition, accounting for 44.1% of all cases. It affects females more than males, with 1,993 female and 2,214 male students dropping out from the higher education institutions. Withdrawal is the second leading cause, contributing 20% to total attrition. It proportionately affects males, with 996 males versus 914 female cases. Other reasons (unspecified) account for 18.8%, showing a notable number of female cases (797). Causes like Death, Employment, Family Commitment, and Health Reasons are relatively minor, each contributing less than 1% to overall attrition. Females represent 44.6% of total attrition in undergraduate students.

1.18.2 Attrition in Master's Degree.*Table 18: Attrition in Master's Degree*

Causes of attrition	Goveronment			Non-goveronment			Total			% Total	% Female
	Female	Male	Total	Female	Male	Total	Female	Male	G.total		
Dismissal for Good	8	27	35	3	8	11	11	35	46	10.6	23.9
Dropout	18	73	91	53	61	114	71	134	205	47.2	34.6
Other	27	106	133	4	3	7	31	109	140	32.3	22.1
Withdrawal	14	24	38	2	3	5	16	27	43	9.9	37.2
Total	67	230	297	62	75	137	129	305	434	100	29.7

Table 18 shows the data on attrition in Master's degree programs highlights various causes across government and non-government institutions. A total of 434 students were reported, the leading cause of attrition is Dropout which accounts which for 47.2% of total attrition. Other reasons follow at 32.3%, which may include unspecified or miscellaneous causes. And Withdrawal contributes 9.9%, while Dismissal for Good accounts for 10.6%. Females represent 29.7% of total attrition. The highest female attrition is due to Withdrawal (37.2%), followed by Dropout (34.6%). Dismissal for Good and unknown causes also show notable female attrition rates, though lower.

1.18.3 Attrition in Ph.D. Level of Education

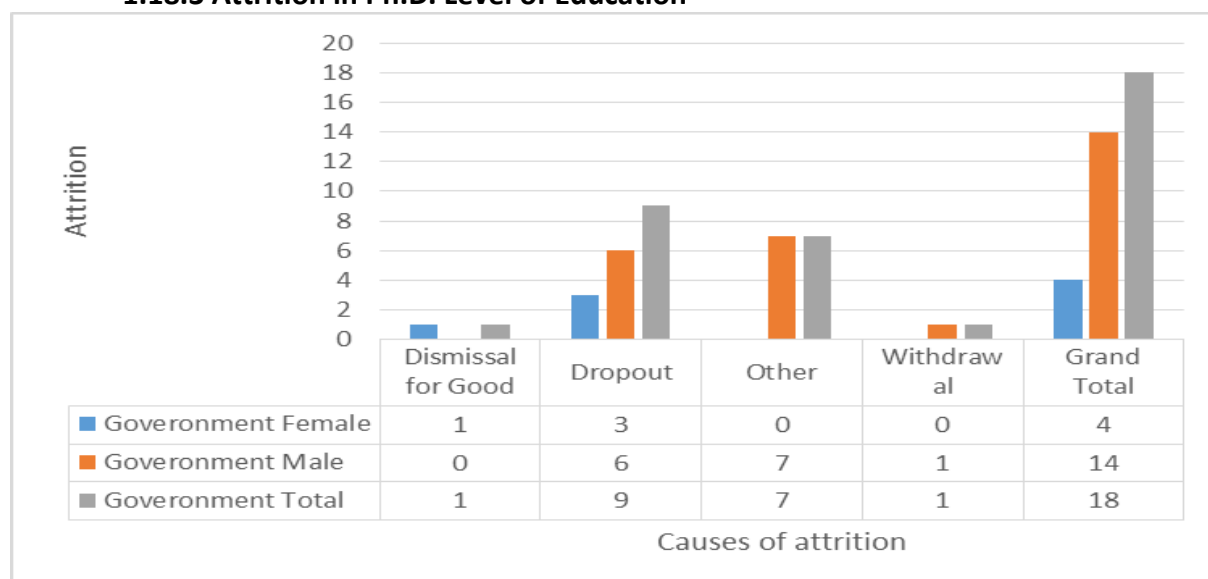

Figure 12: Attrition in Ph.D. Level of Education

Figure 12 above shows that there is a total of 18 attrition in PhD level of education in GHEIs, with females 22.2% and males' 77.8 percent. Dropout is the leading cause (50% of total attrition). "Other" reasons (unspecified) follow closely at 38.9%, and minor causes include Dismissal for Good and Withdrawal, each at 5.6%. Non-government higher education institutions have no enrollment in PhD programs.

1.19 Graduates

1.19.1 Graduates by Qualifications

The higher education graduates are those who complete their study at the higher education institutions, typically from the following levels: undergraduate degree, master's degree, Ph.D., Specialty, sub-specialty, and Postgraduate Diploma levels of education.

Table 19: Higher Education Graduates by Qualification

Qualification	Government			Non-government			Both			% Total	% Female
	Female	Male	Total	Female	Male	Total	Female	Male	Total		
Bachelor's Degree	12,595	28,628	41,223	6,616	5,232	11,848	19,211	33,860	53,071	83.8	36.2
Master's Degree	1,724	5,069	6,793	753	1,423	2,176	2,477	6,492	8,969	14.2	27.6
Doctorate Degree	39	257	296	0	0	0	39	257	296	0.5	13.2
Health Specialty	4	12	16	0	3	3	4	15	19	0.03	21.1
PGD	426	434	860	60	64	124	486	498	984	1.6	49.4
Total	14,788	34,400	49,188	7,429	6,722	14,151	22,217	41,122	63,339	100	35.1

Table 19 shows Bachelor's Degree dominates in total graduates representing 53,071 (83.8%) of all graduates, 19,211 (36.2%) of these graduates are female. The number of graduates in Government HEIs is 41,223 (77.7%) while in NGHEIs there are 11,848 (22.3%) graduates. Master's Degree accounts for 8,969 (14.2%) of total graduates and female's graduates represent 2,477 (27.6%) indicating a gender gap in advanced education. Doctorate and Health Specialties and Post Graduate Diploma

makes up 1.6% of graduates. Female representation is also lower than 50%. Female participation is better in post graduates diploma program graduates which account 49.4% which is nearly half of the total.

1.19.2 Graduates by ISCED

Table 20: Graduates by ownership ISCED bands and sex

ISCED bands	Government			Non-government			Total			%	%
	Female	Male	Total	Female	Male	Total	Female	Male	Total	Total	Female
Agriculture, forestry, fisheries and veterinary	1,035	1,881	2,916	4	28	32	1,039	1,909	2,948	5	35.2
Arts and humanities	975	1,788	2,763	0	0	0	975	1,788	2,763	4	35.3
Business, administration and law	4,511	7,948	12,459	4,899	4,195	9,094	9,410	12,143	21,553	34	43.7
Education	1,075	1,718	2,793	55	37	92	1,130	1,755	2,885	5	39.2
Engineering, manufacturing and construction	1,771	6,576	8,347	158	225	383	1,929	6,801	8,730	14	22.1
Generic programmes and qualifications	462	937	1,399	41	51	92	503	988	1,491	2	33.7
Health and welfare	1,238	2,668	3,906	1,868	1,541	3,409	3,106	4,209	7,315	12	42.5
Information and Communication Technologies	908	2,665	3,573	369	498	867	1,277	3,163	4,440	7	28.8
Natural sciences, mathematics and statistics	1,303	3,814	5,117	0	0	0	1,303	3,814	5,117	8	25.5
Services	110	521	631	0	0	0	110	521	631	1	17.4
Social sciences, journalism and information	1,400	3,884	5,284	35	147	182	1,435	4,031	5,466	9	26.3
Total	14,788	34,400	49,188	7,429	6,722	14,151	22,217	41,122	63,339	100	35.1

Table 20 shows the data of graduates per institution type, ISCED and gender is analyzed. The number of graduates in GHEIs accounts 49,188 (77%) in which 28.8% of them were females while 14,151 (23%) were from NGHEIs in which 52.5% of them were female graduates.

The data table presents a breakdown of graduates by ISCED band with a total of 63,339 students graduated across all fields of study in both government and non-government higher education institutions. Out of these, 22,217 (35.1%) were females and 41,122 (64.9%) were males, indicating a significant gender gap in higher education graduation. Females accounted for only 35.1% of the total graduates, with their representation highest in health and welfare and business-related fields. In Business, Administration and Law produced the largest share of graduates, with 21,553 (34%) of the total. This field also had the highest female participation, 43.7% of graduates with in the field of study. Service sector are the least ranked with only 631 (1%) graduates, though female representation was very low (17.4%) of total graduates. Sciences, Journalism and Information contributed 8.6%, while Natural Sciences, Mathematics and Statistics accounted for 8.1%.

1.19.3 Undergraduate graduates by ISCED Band

Table 21: Undergraduate Graduates by ISCED Band

Band Name	Government			Non_government			Total			%
	Female	Male	Total	Female	Male	Total	Female	Male	G.Total	
Agriculture, forestry, fisheries and veterinary	935	1,537	2,472	4	28	32	939	1,565	2,504	37.5
Arts and humanities	923	1,709	2,632	0	0	0	923	1,709	2,632	35.07
Business, administration and law	3,785	6,374	10,159	4,291	2,936	7,227	8,076	9,310	17,386	46.45
Education	566	1,098	1,664	54	35	89	620	1,133	1,753	35.37
Engineering, manufacturing and construction	1,525	5,430	6,955	143	173	316	1,668	5,603	7,271	22.94
Generic programmes and qualifications	438	903	1,341	41	51	92	479	954	1,433	33.43
Health and welfare	1,088	2,257	3,345	1,748	1,451	3,199	2,836	3,708	6,544	43.34
Information and Communication Technologies (ICTs)	852	2,485	3,337	300	418	718	1,152	2,903	4,055	28.41
Natural sciences, mathematics and statistics	1,128	3,038	4,166	0	0	0	1,128	3,038	4,166	27.08
Services	85	406	491	0	0	0	85	406	491	17.31
Social sciences, journalism and information	1,270	3,391	4,661	35	140	175	1,305	3,531	4,836	26.99
Total	12,595	28,628	41,223	6,616	5,232	11,848	19,211	33,860	53,071	36.2

In Table 21, among the ISCED of education program the total undergraduate graduates were 53,071 across all fields and the proportion of female graduates are 19,211 (36.2%). In this classification, Business, administration and law has the highest number of graduates 17,386 (32.8%), with a relatively balanced gender. Engineering, manufacturing and construction and ICTs are highly male-dominated. Health and welfare show a more balanced gender distribution, with a significant number of female graduates. Government HEIs dominate in most fields, especially in STEM and traditional disciplines. NGHEIs contribute significantly in Business, administration and law Health and welfare.

1.19.4 Undergraduate Graduates by Local Band and Ownership

Table 22: Under graduate graduates by local band and ownership.

Local Band Name	Government			Non_government			Total			%	%
	Female	Male	Total	Female	Male	Total	Female	Male	Total		
Engineering and Technology	2,298	7,480	9,778	300	360	660	2,598	7,840	10,438	19.7	24.9
Natural and Computational Science	1,137	3,366	4,503	143	231	374	1,280	3,597	4,877	9.2	26.2
Medicine and Health Science	1,071	2,217	3,288	1,748	1,451	3,199	2,819	3,668	6,487	12.2	43.5
Agriculture and Environmental Sciences	1,486	2,822	4,308	10	38	48	1,496	2,860	4,356	8.2	34.3
Business and Economics	3,783	6,908	10,691	4,320	3,066	7,386	8,103	9,974	18,077	34.1	44.8
Social Sciences and Humanities	2,517	5,123	7,640	54	35	89	2,571	5,158	7,729	14.6	33.3
Uncategorized	303	712	1,015	41	51	92	344	763	1,107	2.1	31.1
Total	12,595	28,628	41,223	6,616	5,232	11,848	19,211	33,860	53,071	100	36.2

As shown in table above the total number of graduates is 53,071, with an overall female proportion of 36.2%. Government HEIs account for 41,223 (77.6%) graduates, of the total, while Non-Government HEIs constitute of 11,848 (22.4%). In both government and non-government institutions' the number of males dominate over female graduates accounting 33,860 (63.8%). Therefore, gender distribution varies significantly by ownership and field. There is high female presence in Business and Economics 8,103 (44.8%), followed by medicine and Health Sciences 2,819 (43.5%) where as in the presence of females in Engineering and Technology is 2,598 (24.9%) while 1,280 (26.2%) in Natural and Computational Sciences.

Therefore, the number of female graduates is relatively high in business and economics and medicine and health sciences where as low in engineering and technology and natural and computational sciences which requires attention from the government.

2. ACADEMIC STAFF IN HIGHER EDUCATION INSTITUTIONS

2.1 Academic Staff on Duty

Academic staff are the backbone of higher education institutions. They are professionals responsible for teaching, research, community engagement and contributing to the academic development of students and the institution itself which is explained the same on Proclamation 1152/2019.

Table 23:-Academic Staff by Ownership, Gender and Citizenship.

Institution Ownership	Gender	Ethiopian	%Female	Expatriate	Total	%Female
Government	Female	8,976	17.3	31	9,007	17
	Male	42,955		153	43,108	
	Total	51,931		184	52,115	
Non Government	Female	351	17.6	0	351	0
	Male	1,645		2	1,647	
	Total	1,996		2	1,998	
Grand total		53,927		186	54,113	

Table 23 presented, there are 54,113 academic staff members employed in both Government HEIs and Non-Government HEIs which 52,115 (96.3%) is Governmental HEIs academic staff and 1,998 (3.7%) is Non-Governmental HEIs academic staff. The proportion of female academic staff in Government Higher Education Institutions accounts 9,007 (17.3%), while in Non-government HEIs, it is 351 (17.6%). The percentage of expatriates in Government HEIs is 184 (0.36%), and in Non-Government HEIs, it is 2 (0.1%).

2.2. Academic Staffs of Research Universities

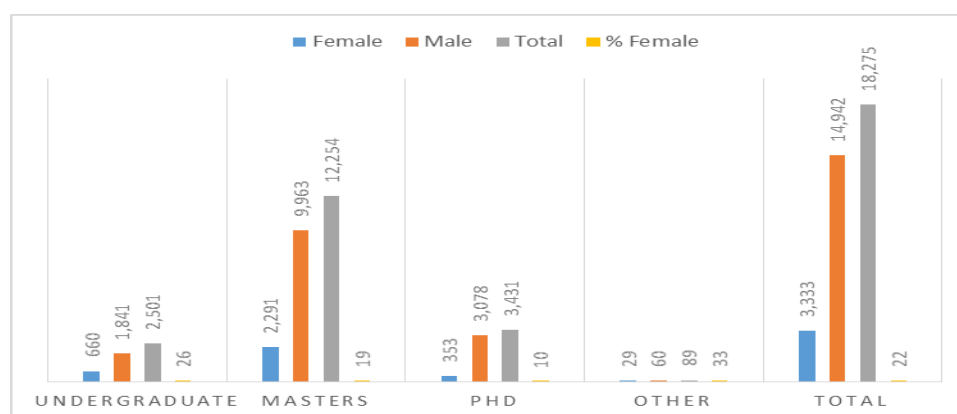

Figure 13: Academic Staffs of Research Universities

The datasets is predominantly composed of staffs with master's degrees, which represent 12,254 (67%) of all qualifications as indicated in figure 13. Moreover, there are totally 3,431 (18.8%) PhD holder staffs and 2,491 (13.6%) first degree holder staffs. There is a notable disparity in gender, as males 14,942 (82%) greatly outnumber females 3,333 (18%) in research universities staff. In detail the

number of female PhD holders' staffs are 353 (10.2%), Master holders are 2,291 (18.6%) and Bachelor degree holder staffs accounts 660 (26.3%) in research universities.

2.3. Academic Staff of Universities of Applied science

Table 24: Academic Staff of Universities of Applied science

Qualification	Female	Male	Total	% Female
Undergraduate	637	1,817	2,454	26
Masters	2,585	11,742	14,327	18
PhD	167	1,806	1,973	8
Other	21	84	105	20
Total	3,410	15,449	18,859	18

Table 24 shows the total number of staffs in University of Applied Sciences is 18,859 in which 2,454 (13%) are Bachelor degree holders, 14,327 (75.9%) are Master holders, 1,973 (10.4) are PhD holders and 105 (0.5%) are others. Yet, only 3,410 (18%) are female and there is a clear gender gap in University of Applied Sciences staff. In detail the proportion of female staff in Bachelor holders accounts 637 (25.9%), Master holders 2,585 (18%), PhD holders 167 (8.4%) and others 21 (20%) in the University of Applied Sciences staffs.

In summary, out of 18,859 the total staffs only 3,410 are female which accounts 18%. This imbalance across all qualification levels signals a need for targeted policies to support women in higher education and academic careers as well the proportion of qualification 13:75:5 which is far below the expected teach qualification mix.

2.4. Academic Staff of Comprehensive Universities

Table 25: Academic Staff of Comprehensive Universities by Qualification.

Qualification	Female	Male	Total	%Female
Undergraduate	365	1,504	1,869	19.5
Masters	1,625	9,184	10,809	15.0
PhD	37	674	711	5.2
Others	18	44	62	29.0
Total	2,045	11,406	13,451	15.2

Table 25 shows the total number of staffs in comprehensive universities is 13,451 in which 1,869 (13.9%) are Bachelor degree holders, 10,809 (80.3%) are Master holders, 711 (5%) are PhD holders and 62 (0.4%) are others. Yet, only 2,045 (15.2%) are female and there is a clear gender gap in comprehensive universities staff. In detail the proportion of female staff in Bachelor holders accounts 365 (20%), Master holders 1,625(15%), PhD holders 37 (5%) and others 18 (29%) in the University of Applied Sciences staffs.

In summary, out of 13,451 the total staffs, only 2,045 are female which accounts 15%. This imbalance across all qualification levels signals a need for targeted policies to support women in higher education and academic careers as well the proportion of qualification 13.9:80.3:5.2 which is far below the expected teacher's qualification mix.

2.5. Academic Staff of Science and Technology Universities

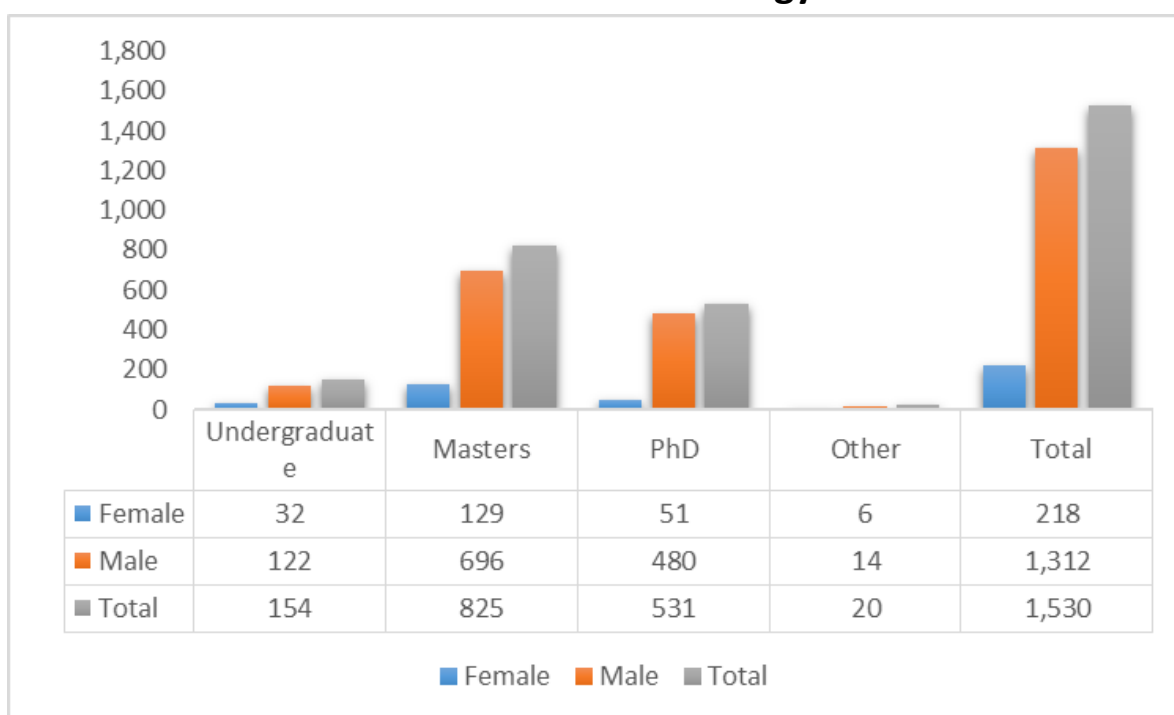

Figure 14: Academic Staff of Science and Technology Universities

According to Figure 14 above the number of academic staff qualification in Science and Technology Universities 1510 in which 154 (10.1%) are Bachelor degree holders, 825 (54.6%) are Master degree holders and 531 (35.1%) are PhD holders. In Science and Technology Universities the proportion of female staffs are 218 (14.2%). The staff qualification mix of Science and Technology Universities is 10:54:35, which is below the expected standard.

2.6. Academic staffs by Rank

The academic ranks indicate relative importance and power of Staff in academia. Among the common ranks are professor, associate professor, assistant professor, Lecturer and Graduate assistant.

Table 26: Academic Staff by Rank, Gender and Ownership

Institution Ownership	Gender	Professor	Associate professor	Assistant professor	Lecturer	Graduate assistant	Not available	Total
Government	Female	14	109	1,057	6,094	1,696	37	9,007
	Male	302	1,506	8,486	27,569	5,107	138	43,108
	Total	316	1,615	9,543	33,663	6,803	175	52,115
Non-Government	Female	-	-	17	231	103	-	351
	Male	6	16	174	1,228	223	-	1,647
	Total	6	16	191	1,459	326	-	1,998
	G.Total	322	1,631	9,734	35,122	7,129	175	54,113

As we can see from the above table, there are 52,115 Government and 1998 Non-governmental academic staffs in the HEIs. The highest number of the academic staff which is 35,122 (64.9%) are in lecturer rank, in which 33,663 (95.8%) are in Government HEIs and 1,459 (4.2%) of them are in Non-Government HEIs. The proportion of assistant professors is 9,734 (17.7%), the proportion of associate professors is 1631 (3%) and the proportion of professors is 322 (0.5%) while the proportion of graduate assistant is 7,129 (13.1%) in both institution ownership. The proportion of female staffs is 9,007 (17.2%) in GHEIs and 351 (17.5%) in NGHEIs. The proportion of female staffs is relatively equal proportion in both institution ownership.

2.7. Academic Staff on Study Leave

'Study Leave' is defined as absence from normal teaching, research and other duties within the university for a significant period of time, which provides an opportunity for individual members of staff to upgrade their educational level.

Table 27: Government HEIs Academic Staff on Study Leave

Universities Differentiation Category	Citizenship	Study Programs											
		Masters			PhD			Others			Total		
		Female	Male	Total	Female	Male	Total	Female	Male	Total	Female	Male	Total
Research Universities	Ethiopian	167	669	836	20	107	127	2	3	5	189	779	968
	Abroad	0	1	1	0	0	0	0	0	0	0	1	1
University of Applied Sciences	Ethiopian	311	1,569	1,880	15	118	133	36	101	137	362	1,788	2,150
	Abroad	0	1	1	0	0	0	0	0	0	0	1	1
Comprehensive Universities	Ethiopian	132	1,203	1,335	5	122	127	6	28	34	143	1,353	1,496
Science & Technology Universities	Ethiopian	1	10	11	0	4	4	0	0	0	1	14	15
Total		611	3,453	4,064	40	351	391	44	132	176	695	3,936	4,631

Table 27 shows that from the total academic staffs that are on study leave, 87.9% of them are on their Master's degree and only 6.9% of them are on their study leave for Ph.D. program. The proportion of female academic staffs on study leave from Government HEIs for both programs is only 14.2%. Across both postgraduate and PhD programs, the data reveals a significant gender disparity, with males outnumbering females in all categories.

2.8. Short- and Long-Term Professional Development Trainings

Short- and Long-Term training for teachers can focus on a variety of areas to enhance their skills and improve student outcomes. The Higher Diploma Program (HDP), Continuous Professional Development (CPD) and English Language Improvement Program (ELIP) are trainings which have an emphasis on the improvement of the quality of teaching, learning and the development of reflective practitioner of academic staffs.

Table 28: Academic Staff Participated in CPD/HDP and in ELIP Trainings by gender

Institution Ownership	Training	Training Participant by Gender			
		Female	Male	Total	% Female
Government	CPD/HDP	144	641	785	18.3
	ELIP	11	95	95	11.6
	Total	155	736	880	17.6
Non Government	CPD/HDP	32	103	103	31.1
	ELIP	21	112	112	18.8
	Total	53	215	215	24.7
Grand Total		208	951	1,095	19.0

The above table shows that 1,159 staffs are being participated in short-term and long-term professional development training. Among them 891(76.8%) trainees from GHEIs and 268 (23.2%) trainees from NGHEIs were participated. Females proportion in professional development training were 208 (17.9%) in which 155 (74.5%) were from GHEIs while 53 (25.5%) of the female trainees were from NGHEIs.

2.9. Academic Staff Attrition Rate

Academic staff attrition refers to the loss of faculty members from an educational institution, which can significantly impact the institution's performance, culture, and student experience. Understanding its causes and consequences is crucial for developing effective retention strategies.

Table 29: Staff Attrition in Government Universities by Cause of Attrition

Cause of Attrition	Female	Male	Total	%Female
Change of assignment	41	119	160	26
Continued absence or tardiness	20	65	85	24
Credential revoked or suspended	0	3	3	0
Compensation	0	1	1	0
Death	23	24	47	49
Family/personal relocation	27	56	83	33
Formal study or research	0	5	5	0
Homemaking/caring for a family member	0	1	1	0
Illness/disability	1	3	4	25
Leave Not Planning to Return	7	22	29	24
Leave Planning to Return	12	29	41	29
Misconduct	3	19	22	14
Organization Restructuring	1	0	1	100
Personal reason	325	488	813	40
Retirement	47	63	110	43
Termination with Cause	8	33	41	20
Unknown	72	106	178	40
Unsuitability	6	1	7	86
Other	42	75	117	36
Total	635	1,113	1,748	36

Table 29 shows there are many causes for staff attrition in government higher education institutions and 1,748 (635 female and 1,113 male) staffs were left their job due to various reasons. Personal reason was the cause for 813 (46.5%) staffs to leave their job as the first cause followed by unknown reason which accounts 178 (10.1%) and the third higher attrition rate is Change of assignment with “Cause” is 160 (9.1%).

3. RESEARCH IN HIGHER EDUCATION INSTITUTIONS

Ethiopia aspires to become a middle-income country by 2030. This can be accomplished by relevant, creative, problem-solving, and high-quality research that meets recognized standards. As suggested by the national Education and Training Roadmap, the Ministry of Education carried out important reforms and a novel model approach to set Ethiopian universities apart, including: Research, Applied Sciences Comprehensive and science and technology universities

3.1. Research type by the Differentiation of Universities

Differentiation is the process whereby distinct types of tertiary institutions progressively emerge in response to a country’s need for educational programs that provide diverse types of skills and knowledge to a wide range of students with divergent interests and abilities.

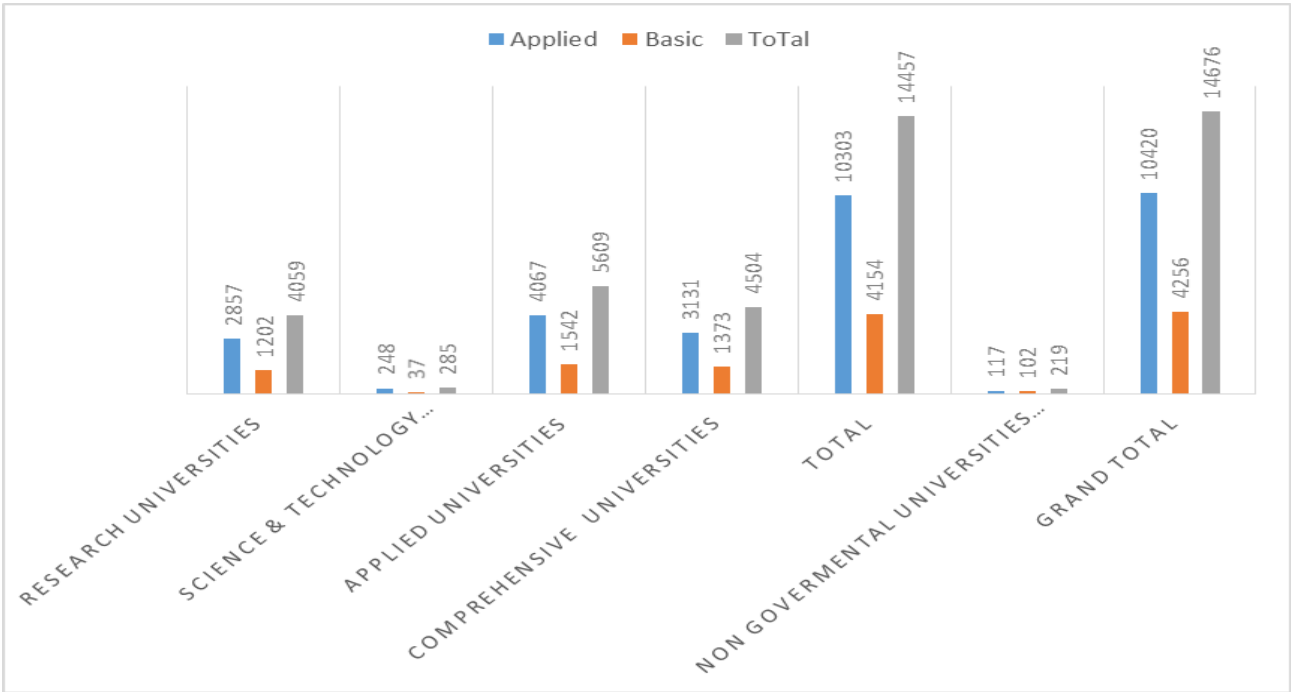

Figure 15: Type of Research by University Category

When we see the government HEIs in relation to their category Research Universities, Science and Technology universities, Universities of Applied Sciences and Comprehensive Universities were done 2857, 248, 4067 and 3132 applied researches respectively. Whereas they have done 1202, 37, 1542 and 1373 basic researches by governmental HEIs and 127 applied and 102 basic researches done by Non-Governmental institutions. The percentage of Applied to basic research is 71% and 29% respectively.

3.2. Research Publication in Relation to the Universities Differentiation

Publications make scientific information available to public, and allow the rest of the academic audience to evaluate the quality of the research.

Table 30 : Research Publication in Journals by Universities Differentiation.

University Category	Published Researches			
	Internationally Reputable Journals	Locally Accredited Journals	Locally Non-Accredited Journals	Total
Research Universities	5,843	320	51	6,214
Universities of Applied Sciences	2,625	184	19	2,828
Comprehensive Universities	1,440	31	44	1,515
Science and Technology Universities	493	0	5	498
Total	10,401	535	119	11,055
Non Government HEIs	73	118	79	270
Grand Total	10,474	653	198	11,325

Across all categories, a total of 11,325 researches were published with 270 of them are from Private/Non-governmental institutions (data from 11 Private college/universities). The vast majority (92.5%) were published in internationally reputable journals, showing the strong research output and global engagement of the governmental HEIs except Ambo, Assossa, Jijiga Jinka, Borna and Kebridhar universities which have no data found on HEMIS. Locally accredited publications account for 5.8 %, while only 1.7% of published on locally non-accredited journals.

3.3. Research Participation of Academic Staffs

According to the proclamation of 1152/2019 of HEIs one of their objectives is promoting and enhancing research focusing on knowledge and technology transfer consistent with country's priority needs. So that Higher education academic staffs expected to participate on research.

Table 31: Research Participation of Academic Staffs` in HEIs

University Category		Academic Staff Participated in Research							
		Applied				Basic			
		Female	Male	Total	%F	Female	Male	Total	%F
Government HEIs	Research Universities	1,627	8,511	10,138	16	417	2,472	2,889	14.4
	Universities of Applied Sciences	1,611	10,974	12,585	13	730	3,415	4,145	17.6
	Comprehensive Universities	944	7,645	8,589	11	358	3,254	3,612	9.9
	Science& Technology Universities	73	776	849	9	1	93	94	1.1
	Total	4,255	27,906	32,161	48	1,506	9,234	10,740	14.0
Non Government HEIs		23	300	323	7	124	378	502	24.7
G. Total		4,278	28,206	32,484	13	1,630	9,612	11,242	14.5

Universities of Applied Sciences academic staff have led in both applied (12,585) and basic research (4145) which is strong focus on research activities. Research Universities the second-highest participation of academic staff in both categories, especially in lead in both applied (10,138), and basic research (2,889) participation, showing their notable given their practical orientation Comprehensive Universities show moderate involvement, with 8,589 in applied and 3,612 in basic research. Science & Technology Institutions have relatively low participation, especially in basic research (only 94 staff), which is surprising given their technical focus. Non-Governmental Institutions have the smallest numbers overall, but a high female participation rate in basic research (25%), which stands out. The Grand Total shows that across all categories', applied research has significantly more staff involved (32,484) than basic research (11,242).

Generally Female participation is consistently lower across all categories. The highest female percentage in basic research is in Non-Governmental Institutions (25%), while Science & Technology shows the lowest (1%).

3.4. Research Financing at Higher Education Institutions

To tackle the most urgent issues facing the country, the government has placed a high priority on improving its capacity to form and maintain partnerships and to strengthen cooperative initiatives both domestically and internationally. It is advised that institutions of higher learning set aside funds for research in accordance with the guidelines, seek out extra funding from various sources, and conduct research on problem-solving to support the advancement of the country.

Table 32: Research Budget Expenditure of HEIs

University Category	Source of Budget		Total (ETB)
	Government	Donors / External grant	
	Amount in ETB	Amount in ETB	
Research Universities	6,470,908,257.16	8,886,903,806.48	15,357,812,063.64
University of Applied Sciences	904,165,196.76	122,961,793.71	1,027,126,990.47
Comprehensive Universities	1,001,146,747.76	117,915,903.16	1,119,062,650.92
Science and Technology Universities	1,195,996,352.57	63,323,268.50	1,259,319,621.07
Total	9,572,216,554.26	9,191,104,771.84	18,763,321,326.10
Non Government HEIs	13,151,736.00	385,000.00	13,536,736.00
Grand Total	9,585,368,290.26	9,191,489,771.84	18,776,858,062.10

Research Universities receive 15.36 billion Birr which is highest budget, and notably, donor/external grants 8.89 billion exceed government funding 6.47 billion which shows that promising international collaboration and reliance on external research funding. This suggests a strong emphasis on research-driven institutions, likely due to their role in innovation, policy development, and international collaboration. Science & Technology Universities receive 1.2 billion Birr from the government, but only 63 million Birr from donors. Their donor funding is the lowest among public categories, which may hinder innovation and tech advancement Whereas Both Applied and Comprehensive Universities Show Similar Patterns receiving over 1 billion Birr in total, with government funding making up the majority. Non-Governmental Institutions total

budget is just 13.5 million Birr, with only 385,000 Birr from external grants. This reflects minimal public investment and donor interest in Non-government University/Institutes providers. Generally, government funding remains the dominant source across most categories, however, donor/external grants are nearly equal in aggregate (9.19B Birr), largely to the massive support for Research Universities.

3.5. Technology Transfer and Developments

Industries, HEIs, training institutes and research institutes share their skills, knowledge, technologies, methods of manufacturing samples and facilities to guarantee that scientific and technological developments are accessible to a wider range of users who can then develop and exploit the technology into new products, processes, applications, materials, or services.

Table 33: The Number of Technologies Developed by Category and Expenditure

	Category of Technology Development	Number of Technology Developed	Gender of Technology Developer				Total expenditure
			Female	Male	Total	%F	
Governmental	Adapted	225	8	217	225	3.6	105,573,716.73
	Invented	9	0	9	9	0.0	4,758,613.00
	Innovated	150	12	139	151	7.9	21,721,827.46
	Total	384	20	365	385	5.2	132,054,157.19
Non governmental	Adapted	15	2	13	15	13.3	1,135,752.50
	Invented	3	1	1	2	50.0	9,654,036.25
	Total	18	3	14	17	17.6	10,789,788.75
	Grand Total	402	23	379	402	5.7	142,843,945.94

The above table shows that 225 (58.6%), 9 (2.3%) and 150 (39%), of the technologies are adapted, invented and innovated in government HEIs respectively. The participation of female academia in technology development is 4.9 % in government HEIs by the expenditure of total ETB 132,054,157.19 whereas, Non-Government HEIs have participated in technology development of 15(83.3%) by adaptation and 3(6.7%) by invention using a total budget of ETB 10,789,788.75.

3.6. University Industry Linkage

It is a platform that will be formally established by higher education, technical and vocational training, research institutions, and industries that are based on collaboration and mutual benefit.

Table 34: Number of MoU signed for UIL by University Category and Enterprise Ownership

University Category	Enterprise Ownership	Number of MoU	
		No	%
Research Universities	PB	167	78
	PV	41	19
	NG	7	4
	Total	215	100
Universities of Applied Sciences	PB	198	66
	PV	82	27
	NG	19	6
	Total	299	100
Comprehensive Universities	PB	86	62
	PV	36	26
	NG	17	12
	Total	139	100
Science and Technology Universities	PB	16	76
	PV	5	24
	Total	21	100
Grand Total		653	

As we see from the above table, Universities of Applied Sciences have the highest number of memorandum of understandings signed to linkages which is 299 followed by Research universities which is 215, whereas, Comprehensive universities and Science and Technology universities have signed 139 and 21 memorandums of understandings respectively.

3.7. Community Engagement in the Universities

The focus of community engagement and service offered by universities include professional services like consulting, outreach, and development as well as trainings. Higher education institutions are also expected not only to disseminate their research and/or technological outputs, but also to investigate, improve, and apply Indigenous knowledge.

Table 35: Community Services in Research Universities with Budget Used

Community Service Category	Academic staff participation in Community Engagement Service by Gender				Budget Used
	M	F	Total	% F	
Training	4,007	1,107	5,114	21.6	7,725,054.45
Outreach Services	1,082	434	1,516	28.6	27,698,944.80
Consultancy	381	32	413	7.7	59,145,904.80
Outreach Programs	7,214	1,806	9,020	20.0	388,004,240.00
Outreach Projects	2,789	1,867	4,656	40.1	6,147,033.00
Other Services	2,926	545	3,471	15.7	40,663,415.00
Research Output	75	13	88	14.8	647,400.00
Total	18,474	5,804	24,278	23.9	530,031,992.05

As the above table shows a total of 5,114 academic staff participated in the training as community service and 21.6% of the participants are female, 1516 academic staff engaged in outreach services as well with the participation of 28.6% female academic staff, 4656 academic staff participated in Outreach Projects. But the proportion of female academicians' involvement in all kind of community engagement in research Universities is 23.9% and the whole budget used for different community service by Research University is ETB 530,031,992.05

Table 36: Community Engagement Activities in Comprehensive Universities.

Community Engagement Category	Academic staff participation in Community Engagement by Gender				Budget Used
	Female	Male	Total	% Female	
Training	1,859	7,015	8,874	20.9	35,315,052.00
Outreach Services	18,300	53,635	71,935	25.4	5,078,917.00
Consultancy	92	640	732	12.6	29,373,066.20
Outreach Programs	1,481	7,324	8,805	16.8	71,880,257.00
Outreach Projects	567	3,888	4,455	12.7	38,077,711.00
Other Services	673	2,909	3,582	18.8	202,754,733.04
Research Output	75	837	912	8.2	11,253,681.00
Total	23,047	76,248	99,295	23.2	393,733,417.24

Academic staff participation in Community engagement/ service the Outreach Services has the highest participation overall (71,935), and also the highest female representation (25.4%) compared to the others. Research Output and Consultancy show the lowest female participation of 8.2% and 12.6%, respectively, suggesting potential gender participation gaps in academic staff participation. Across all categories, female participation is consistently lower than male participation. Even in the most inclusive category (Outreach Services), women still make up only about a quarter and the total budget used for different community engagement /service by comprehensive universities is 393,733,417.24 in 2024/25.

Table 37: Community Engagement Activities in Universities of Applied Sciences.

Community Engagement Category	Academic Staff Participation in Community Engagement by Gender				Budget Used
	Female	Male	Total	% Female	
Training	1,011	3,998	5,009	20.2	49,199,343.19
Outreach Services	251	2,751	3,002	8.4	8,122,341.00
Consultancy	172	372	544	31.6	9,260,370.00
Outreach Programs	192	482	674	28.5	179,702,995.00
Outreach Projects	801	2,669	3,470	23.1	8,306,560.00
Other Services	590	1,477	2,067	28.5	53,163,062.00
Research Output	91	233	324	28.1	180,000.00
Total	3,108	11,982	15,090	20.6	307,934,671.19

The above table presents that from the total academic staffs participated in different community engagement/service 20.6% of them are female academic staffs. Majority of the Applied Sciences Universities staff are participated in training. The total budget expenditure is ETB 307,934,671.19 for community engagement/activities in Universities of Applied Sciences.

3.8. Community Engagement Activities in Science and Technology Universities

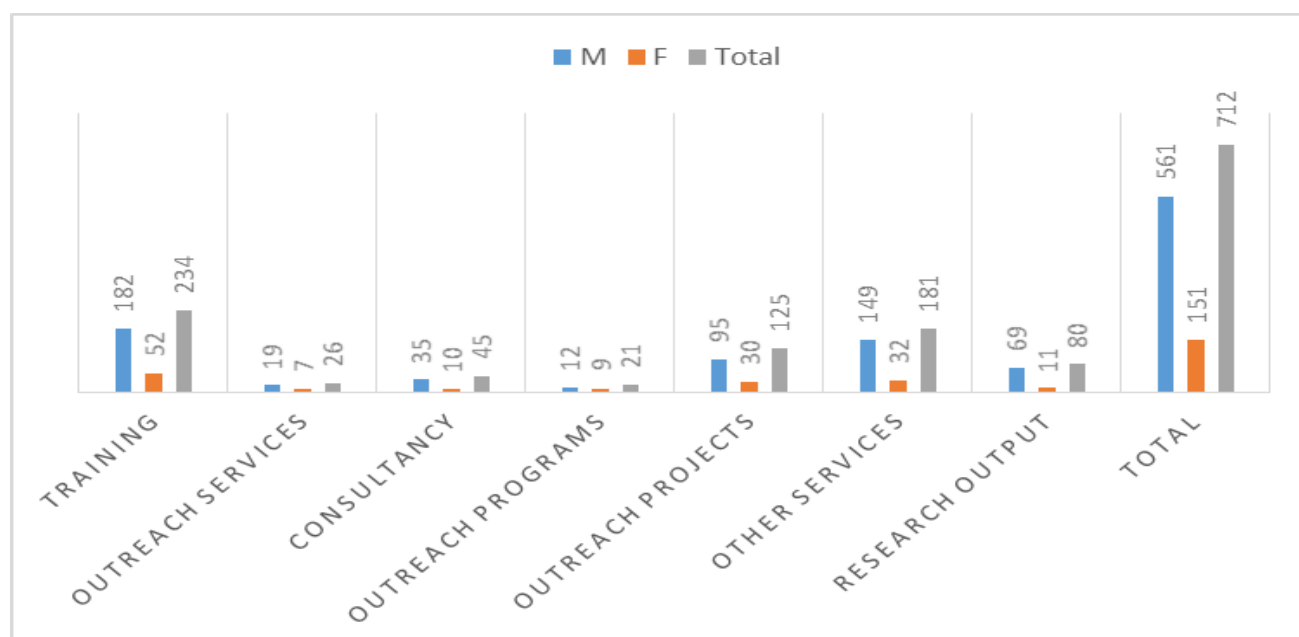

Figure 16: Community Engagement areas.

The figure shows the number of Science & Technology universities female academic staff in community engagement/activities is 52(22.2%). Total Science and Technology universities academic staff participated in community engagement/service is 712(46.6 %) and budget expenditure for community engagement/ service in Science and Technology universities is ETB 20,507,655.34

Table 38: Community Engagement Activities in Non- Governmental HEIs.

Community Engagement Category	Academic staff participation in Community Engagement by Gender				Budget Used
	Female	Male	Total	%Female	
Training	120	440	560	21.4	12,255,230.20
Outreach Services	32	105	137	23.4	4,917,050.32
Consultancy	16	70	86	18.6	25,473,000.00
Outreach Programs	12	69	81	14.8	3,220,000.00
Outreach Projects	30	79	109	27.5	5,069,000.00
Other Services	168	282	450	37.3	7,667,192.00
Research Output	20	182	202	9.9	4,480,000.00
Total	398	1,227	1,625	24.5	63,081,472.52

The above table evident across all categories, with the highest male participation in Training (440) and Other Services (282) in community engagement in private/Non-Government HEIs. Female participation peaks in Other Services (168) of community engagement making it the most gender-inclusive category at 37.3% female representation. The p Non-government Institutions have used more budget which is over 25 million ETB, Training had the second-highest budget (~12.2 million ETB) and the highest total participation (560). The Overall, female participation across all categories is 24.5%, indicating a significant gender gap in community engagement roles.

3.9. STEM Program in HEIs

In recent years, Ethiopia has made significant investments in STEM (Science, Technology, Engineering, and Mathematics) education initiatives. These programs aim to prepare students for the future labor market and create a highly skilled workforce. Additionally, this program sought to raise national standards for education, with an emphasis on STEM fields.

Table 39: Participation of academic staff in STEM Program activities in public Universities

University Category	Academic Staff Participated on STEM Program				STEM Program Participated Schools	STEM Trained School Teachers	Total Expenditure
	Female	Male	Total	%			
Research Universities	138	198	336	41.1	257	344	3,590,118
Universities of Applied Sciences	222	591	813	27.3	1,149	1,280	23,635,325
Comprehensive Universities	173	529	702	24.6	857	787	12,260,022
Science & Technology Universities	16	98	114	14.0	3,623	4,551	2,407,640
Total	549	1,416	1,965	27.9	5,886	6,962	41,893,105

The table presents that Applied universities had the highest number of participants (813), while science and technology universities had the lowest (450) academic staff participation in STEM program. Applied universities also accounted for the largest share of the total expenditure (Birr 23,635,325), emphasizing their significant investment in STEM training. Female academic staff participation in STEM program particularly in Science & Technology Universities and Applied Universities are less relative to the other category of Universities. Generally, a total of 5886 schools has participated in STEM program, 6,962 school teachers have trained STEM and Birr 41,893,105 was used to the implementation of the program.

4. LEADERSHIP AND GOVERNANCE

4.1. Board members

The University Management Board serves as the governing body of universities, in accordance with the accountability, duties and responsibilities outlined in the Higher Education Proclamation No. 1152/2011 article 45. As per differentiated Universities category the number of board members assigned to each university is presented below.

Table 40: Numbers of board members by classification

No	University Category in Differentiation	Board members			% of Females
		Female	Male	Total	
1	Research University	10	48	58	17.2
2	Universities of Applied Science	15	101	116	12.9
3	Comprehensive University	15	145	160	9.4
4	Science and Technology Universities	3	13	16	18.8
Total		43	307	350	12.3

In the category of Universities differentiation, male representation in the board is higher, with 307 members accounting for 87.7% of the total. In contrast, female representation is low, with only 43 members, making up just 12.3% of the board. These figures clearly highlight a substantial low female participation in the university's board.

4.2. Top Leaders

Top leaders of universities refer to the highest-ranking officials responsible for the overall governance, strategic direction, and management of the institution. These leaders typically include: university Presidents, vice Presidents, scientific Directors and Deputy Scientific Directors. The table below indicates the aggregated data on number of top leaders who have held top leadership positions in government universities by levels, academic qualification and sex.

Table 41: Top Leaders by Position level, qualification and sex

Position	Top Leadership Position							% of Females
	2 nd degree	3 rd degree			Total			
	M	F	M	T	F	M	T	
President	6	2	23	25	2	29	31	6.5
Vice Presidents	19	12	71	83	12	90	102	11.8
Scientific directors	7	0	10	10	0	17	17	0.0
Vice/ Sc./D	10	0	11	11	0	21	21	0.0
Total	42	14	115	129	14	157	171	8.2

As shown in the table, women represent only 4.26% of top leadership positions, such as university presidents, underscoring their significant under-representation. All presidents hold a third-level (PhD) qualification.

Among vice presidents, 81.4% possess the same qualification level as presidents. In contrast, 19.4% of presidents and 18.6% of vice presidents hold a second-level degree. Furthermore, the data reveals a complete absence (0%) of female representation in the position of scientific directors and deputy scientific directors. Among scientific directors and deputy scientific directors, 58.8% and 47.6% respectively hold a second-level degree. These figures clearly highlight the significant under-representation of females in senior leadership and scientific directors' roles within higher education institutions.

Table 42: Top Leaders by Academic Rank and by sex

Position	Academic rank															
	Lecturer			Assistant Professor			Associate professor			Professor			Total			% of Females
	F	M	T	F	M	T	F	M	T	F	M	T	F	M	T	
President	0	0	0	3	10	13	1	13	14	0	5	5	4	28	32	12.5
Vice president	3	8	11	6	45	51	2	38	40	2	0	2	13	91	104	12.5
Scientific director	0	5	5	0	8	8	0	3	3	0	1	1	0	17	17	0.0
Vice Scientific/D	0	5	5	0	8	8	0	3	3	0	5	5	0	21	21	0.0
Total	3	18	21	9	71	80	3	57	60	2	11	13	17	157	174	9.8

The data indicate that the majority of top leaders in public universities have attained the academic rank of Assistant Professor or higher. Specifically, 40.6% of presidents, 49.0% of vice presidents, 47.1% of scientific directors, and 38.1% of vice scientific directors hold the rank of Assistant Professor. At the Associate Professor level, representation includes 43.8% of presidents, 38.5% of vice presidents, 17.7% of scientific directors, and 12.3% of vice scientific directors. Leaders at the rank of full Professor comprise 15.6% of presidents, 1.9% of vice presidents, 5.9% of scientific directors, and 23.8% of vice scientific directors.

Across all leadership positions, however, women account for only 9.8% of top leaders in government universities. This significant under-representation underscores the persistent gender gap in academic leadership and highlights the urgent need for policies and interventions that promote women's advancement to higher academic ranks and leadership roles.

4.3. Middle Level Academic Leaders

Middle management of academic positions in a university mentions to individuals who hold leadership roles between the top leaders and middle level faculty or staff. These positions are crucial for implementing the university's strategies and policies within specific deans and vice deans and vice scientific director. Middle managers ensure the smooth operation of academic and administration non-academic functions. The table below shows middle level leaders who have held positions at various levels in government HEIs. They are categorized by their educational level, academic rank and job title.

Table 43: Middle Leadership Position of Academic Staff by Education level

Position	Education level												% of Females
	1 st degree			2 nd degree			3 rd degree			Total			
	F	M	T	F	M	T	F	M	T	F	M	T	
Dean	0	0	0	29	272	301	10	144	154	39	416	455	8.6
Vice Dean	1	1	2	15	107	122	4	53	57	20	161	181	11.0
V/Sc/D	0	0	0	0	10	10	0	11	11	0	21	21	0.0
Total	1	1	2	44	389	433	14	208	222	59	598	657	9.0

As mentioned in the table of middle leaders of the university, regarding the education level of college deans are 66.2% 2nd degree, vice deans are 67.4%, and vice scientific directors 47.6% and 3rd degree deans are 33.9%, vice deans are 31.5%, and Vice scientific 52.4%. Overall, the representation of females in these middle management positions in government universities is only 9% as of 2017 E.C.

Table 44: Middle level Academic leaders by academic rank in public HEIs

Position	Academic Rank																		% of Females
	Graduate Assistant			Lecturer			Assistant Professor			Associate professor			Professor			Total			
	F	M	T	F	M	T	F	M	T	F	M	T	F	M	T	F	M	T	
Dean	5	8	13	16	185	201	12	156	168	3	43	46	0	10	10	36	402	438	8.2
Vice/D	0	0	0	15	73	88	5	68	73	0	17	17	0	2	2	20	160	180	11.1
V/Sc/D	0	0	0	0	5	5	0	8	8	0	3	3	0	5	5	0	21	21	0.0
Total	5	8	13	31	263	294	17	232	249	3	63	66	0	17	17	56	583	639	8.8

The data shows that among those holding middle leadership positions in public universities: Assistant Professors account for 38.4% of deans, 46.72% of vice deans, and 38.1% of vice scientific directors. Associate Professors represent 10.5% of deans, 9.4% of vice deans, and 14.3% of vice scientific directors. Professors comprise 2.3% of deans, 1.1% of vice deans, and 23.8% of vice scientific directors. Regarding gender representation, female participation particularly at the vice scientific director position is zero, and it is below 12% in the other positions. In the 2017 E.C. academic year, women held only 8.8% of middle leadership positions in public universities. As illustrated in table these figures clearly demonstrate the continued underrepresentation of females across all academic ranks and leadership levels within public higher education institutions.

4.4. Lower-level leaders by education level by sex

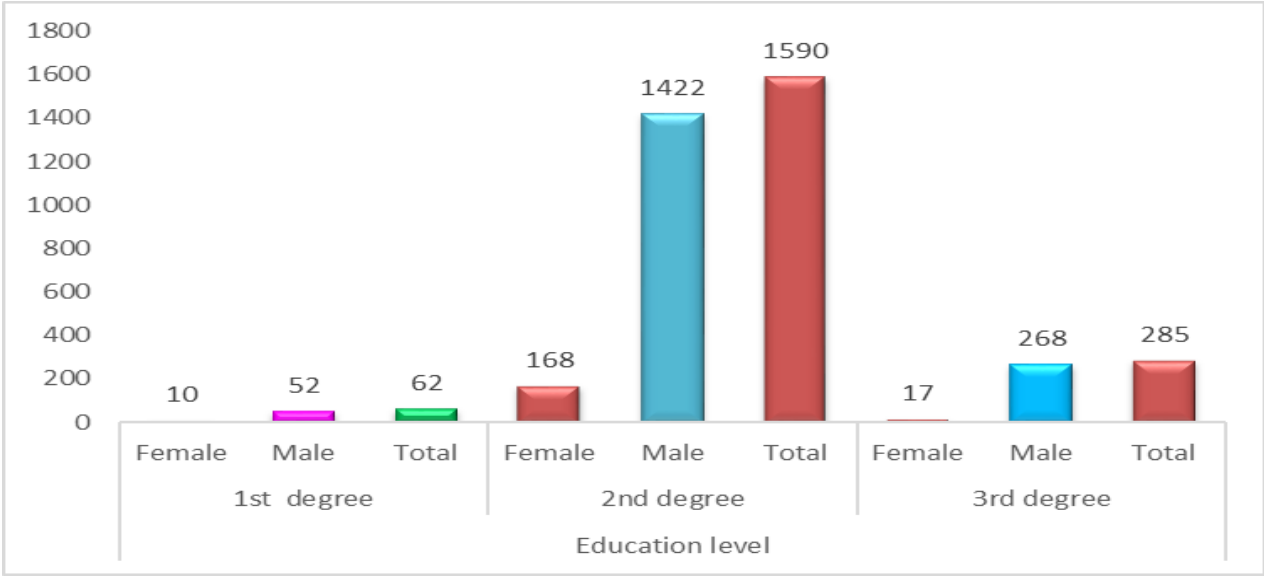

Figure 17: Lower Leadership Position by Education level

According to the data, within middle leadership positions at the university, 3.2% of department heads hold a first-degree qualification, while 82.1% possess a second-degree qualification. Furthermore, 14.7% of deans hold a third-degree qualification. Data from the 2017 E.C. academic year reveals that females constitute only 10.1% of lower-level leadership positions in government universities. This figure highlights the limited representation of females in departmental leadership roles.

4.5. Lower-level academic Leaders by academic rank

Lower-level leadership by academic position in a university mentioned to individuals in leadership roles within the academic structure, who handle day-to-day operations, supervise faculty, and ensure the smooth functioning of specific programs or units. These positions are generally focused on the practical implementation of policies, managing teams, and supporting students and faculty in their academic and non-academic activities, the table below provides information on department heads working at the lower level in government higher education institutions, categorized by academic rank job title, and sex.

Table 45: Lower-level academic leaders by academic rank

	Academic Rank																							% of Females	
	Graduate Assistant I			Graduate Assistant II			Assistant Lecturer			Lecturer			Assistant Professor			Associate professor			Professor			Total			
Gender	F	M	T	F	M	T	F	M	T	F	M	T	F	M	T	F	M	T	F	M	T	F	M	T	
Department Head	3	9	12	2	6	8	6	27	33	137	1,115	1,252	45	510	555	2	69	71	0	8	8	195	1,744	1,939	10.1

The data in above table presents the academic rank distribution to gender within a university department, highlighting a significant female` participation disparity. The total number of faculty is 1,939. The data is segregated into five academic ranks: Graduate assistants, Assistant lecturer, assistant professor, associate

professor and full professor. A clear trend emerges where female representation decreases markedly at higher academic ranks. Female constitute the majority (1,252, or 64%) of the total graduate assistants. However, this share drops substantially for leading holding Professor academic rank, where females hold only 45 out of 710 positions (6.3%). The figures for Assistant Professor (555, total, 195 females, 35.1%) and Associate Professor (1,744 total, 193 females, 11.1%) show a progressive decline in female representation with each promotional step. On the contrary, male is a minority at the entry level (graduate assistants) but become majority at the highest rank (Professor), holding 665 of the 710 accounted for 93.7%.

4.6. Middle level administrative leaders

The table below shows the number of middle level leaders include: managing directors and executives by educational level and share of female participation in government HEIs.

Table 46: Middle level Administrative leaders by position, qualification and sex.

Position	Education level									
	2 nd degree			3 rd degree			Total			% of Females
	F	M	T	F	M	T	F	M	T	
Managing Directors	2	22	24	1	7	8	3	29	32	9.4
Executive Officers	1	26	27	0	14	14	1	40	41	2.4
Total	3	48	51	1	21	22	4	69	73	5.5

This data in the above illustrates the middle level leaders’ education level and gender representation. The data set covers 73 leaders in two roles include managing directors (32 total) and executive officers (41 total). Leaders’ educational level divided into a second degree and third-degree levels. The difference is most evident in the proportion of females, which is only 5.5% across all roles and educational levels. Only 3 of the 51 leaders with second-degree holders are female (5.9%). This under-representation is even more pronounced among Executive Officers, where only 1 of 41 is female (2.4%). In the leaders with third degree (PhD) category, there is only one female compared to 21 males.

5. BUDGET UTILIZATION IN UNIVERSITIES.

Universities' budgets play a key role in shaping the quality and accessibility of higher education. These funds, from both government and institutional sources, are often a percentage of the national budget, which varies by country. In developed nations, education typically receives 10-15% of the budget. When compared to GDP, university funding becomes an important investment in the nation's workforce and research capacity. A strong allocation drives economic growth, while insufficient funding can hinder innovation and competitiveness. A balanced budget ensures quality education, but funding cuts can impact student access, faculty, and research. Understanding this relationship is crucial for economic development.

The tables below provide an analysis of government budget allocation including data on revenue, GDP, the share of the budget relative to GDP.

5.1. Universities Allocated Budget Against GDP.

Table 47: Government University 2024/25 Allocated Budget Share from GDP

Budget Type	Allocated Budget	GDP	% Share from GDP
Recurrent	65,726,684,603.99	2,954,974,369,856.37	4.33
Capital	62,190,878,142.74		
Total	127,917,562,746.73		

The table provided outlines the breakdown of a university’s allocated budget in relation to the national GDP. The total allocated budget for the university is 127,917,562,746.73, divided into two main categories: recurrent budget (65,726,684,603.99) and capital budget (62,190,878,142.74). The total GDP of the country is 2,954,974,369,856.37 in the year 2024/25. The percentage share of the university's allocated budget from the national GDP is calculated to be 4.33%.

This 4.33%% represents the proportion of the national economy dedicated to funding the university’s mission and various functions. The recurrent budget, being the largest portion, likely covers ongoing operational expenses, while the capital budget pertains to investments in infrastructure or new developments. By allocating 4.33% of the national GDP to higher education, the government emphasizes the importance of university funding in driving innovation, research, and the development of human capital for long-term economic growth.
